Hardy Waneta Plum

HANSKA

(Pictured below)

Fruit of extra fine quality, with very pleasing apricot flavor. Your orchard should include this Plum. Like all Hansen Hybrids it bears exceptionally young and furnishes an abundance of fruit. For quick results, grow these Plums.

NORTHWEST **PLUMS**

Special young bearing strains, highly productive; these Sonder-egger trees, with their wonderful roots and healthy tops, will satisfy you in every respect.

WANETA

Actual Plums are twice as large as the picture (left) shows. Nothing equals the productiveness of this wonderful tree. Bears very young. Include Waneta in your home orchard or garden, for large and early crops.

Sonderegger's Collection of HARDY PLUMS

- Waneta Plum
- Hanska Plum
- Opata (Blue) Plum
- Compass Cherry Plum

All selected trees, true to label, 3 to 4 ft., postpaid for

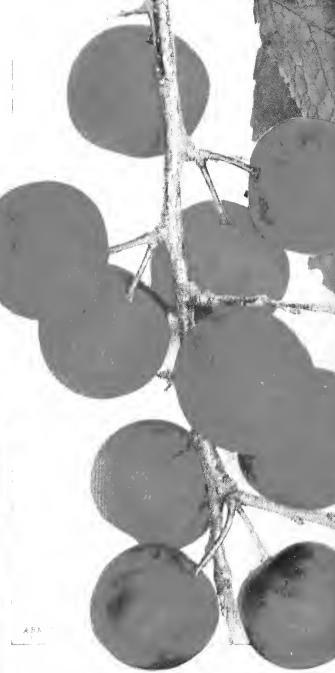

HARDY **POLLY** PEACH

One of the surest bearers of all Peach varieties, due to its increased hardiness. Its quality as a mid-season freestone Peach is as good as the best; a fine Peach in every respect. An abundant supply of true-to-name Polly Peach trees. well rooted, extra fine specimens, enables me to offer them for this season at this extra low price: 2-3 ft., 30c each; 3-4 ft., 40c each, postpaid. 4-6 ft., 60c each.

For a full list of all Plums, see page 8.

All fancy, budded Peaches, see page 10.

COMPASS CHERRY PLUM

A cross between a Plum and a Cherry, resulting in a most useful fruit for canning purposes. Quality is very good. The outstanding value of this tree is particularly apparent in its wonderful bearing ability, producing enormous crops, and bearing young, beginning the second year. Plant them anywhere, they do not require much room. Special price, 3- to 4-ft. trees, 3 for \$1.00, postpaid. 4- to 6-ft. trees, only 45c each.

Fancy RHUBARB

(PIE PLANT)

My Giant Rhubarb, the heaviest producing variety on the market, will produce for you an unexcelled quality of Rhubarb. The stalks are heavy, 12 to 16 inches long, of uniform size, lower half of crimson color. This Rhubarb is tender, possesses a remarkably fine flavor. I furnish whole roots, solid with nice crowns, ready to do well in your garden. This is the best grade of roots you can plant, and far superior to hollow crowns, or old root divisions. Realizing that due to drought many of the old plantings have to be replanted, I am anxious to help my customers get new plantings started, and am pricing the roots very low.

STANDARD SIZE ROOTS

3/4 to 1-inch thick, 3 for 25c; 10 for 70c; 25 for \$1.50; post-paid.

EXTRA HEAVY ROOTS

1 to $1\frac{1}{2}$ -inch thick, very good, and fresh stock, 3 for 40c; 8 for 80c; 12 for \$1.00; postpaid.

Chautauqua The Large Sweet Gooseberry

NOTE COLORED PHOTO ON REAR INSIDE COVER PAGE.

This is not a new Gooseberry; it has been on the market for many years, but was always so scarce that the demand could never be fully supplied. And being rather slow to propagate it was never possible to grow large quantities of this plant. The bush is of spreading habit, growing to even, well branched bush form. The berries are extra large, oval, greenish yellow when ripe, and will get sweet, of fine quality for raw eating or canning. It is hardy wherever gooseberries can be grown. For special restrictions on Gooseberries see page 15. Place your order early so I can reserve your plants. 50c each; 3 for \$1.35; 10 for \$4.00; postpaid.

Peach-Cot A Combination Apricot and Peach

This is a new fruit, smooth like the Russian Apricot, and large; the size of budded Peaches. The flavor is a most extraordinary blend of the finest of the Peach qualities, and the richness of the Apricot. The tree originated in Colorado, and is hardy in the Middle West. In home orchards and in commercial plantings I suggest that at least a few of this new variety are included. It will be something entirely new on the market, and for home use it will be a fruit you could not buy. 2 to 3 ft. nice trees, 60c each; 3 for \$1.65. 3 to 4 ft. branched trees, 80c each; 3 for \$2.25; postpaid.

For budded Peaches see page 10, and budded Apricote page 9. Special low prices on No. 1 stock of Apricot seedlings for quick results in windbreak rows, see page 9.

The New Hansen Bush Cherry

I sold this variety for the first time last year; the original stock that is true to name, and I have the same stock again for 1938. This bush came through the dry summer in fine shape, and resisted drought as well as insects. It makes a pretty hedge, foundation planting, or border for taller plantings such as windbreaks where it serves as a snow-trap. The fruit is of the sand-cherry type, almost as large as the native plums with very small pit, and can be used for preserves. They are easy to start, and will grow to a height of 5 ft., can be kept lower by shearing if they are planted for a low hedge. The Bush Cherry blooms beautifully in the spring, at that time it would rank with the prettiest of white flowering shrubs. I advise you to plant a number of these true Hansen Bush Cherries, you will like them. Nice plants, 3 for 25c; 10 for 55c; 25 for \$1.10; 100 for \$3.80; postpaid.

CHINESE ELM, the hardy strain, Ulmus Pumilla

For windbreak planting use my special grade of 18 to 24 inch seedlings, clean, healthy, well rooted, easy to plant and easy to grow, will make a surprisingly rapid growth. To help all my customers who are land owners restock timber that is so much needed in the Middle West I am offering these special size seedlings at \$2.10 per 100; 300 for \$5.00, prepaid to your door. For smaller and lower priced sizes, and for forest trees seedlings of many sorts see pages 20 and 21. Also makes a shade tree for quick results. Note pages 22 and 23 for choice selected specimens of Chinese Elms for ornamental and shade tree planting.

What The New Sonderegger Garden Book Contains

Fruit trees and high class fruit producing grapes and berry plants. This part of the book is by Charles Sonderegger, the oldest member of the House of Sonderegger and its president. You can safely follow his planting instructions, and make your selection according to his descriptions.

Shade and ornamental trees, shrubs, plants and bulbs are being described for you by Fred Sonderegger. Whenever you wish to have additional information concerning the care of trees or plants, Fred will be happy to have you write him.

Wherever the advice of a designer was needed we were fortunate in having Leo Sondereger, a landscape architect of outstanding reputation. His thorough knowledge of proper application of trees and shrubs has been partly included in this book, Leo's work being the creation of better parks, better harmony in planting. Special planting plans, individually made and designed for your purposes can be made for you by Leo. If you are interested in this special artist service kindly write, stating size of your grounds, and Leo will make you a price for the plan complete.

Seeds of vegetables and flowers have received special attention. This department is in the hands of Ernest and Arthur Sonderegger. Beginning with page 50 of this book you will find not only descriptions of vegetables but a most complete assortment of seeds of all kinds. Sonderegger customers everywhere know that rare seeds, special seed varieties, in short, everything in seeds that is not found elsewhere—Sonderegger has it. This is just one more reason why you will like this book once you have studied it.

Sonderegger never stands still. The men behind this name come from the hard school of the late Carl Sonderegger, the Midwest's outstanding nurseryman. Better trees, better plants, better seeds, and better service is the Sonderegger motto. We use up-to-date equipment in the production of our stock. We take advantage of everything modern science discovers in the interest of growing and breeding better planting stock. We test novelties carefully, and from the good we select the best. Buy under the name of Sonderegger, it is your protection.

Hour GARDEN BOOK for 1938

FRUITS...FLOWERS VEGETABLES 7ells You

- ★ WHAT TO PLANT
- ★ WHEN AND HOW
- ★ TO PLANT

This book is the 52nd annual garden book by Sonderegger. It has been made up entirely new, in design as well as in descriptions. We have carefully selected true-to-life photos showing how fruit or trees or plants will look in your garden. We used pictures of fruit and plants that were grown by amateurs rather than by experts.

Descriptions and planting instructions were written new. As we wrote them we pictured you here with us giving us the opportunity to give you whatever advice we can from our own actual experience as well as from the things we have learned from others. We want you to have planting material that does well with you, and that gives you the most for your investment. You find no exaggerations in this book, you can make your selection from our descriptions as good as an expert nurseryman could make it for you.

In the matter of quality we need only lay our cards on the table face up, and you will see for yourself that poor quality would put us out of business within less than a year. On the other hand it has been good quality that enabled us to stay in business for over 50 years. Our cards are: an extremely low expenditure for advertising. We keep our customers by furnishing them a good product—instead of looking for new customers at high advertising cost. We get new customers through the good will of satisfied patrons. If we would fail in keeping our customers we would also fail in getting new customers, because our card of low advertising expense would not help us out in keeping our business going.

Service is next to quality, and that also must be good for exactly the same reasons. Every one of our help knows that his bread and butter does not come from us, but that theirs as well as our own comes from you—from our customers. So we all realize who is the true boss, and who must be satisfied in order to have another pay check coming—the customer. Service, good honest service, extreme care in handling the stock, assembling the orders, packing the goods for shipping, and observing your instructions to the point—that is what we wrap around choice quality, and that is what you get.

We appreciate your patronage.

Yours for "Trees and Seeds That Grow,"

Sonderegger Quality...

For over half a century, the highest standard.

Sonderegger Terms...

The most liberal, fairest and reasonable.

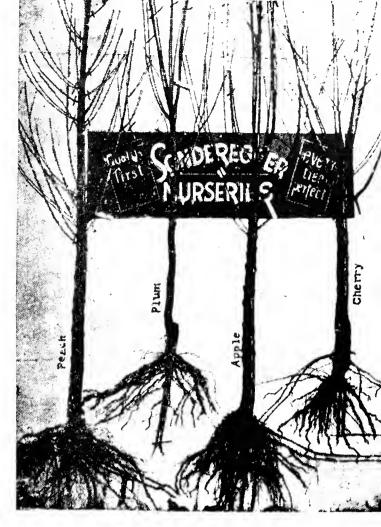

Sonderegger Prices...

On a grower-to-planter basis. No middleman profit.

Freight paid on all orders containing trees or plants in the amount of \$15.00 or more. Evergreen Trees and Seeds not included.

All articles quoted in this book postpaid will come to your door all charges paid by me. Trees too large to go by parcel post will come by freight or express. The prices of such trees do not include the cost of transportation. However, if your order amounts to \$15.00 or more (Seeds or Evergreens not included) I pay the freight to your nearest railroad station.

Guarantee All shipments are guaranteed to reach you in first class condition. Replacements are furnished free if a tree or shrub is not in satisfactory condition upon arrival, and if you notify me promptly. Stock that dies during the first growing season is replaced at one-half of the regular price. Claims, however, must reach me before October 1, 1938.

Stock True to Name All Sonderegger trees and plants are carefully labeled, and are true to name. However, if there should ever be an error found in the filling of an order, any tree or plant that is not true to name shall be replaced without any cost to the customer, or refund of purchase price shall be made. Claims to be sent in within 6 years from date of delivery. A stronger guarantee than most nurseries put out.

Remittances Money orders and bank drafts are absolutely safe to mail in a letter. Personal checks from any of our friends and customers are also accepted. Cash should be sent by registered letters only; it is not safe to send cash in ordinary letters. When the remittance is not sent in with the order, and instead the amount is to be collected on delivery (C. O. D.) one-half of the total of the order should accompany the order as a down payment. C. O. D. shipments are seldom requested; it is an expensive way of making remittances, and often causes a little delay in the delivery of live trees or plants.

Prices This garden book and the prices therein quoted cancel all former price lists or quotations. All prices quoted in this book are subject to change without notice after June 1, 1938.

Fall Delivery Most varieties of trees, plants and seeds can also be furnished in the fall. Prices in the fall depend entirely on general conditions, and especially on the growing season. Wherever possible I shall endeavor to furnish stock in the fall without advance in prices. The indications are, however, that all prices will be higher next fall, for fall delivery kindly ask for special quotation in September, stating number, variety and sizes of stock you wish. It would be my advice that you take advantage of the present low prices by buying and planting this spring.

References Anyone who has never dealt with us before may receive reliable information concerning the Sonderegger Nurseries and Seedhouse from any of the following institutions: First National Bank, Beatrice, Nebraska; Beatrice National Bank, Beatrice, Nebraska.

Certificate of Inspection

Our growing fields and packing departments are inspected according to the laws of this state by the Department of Agriculture at regular intervals and a copy of the certificate of inspection accompanies each and every shipment. We comply with the laws of every state, having licenses to furnish you stock no matter where you live. The only exceptions are that if there exists a Gooseberry or Currant Quarantine in your state, such plants could not be sent to you. We guarantee our stock to pass your state inspection.

Sonderegger Quality Here are just a few of the trees we grow and furnish, showing the perfect root system and good development of the tops. We give you good grades in any size you may order. For more than 50 years Sonderegger stock has been known all over the United States, and in foreign countries. The name Sonderegger alone stands for clean, healthy, well rooted stock, a safe and powerful guarantee, and also stands for stock that is hardy, upland grown. The small marks shown in the branches of the trees pictured above show how to prune these trees at planting time.

Foreign Trade All my customers in Mexico, Panama, should add 14c per pound to the price of the stock for extra postage. To Canada seeds only can be shlpped. On all shlpments to foreign countries we pack with special care. However, arrival in good condition cannot be guaranteed.

10% Premium on Club Orders When several neighbors club together and send in a combined order, we send along a premium, customer's choice, selected from this book. The premium to be worth 10% of the order total.

Win a Prize in Sonderegger's Photo Contest

This contest is open to every Sonderegger customer. Send In snapshots of any tree or plant that you grew from our stock. Write the age of tree or plant and how you like it. Contest closes in October, the prices are mailed out in January.

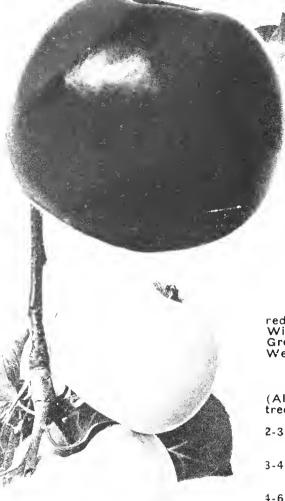

1st Prize......\$5.00 2nd Prize.....\$3.00 3rd Prize.....\$2.00

Twelve other prizes of \$1.00 each. Our contest for 1937 closed with many entries. Practically every one was awarded a prize, owing to the fact that there were many ties. Prizes are being mailed out January, 1938. At this time I wish to thank every participant in the 1937 contest. All my customers are cordially invited to join again in my 1938 contest open now, and closing in October.

Disclaimer on Seeds I exercise great care to keep all seeds properly labeled, clean, and pure. However, I am compelled to make all seed sales under the following disclaimer: The Sonderegger Nurserles & Seedhouse give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds they sell, and will not be responsible for the crop. Every reputable seed house is using this same disclaimer.

= PLANTING INSTRUCTIONS

On most pages of this book, In this space, you find an Item of Planting Instructions. Read it carefully. We have sacrificed considerable space in this book to bring you these instructions from our own experience. These same spaces could have been used for profitable "Sales Talk." Descriptions throughout this book are free from exaggerations. All the actual sales talk we wish to put in this book is the following: Plant more trees, more shrubs; grow your own fruit and vegetables. Beautify your home and surroundings with trees and flowers. All these improvements are things that make life better and happier. We shall home and surroundings with trees and flowers. All these improvements are things that make life better and happier. We shall appreciate your patronage. We give you good stock, good service, and favorable prices; low prices if you take quality into consideration.

WINTER

APPLES

Ripen late and keep well, most of them keep until spring. The following are the choicest, and most popular varieties:

Arkansas Black I reconthis apple for Arkansas, Oklahoma and north to the southern part of Nebraska. Fruit medium to large, covered with dark red, sometimes almost black. The flesh is almost orange yellow. Keeps extra well; when picked hard-ripe this apple will keep as long as the following July. Ripens middle of October. Can furnish 2 to 3 and 3 to 4 ft. trees of this variety, no larger size

Winter Banana Chomes from Michigan; a hardy tree. Most productive and bears quite young. Rich in flavor, spicy and aromatic; flesh yellow, firm and juicy. Color a golden yellow; very attractive, and a good keeper. The vigorous healthy growth of this tree, its extra large leaves would even make it a desirable shade tree on the lawn. I recommend this apple for the Middle West, but not north of Nebraska. Ripens October 1.

Ben Davis For pies, haking and cooking this apple is one of the very best. It is also an excellent keeper, one of the oldest apples in the Middle West. Ripens middle of October. Very hardy.

Plant Apple trees 30 by 30 feet apart, or plant them 35 by 35 feet apart and plant a filler tree between each two apple trees. For filler trees, plant Plums, Sour Cherry, Dwarf Pear or Peach. These trees give you an early income from your plantings, and can be removed in later years when the apples require the entire space.

Pictures on Pages 4 and 5

reduced to one-half natural size, Grimes Golden, Winesap, branch of Whitney Crab, Northwestern Greening, branch of Dolgo apples, Delicious and Wealthy.

Prices of Apple Trees

(All varieties except those quoted at 15c extra per tree.)

2-3 ft. 2-year roots, 1-year tops, well rooted, partly branched, postpaid..\$0.38 1.00 3.20 7.50 3-4 ft. selected No. 1 trees, well rooted and

branched, postpaid....
4-6 ft. extra heavy trees, splendid roots and good crowns; in size and quality the best

and quality the best trees that can be had .72 2.00 6.50 15.00 My 4 to 6 ft. grade is too large to be sent by parcel post. I furnish you these trees freight prepaid if your order amounts to \$15.00 or more (Evergreens and seeds not included).

Black Ben Davis In quality about the same as the old fashioned Ben Davis, also in hardiness, productiveness, and in its excellent keeping quality; however, Black Ben Davis colors up much better. Preferred by the market growers. Ripens middle of October.

Delicious, Yellow An apple of medium size, golden yellow. Possesses a rich flavor, resembling that of pears, quite sweet. It is one of the finest table apples you can get. Perfectly hardy here, and most anywhere in the Middle West; bears young. Ripens first week in October. Add 15c per tree to prices quoted above.

Delicious, Double Red The illustration on upper right hand corner of page 5 shows the dark color of this apple, and this photo is just one-half of the apple's natural size. Delicious is the best paying apple on the market, and in this improved double red strain the special dark red color develops early in the ripening season, and evenly, covering the entire apple. Due to this fact the apple can be picked while still perfectly hard, and having its extra fine color. Hard-ripe picking makes this apple the longest keeper of any. Ripens October 10. Hardy in the Middle West, and the tree is a vigorous grower.

Golden Winesap This tree bears quite hardy. The fruit is very large, golden yellow with red cheek, ripens first of October, and is one of the finest keepers. Due to its very rich flavor it is one of the very best cooking and baking apples. For quick results, and a fine apple for your home as well as the market I recommend Golden Winesap.

Grimes Golden Contains practically no acid. Combines a rich aromatic flavor with an attractive golden vellow color, and a long season of usefulness. It is one of the oldest apples in America, and still one of the very best. The tree is healthy, a good grower, and bears well, but should be pruned annually as it is inclined to grow bushy. Do not plant it north of the middle of Nebraska. Ripens and of September.

red. Yellow, covered with red. very similar to the old Janet or Geneton but better in quality. It is of medium size, and keeps well in ordinary cellars until spring. A very hardy tree. Ripens middle of October.

PPLES

-Jonathan For flavor, juiciness, in fact for a good eating apple I cannot name you a better apple than the old fashioned Jonathan. It is an apple of medium size, the tree is hardy up to the middle of Nebraska, and bears well. It keeps until about January in ordinary cellars. Ripens end of September. Except in the extreme North where it would not be hardy, a few Jonathans should be in every home orchard.

King David Blooms very late in the spring. Very productive, considered one of the best for shipping. Medium size, and highly colored red. Looks much like the old fashioned Jonathan, not quite as good in quality, but keeps much better. Exceptionally good for Nebraska and Kansas. Can furnish 2 to 3 and 3 to 4 ft. trees of King David, no larger sizes.

Lady Jonathan Originated in Central Nebraska, it is a little hardier than the old fashioned Jonathan. It is superior to the latter in its keeping quality, and the apples will average a little larger in size. Ripens October 1. Supply in this tree is limited, and I have only 2 to 3 and 3 to 4 ft. sizes of Lady Jonathan.

MacIntosh Red A sport of the old S n o w Apple. Originated in Canada.. In Wyoming, Idaho, Montana and high altitudes of New Mexico my customers favor this tree, and for years I have recommended it for these states, and wherever you need an extra hardy apple this variety will please you. Bears well, and the fruit is of fair quality. Ripens middle of October.

Mammoth Black Twig (Para-gon.) A Russian apple, one of the very best for the Middle West. A good bearer, and the tree is perfectly hardy up to South Dakota line. Large, dark red, firm, subacid and juicy, keeps well in common cellars. You will find this apple highly satisfactory, and I urge you to plant more of this variety. Ripens middle of October.

Paradise Winter Sweet Large, white with rosy cheek. One of the best of the Sweet Apples. People who cannot eat apples due to the acid can safely eat Paradise Winter Sweet as well as Grimes Golden. Paradise Winter Sweet contains the least amount of acid, and keeps well. The tree is very hardy, and bears well. Ripens in October.

= PLANTING INSTRUCTIONS =

When you receive a bale or package of trees or shrubs from me, open it as soon as possible. Check over the items. In case of any defect notify me at once, a card will do. Remember, I guarantee safe delivery of the stock I ship out, and your notice of any defect will receive my prompt attention. If the shipment arrives by freight or express the station agent will give you a bad order report if there is anything defective on the shipment. Such a report will help me recover damages if shipment was damaged while in transit.

Northwestern Greening Picture on top this page shows apple one-half nat-ural size. Extremely hardy, vigorous grower; does well most anywhere, espe-cially in the North and Northwest where few apples of such high quality grow successfully. Keeps well, fruit is large, greenish yellow when ripe. One of the best for baking. Restaurants pay premium prices for them. Ripens middle of October

Stayman's Winesap ${\rm A}$ popular market apple, very large, striped dark red, keeps well, and is in strong demand for cooking. Ripens in October.

Turley Winesap Bears even heavier than the old fashioned Winesap, darker color, improved quality, highly flavored; keeps well until mid-winter; is considerably larger than Winesap. Price is 10c per tree in addition to the price of other apples as quoted

- Old-Fashioned Winesap

A good tree for home orchard. Apples little too small for market; quality is good, keeps well. Dark red. Tree bears heavy, perfectly hardy in the Middle West. Ripens middle of October.

York Imperial (Johnson's Fine Winter Y. I.) This old-fashioned apple is rapidly coming back to popularity. It is a large red apple, tender and juicy. Perfectly hardy in the Middle West, also Southern Minnesota and Wisconsin. I recommend a combination planting of York Imperial and Stayman's Winesap for extra heavy bearing. Ripens first week in October.

ODD and SPECIAL **VARIETIES**

I have a number of trees in popular sizes of the following varieties: Franz, Switzerland, Spitzenberg, Virginia Beauty, Missouri Pippin. If you wish to have trees of these varieties, kindly send me your order early, so they will be reserved for you. My supply is limited, prices same as quoted for other apple varieties.

Red June An old fashioned early apple. Have small supply of trees on hand; order early and reserve your Red June apples. Ripens with Yellow Transparent; medium size, yellow with red stripe.

Ripening between early apples and late (winter) apples, they keep fairly good, and in the extreme North where late apples would not mature, these fall apples localities will make very good keepers. They furnish fruit after the early apples are used up, and before the late varieties commence to ripen.

Anoka A nice apple of fairly good size, yellow with red stripes. Ripens end of August, and makes a nice apple for the North. Not a new apple. For a good many years I have grown this sort for special orders, and recently, due to increased demand, I have grown more of them. Add 10c per tree to the prices quoted for apples.

Wealthy This apple does well most anywhere, can safely be planted in the North also. It is a great bearer, in fact few varieties are so hardy and so productive. A good apple for eating, cooking, drying or pies; large, mostly covered with red, fine grained and juicy. Without this good apple your orchard is not complete. I recommend it knowing not complete. I recommend it, knowing how pleased you will be with your Wealthy apple. Ripens in September.

Maiden Blush A standard market apple, good in size and quality. Its nice appearance helps to sell it. Ripens in September.

EARLY APPLES

Early apples are hardy anywhere, and they bear extra well. Due to the fact that they cannot be kept very long after ripening, they should be planted in small numbers only, unless there is a large city nearby where early apples would find a good and profitable sale.

Duchess of Oldenburg to large in size, greenish yellow with red stripes. Bears heavily. It is a little sour, and on that account an excellent apple for cooking. The tree is a wonderful grower, making a large crown, with a heavy foliage. If vou would need a combination fruit and shade tree this apple would do well, and for that purpose I recommend the 4 to 6 ft. size for planting.

Early Harvest The first apple to ripen; with us here usually about July 4. On the farm my father counted this apple and Alexander Early Peaches to be the earliest of the large fruit trees. You must grow these trees yourself to appreciate fruit of such quality and so early in the summer.

Yellow Transparent Ripens a few days after Early Harvest. It is of pale yellow color and larger than the Early Harvest. Flesh white, of finest quality. The tree hears very young, and is perfectly hardy. This is one of the finest early fruits that can be grown in any locality.

for Canning and Telly

Dolgo

The Dark Red Jelly Crab. The high quality of this beau-

of this beautiful red crab apple, the abundance in which they are produced, and the hardiness of the tree will satisfy you in every respect. For the finest jelly use Dolgo Crab apples. The tree bears young, and grows well. If you plant the 4 to 6 ft. trees you can grow Dolgo into a very pretty shade and ornamental tree on the lawn or wherever you like to have a tree of good appearance. Dolgo is hardy everywhere, and will supply you with its wonderful fruit for many years.

Whitney THE SWEET CRAB. The apple is of good size: I would say on the average as large as the old fashioned Winesaps. It is green with red stripes, good for raw eating and for cooking. In the North this is considered a very good summer apple. For years my brother Fred has a Whitney Crab on his lawn where it takes the place of a very good shade tree, and bears well most e v e r y year. Whitney, Dolgo Crab, Duchess Apple, the Superb Apricot all make very good shade trees, and it seems to me that at this time when so many old shade trees must be replanted it would be well to include a few of these trees for shade as well as fruit for planting around the home. Especially on the farm such trees would be of great value, and if you select the large size, 4 to 6 ft. trees, you will have no difficulty growing them to nice shade tree shape.

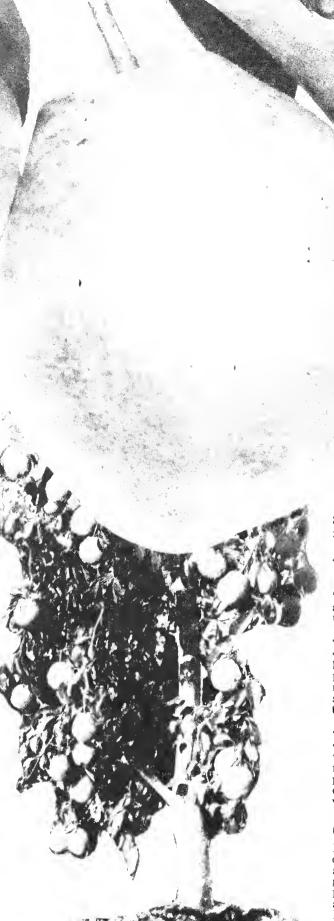

Yellow Siberian The apple is quite small, comes in clusters, and is canned with the stems. The tree is rerfectly hardy, and same as the above varieties it is a vigorous grower, making a well shaped, pretty tree. I urge you to plant more of these Crab Apple trees, especially where they can take the place of an ornamental and shade tree. There are few forest or shade trees that would be more valuable in years to come for their shade as these Crab Apples, and of the latter you are sure to get nice crops of fruit. For home use as well as market Crab Apples are quite valuable. My advice is that you plant more of them.

= PLANTING INSTRUCTIONS ===

Sometimes an item is short in the shipment, and a back order has been made, in that case there will be a notice in the bale. Right after unpacking put the roots off your trees and shrubs into a tub or tank of cold water over night. This freshens the roots up, and protects them from wind and sun. While trees are taken out to plant the roots should be protected at all times either by wrapping them in wet burlap, or still better by dipping the roots into a paste of soil and water. This keeps the wind and sun from the roots, until they are in the ground and planted.

(continued on next page.)

Duchess of Angouleme The Gruit is large, in quality as good as the best, for keeping, for table use, or for canning. For the Middle West and the East, Duchess should be in every orchard; very hardy, an abundant bearer, and a very fine pear. Ripens in October. Note picture above: the tree with its usual heavy load; and in upper left hand corner photo of the fruit, natural size.

Prices, All Varieties

2-3 ft. nice trees, postpaid \$0.55 \$1.50 \$4.80

4-6 ft. 3-year roots, 2-year tops, very fine, selected specimens...

.85 2.40 7.50

These pear trees are all well rooted, guaranteed true to name, strictly first class trees, hardy upland grown.

Bartlett—Early The pear that is first on the market, ripening end of July and August. A pear of fine quality for eating and canning, and the tree is hardy in the eastern states, the corn belt, and of course in the South the South.

Bosc Winter Pear Finest quality winter pear; extra large, long tapering, russet. Keeps well. Tree vigorous, and profuse bearer. Hardy anywhere in Middle West and East. Plant more of this wonderful fruit.

Clapp's Favorite Early. It is hardier than n Bartlett, does well in the northern part of this state, Iowa, Minnesota, Wisconsin and the Northeast. Tree is a good grower, and very productive. Fruit large, pale yellow with dull red and russet specks, fine grained, juicy and sweet. Ripens in August.

Flemish Beauty Midseason. Large, pale yellow pear covered with russet, of fine quality, sweet and melting. Tree hardy anywhere in the Middle West, East and Northeast. Ripens in September.

Lincoln Rapidly becoming popular owing to its very good qualities. It is a large pear, yellow, flushed with bright red; fine for table use or canning. Hardy in Nebraska, anywhere in the corn belt, and the East. Your pear planting should include this tree.

Seckel Pear

See photo above. Also called Sugar Pear. Fruit is not very large, but is of finest flavor, as good as the best for table use, and for

table use, and for this purpose Seckel should be in every orchard. I do not recommend it for canning. Tree is a slow grower, but bears extra well, and is hardy. Can be grown wherever pears are known to succeed. Seckel ripens here in September.

Kieffer The popular late market pear, for canning. A hardy, heavy producer, that can be grown anywhere, even in the North where other pears would not be sufficiently hardy. For fresh eating the quality of Kieffer is not as good as that of the other sorts listed here, but for canning it is as good as any. For this purpose the pears are ground up and canned with lemon, orange, or quince for flavoring. You may try this method; I am sure you will like them, and find canning very simple.

DWARF PEARS

Of the pear varieties I am listing on this page, I can furnish Bartlett, Duchess of Angouleme, Seckel, in dwarf trees also. Of all other varieties I have the standard trees only.
There is no difference in the fruit, wheth-

There is no difference in the fruit, whether it is grown on the standard tree, which is a large tree, or a dwarf tree, which always stays in dwarf size and shape. The fruit is the same. Dwarf pears are preferred wherever the space is limited—in city gardens where they are grown along the lot line, or even as a screen. For this purpose they can be planted as close together as 10 or 12 feet in the row. Dwarf pears bear quite young, commonly the second or third year after planting they produce a nice crop, and continue for many years. The trees are just as hardy as standard trees, they are grown with splendid success everywhere in the corn belt, the East, and Northeast, in southern orchards, and even in the extreme North, where a dwarf tree in protected places succeeds while a standard tree would not fit in to get the benefit of existing protection. Prices of Dwarf Pear Trees: 2½ to 4 ft. trees, 75c each; 3 for \$2.00; 10 for \$6.00; prepaid.

As I was making out my order to send to you this morning, my mother made the remark that she had been raised on your

remark that she had been raised on your seeds and plants.
Way back before her day, grandmother used to get your seeds and plants. Then, when mother and dad came along, they started our ranch in the state of Washington, on your fruit trees. Now am sending my first order to you. This makes three generations of our family that are satisfied users of your products.

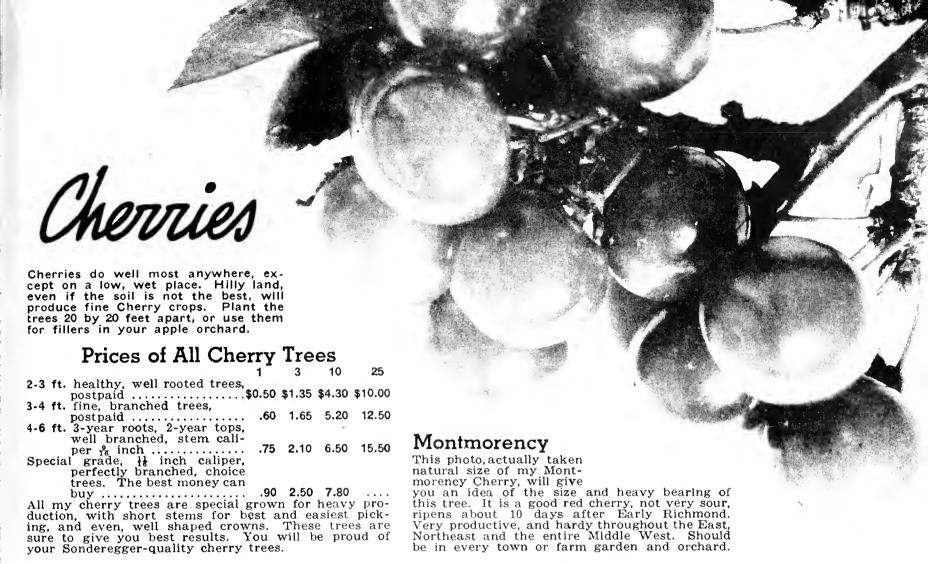

MISS CHARLOTTE OLLEMAN, Maywood, Ill.

Maywood, III.

== PLANTING INSTRUCTIONS ==

Before planting the tree or shrub, let us be sure the hole is prepared properly. It should be plenty wide and deep. This is essential to good starting and good growth. With "plenty wide and deep" I mean just this: there should be 4 or 5 inches of loose soil in the bottom of the hole before the roots of the tree are put in place, and there should be 5 or 6 inches clearance all around the roots, to be filled in with loose soil. To dig a hole that is just a snug fit for the roots would probably do, but it is not the proper way to plant. The new roots will develop much better in the loose soil, which naturally means quicker starting and a good, clean new growth.

(Continued on next page.)

SOUR CHERRIES

Very hardy, always sure to bear.

Early Richmond May Cherry. The common medium red cherry, highly productive, and very hardy. Quality is good for pies and canning. An excellent tree for the Midwest and the North, bears regularly. Ripens in June.

English Morello Large fruit, very dark red, nearly black; tender, juicy, rich in flavor, and ripens rather late, quite sour. Hardy up to the middle of Nebraska and Iowa. Tree is of spreading form.

May Duke Dark red, large fruited, juicy and rich; not very sour. Tree grows well, spreads low. A good bearer. Of May Duke, I have the two large sizes only, no 2 to 3 and 3 to 4 ft. trees.

Ostheimer Large, heart shaped, nearly black when ripe, juicy and rich. Fine for dessert and cooking, not very sour. A great market cherry. Bears quite young. The trees bloom late, and ripen when cherries begin to get scarce, middle of July.

Wragg For the West and Northwest, and Northwest, and of fine quality, almost like English Morello. Tree is very hardy, a good grower, and highly productive. For western Kansas, Colorado and western Nebraska, it is one of the best cherries. Ripens in July.

Improved Montmorency

Originated by Mr. Fred Pothast of Pick-Originated by Mr. Fred Pothast of Pickrell, Nebraska. Our trees are grown from budding stock of Mr. Pothast's original tree that has produced wonderful crops for over 25 years. Hardy in Nebraska, fruit even larger than that of the Montmorency, and decidedly darker in color. An exceptionally good bearer. Add 10c per tree to the prices quoted for cherry trees. trees.

SWEET CHERRIES

Not hardy in the northern states.

Black Tartarian Very large fruit of purplish black color. This is a Heart Cherry, very sweet, of superb quality. The tree is a vigorous, upright grower, immense bearer. A napular market charge. er. A popular market cherry. I recom-mend it for the South, the Pacific states, also the Great Lakes region and the New England states. In the Middle West they are not dependably hardy, although they are grown here and there in protected places with fairly good results. A great cherry in its proper place. Ripens forepart of July.

Yellow Glass Fruit large, someshape, of very beautiful golden color, firm, juicy, sweet and of fine quality. This is not a Heart Cherry, and is therefore hardier than Black Tartarian. It stood our dry summers and cold winters with fairly good results. I can recommend the tree for localities as far north as the southern half of Nebraska. as the southern half of Nebraska. Blooms late. I suggest pinching off the tips of the young branches in July to encourage branching and a dense growth for best bearing. Ripens July 1.

Sonderegger's Sweet Cherry

The tree looks almost like the Black Tartarian, but the fruit is more of the Morello type. It is not a Heart Cherry. Almost black when fully ripe; large, very meaty, sweet and juicy. The tree is perfectly hardy here, bears well, its growth is upright and vigorous with large leaves. I recommend this tree for the Middle West, except the extreme North of Nebraska, where it may not fruit regularly. Add 15c per tree to prices quoted above.

Hansen's New Bush Cherry

My original stock is of the true production by Professor Hansen of Brookings, South Dakota. A greatly improved Sand Cherry. The fruit is fair in quality and recommended for canning (preserves), of good size, small plt, very dark red. Makes a very good hedge, as It grows in low bush form, and due to the fact that it resists extreme drought and cold remarkably well, resists insects the New Hanably well, resists Insects the New Hansen's Bush Cherry is a most important and most needed addition to the shrub list for the Mlddle West. Use them freely for hedging, for foundation planting, anywhere for a good, clean hedge of 3 to 4 ft. height, that will also give you fruit that can be used to good advantage. 3 for 25c; 10 for 55c; 100 for \$3.80; prepald.

Compass Cherry Plum ${}^{\text{To pro-}}_{\text{d u c e}}$

fruit quickly where old orchards and bearing trees have died out In recent years, I know of no better tree than this Compass Cherry Plum. Not only does it commence to bear the second year, it produces enormous quantities of fruit, and the fruit is of good size, good quality for raw eating, preserves, canning, etc. See front inside cover page for true-to-life colored photo. The tree is of dwarf habit, can be planted as close together as 10 or 12 feet. It is extremly hardy. Where regular cherries do not succeed, the Compass Cherry Plum will still produce and do good. Plant a few of these trees this year, for your benefit, and to help you bring back fruit quickly, I am pricing them very low.

Each 3 for 10 for	2-3 ft. \$0.28 .75 2.20	3-4 ft. \$0.38 1.00 2.90	4-5 ft. \$0.45 1.25 3.75	5-6 ft. \$0.60 1.50 4.50

= PLANTING INSTRUCTIONS =

Never use fertilizer of any kind to mix with the soil when you plant a tree or shrub. Fertilizer heats, and is often harmful to the roots. Some planters put manure in the bottom of the holes, although I do not recommend this practice; if it is to be done, be sure to have at least 6 inches of dirt on top of the manure before planting the tree, so that the manure will be well rotted before the new roots may reach it. If there is a rock or gumbo shelf in the subsoil near the surface, such an unpenetrable layer should be cut or bored through to allow roots and moisture to enter the subsoil.

Sonderegger's Japanese

Plum The above picture shows you the shape and the good size of these Plums. It is not only the finest of all Japanese Plums I have ever found, fortunately it is also the hardiest of this strain. I recommend it for Nebraska and Iowa, the states south of here, the Great Lakes region and the Eastern States. In fact, most anywhere except the extreme North it will give best satisfaction. Large, red with small pit, flesh yellow, excellent flavor. Very good table and canning plum. Will come into bearing almost as young as the Hansen Plums, and bears just as heavy. Be sure to include this plum in your planting. No extra cost.

Burbank, Japanese Bright cher-lilac bloom, yellow flesh, quite firm, sweet and meaty. Hardy as far north as the southern half of Nebraska. A good free-stone plum. Ripens here in August.

Omaha Native Fruit dark red with small pit, sweet, well flavored. The tree is exceptionally hardy; will do well even in the extreme North. Omaha is a sure and heavy bearer.

Golden Rod, Native The finest hardy yellow plum, sweet and tender with very good flavor. Bears young and freely.

Hanska Bright red, heavy blue bloom, firm flesh, which has a very pleasing Apricot flavor. Being a Hansen Plum it is very hardy; bears young and heavy. **Sαpα** Glossy dark purple, flesh is of the same color, and is of excellent quality. Bears young and very heavy.

Opata The earliest of the Hansen Plums. Dark purplish red with green flesh, and very pleasant flavor. Ripens end of July. On top of this page, note the branch taken from Opata, a sample of the bearing ability of Hansen pleasant flavor. ple of the bearing ability of Hansen Plums, such as Opata, Sapa, Hanska, etc.

and most freely.

Tokata For a number of years I have not grown this tree; have taken it up again on request of many of my customers who desire to plant more of this variety. Fruit good size, dark red, slightly mottled with orange dots, and covered with light lilac bloom. Flesh rich orange red, very firm, excellent flavor, almost freestone. Ripens here end of July. Very hardy.

Monitor, Minnesota Plum

Should be in every planting. Much different from any other plum, being of medium size, dark purple with sweet flesh of dark purple color and small pit. Very good quality; very desirable for canning. Hardy anywhere.

Red Wing, Minnesota Plum

Yellow, overlaid with red; freestone; sweet, and of good quality. For raw eating or prepared like peaches with cream and sugar. An abundant bearer, and perfectly hardy.

EUROPEAN PLUMS Prices of All Varieties Listed Below

Lombard The hardiest of the European Plums, and does well in light soil. Can be planted as far north as the middle of Nebraska, and bears well here. Fruit oval, viblet red, with a yellow, juicy flesh; freestone. Ripens here end of August.

Yellow Egg Fruit very large, prune shaped, yellow with white dots, making it an attractive table variety; also good for cooking. I cannot recommend it for the Middle West; southern half of Kansas, southern Missouri and Indiana should be the limit of its hardiness. Ripens end of August.

Shropshire Damson The small son; well known, and in great favor for plum preserves and plum butter. The tree bears heavily, and it is dependably hardy up to and including the southern half of Nebraska. Deserves a place in every garden of orchard every garden or orchard.

German Prune A large, oval, purstone. Flesh sweet and of pleasant flavor. It is firm, very good for drying or preserving. This tree is not hardy north of here, but is much hardier than the Italian prune (Fellenbergs), which it resembles closely in size and quality.

I am writing you this letter to let you know that your trees did wonderful for us. Such wonderful peaches, apples and pears as we had are something to feel proud of, some of our pears welgh over a pound each. I want to tell you your trees do wonders here in Texas for us. Our friends ask us: "Where did you get those trees that bear such fruit"; and we gladly tell them that they are Sonderegger trees.

Burnet County, Texas.

= PLANTING INSTRUCTIONS :

In planting, proceed as follows: Place the tree or shrub in the hole, with all roots spread out in their natural way. Any broken root-branches are cut off smooth with a sharp knife. The thing to watch now is the proper depth. A fruit tree shows plainly just above the root where it was budded or grafted. This spot should be practically level with the ground surface after planting. A shade tree or a shrub is planted so deep that it stands (depending on the size of the stock you are planting) from 1 to 3 inches deeper than grown before in the nursery. Some planters lay a board across the hole to show the ground level, to assure of getting the trees in just at the right depth. (Continued on next page.)

Your special attention is called to Apricots, not only for their most valuable fruit, but particularly for their vigorous growth, beautiful foliage, drought resistance, which combined would make the Apricot a most desirable shade and ornamental tree. For this purpose increased numbers of Superb Apricots are being planted, and I urge you to give Superb Apricot your consideration if you need a number of shade trees around your home. Include at least one or two of these fine trees in your shade tree planting.

Prices of All Budded Apricots

1 3 10 25 .\$0.35 \$0.95 \$3.00 \$ 7.00 .50

Superb, the greatest of all hardy Apricots Freestone, color, large, flavor excellent. The fruit of this tree is as good as the best. The tree: a most abundant bearer, perfectly hardy except in the extreme North. It is a rapid grower that develops a pretty spreading crown with a beautiful, healthy foliage; on this account it is being planted in larger numbers than ever before as a shade tree. In some localities (Western Kansas and elsewhere) it is one of the very few trees that survived the drought. I am pricing the trees low, so that all my customers can take advantage of this wonderful tree.

Chinese Apricot Similar to Superb, except that I can hardly recommend it for planting north of Nebraska. The fruit is pale yellow with a red cheek. I recommend it for shade and fruit same

Moorpark, American Apricot Freestone, very large, yellowish-green with red on sunny side. This is one of the best market varieties; excellent for drying and canning. Not hardy north of southern Kansas and Missouri.

Wilson, American Apricot Resembles Moorpark very closely, exabout the middle of June. A most profitable market fruit for the South.

RUSSIAN APRICOT SEEDLINGS

These trees are not budded, the fruit varies from the fine large size of Superb, to a rather small grade, but even the smallest will be of fair enough quality to use for canning. These Seedling Apricots are generally used for shade trees and in windbreak plantings. They grow most rapidly, being exceptionally hardy and drought resistant. There are few other trees that could be expected to give such good results. I have nice trees on hand, and I am pricing them very low. Plant some Apricot Seedlings this spring, or if you wish to invest a little more, plant a few Superb Apricots also, for shade trees or shelter-belt. These trees will soon be everybody's pets on your place. "You cannot help but like them."

Russian Mulberry

Very hardy; the tree stood 30 degrees below zero and bore a crop of berries the following season.

Makes a large, spreading crown, fruit produced in enormous quantities, the berries range in color from black to white, and from sweet to quite tart. In many homes the berries are canned with Rhubarb or Gooseberries. Song-birds regard a Mulberry tree as a complete boarding house. No farm should be without Russian Mulberries. For post growing use the seedlings listed on page 21. Also for hedges.

Prices of Transplanted Mulberry Trees

4-5 ft. nice trees	. 45	1.25	4.00

Note the snap-shot above, showing part of an Apricot orchard.

Persimmon (Diospyros Vlrginlana). Can be ern half of Nebraska. Fruit medium size and must be fully ripe before it is good to use. A nice looking tree, often used for ornamental purposes, with very valuable wood. Persimmons will do well even on poor soil. Nice seedlings, 12 to 18 inches, 15c each; 3 for 25c; 10 for 75c; postpaid.

= PLANTING INSTRUCTIONS =

Fill In loose soil all around the roots. The best soil you can possibly get for this purpose is soil from the surface that has been worked, and does not contain fresh fertilizer. Fill in until the hole is within a few inches from being level full. Then water. Apply several bucketfuls. This not only gives the tree the necessary moisture to start, it also settles the soil and packs it firmly around the roots much better than could be done by tramping. When the water is all soaked away, and the soil settled, about an hour after watering, fill the holes level full with medium dry soil, and bank it up a few inches around the body of the tree. This soll takes the place of any mulch.

"Snapshot of-my Elberta peaches," says Mr. Paul Lutonsky, of Rush Springs, Oklahoma. "Sold them for \$1.50 per bushel at the place; could not supply the demand. Also got first prize on Delicious apples at county fair. Trees bought from you about 5 years ago. The trees I ordered from you are the kind anyone can well be proud of."

Elbertα Freestone. The best known market peach, large, yellow with red cheek; flesh yellow, firm, good quality. Not hardy in Nebraska. Does well in the South, in Ohio and Michigan. Ripens in August.

Early Elberta Freestone. A little larger than Elberta, in other respects the same, except that it ripens almost two weeks earlier. Very good for Southern Illinois, Indiana, Southern Missouri and Kansas, but not hardy north of there.

Early Wheeler—Red Bird

Semi-cling. Medium early, hardy anywhere in the corn belt, excellent quality. A new peach, originated in and for the Middle West.

Fitzgerald Freestone. In hardiness and productiveness as good as Champion, the only difference is the color of the flesh. Fitzgerald is yellow meated, same high quality as Champion. Ripens in August.

Heath Cling Clingstone. Best for pickles, large, round, white-meated, juicy, highly flavored. Hardy here, but not in the North. Ripens in October in October.

low color with carmine cheek, smooth, a very good peach. See picture on top of this page. Does well as far North as the middle of Nebraska, and anywhere South and East of here. Ripens end of August.

Maylower Semi-Cling. This and Alexander Early are the earliest peaches you can have. White meated, good size, and fine quality. Gets a nice red color even before fully ripe, blooms late and is fairly hardy. Ripens early in July.

Pollu Freestone. One of the support Freestone. Large size. I. H. Hale

Polly Freestone. One of the surest bearers. Claimed to be even hardier than Champion. Medium size, good flavor, yellow meated, ripens in August.

Sage October Peach Freestone. A very hardy and abundant bearer. Good medium size, dark yellow with deep crimson blush, flesh yellow, very firm and juicy, quality as good as the best. Be sure to include this tree in your planting. Ripens in October when peaches of such fine qualities are getting scarce.

My hardy Peach Collection

2 Champion 1 Alexander Early 1 Crosby

1 Sage

All nice 2 to 3 ft. trees.

For \$1.15 Post-paid

Peach-Cot See Page 1. A wonder-ful new fruit.

Nectorines Smooth skin peach. About the size of a medium peach, wax-like in appearance, perfectly smooth. Of excellent eating quality. Hardy up to southern half of Nebraska. Nectarines will be well liked by everyone in your home. Can furnish the varieties "New White" and "Red Roman." Prices and sizes same as peach trees.

= PLANTING INSTRUCTIONS =

With the planting part completed, the newly planted trees and shrubs are pruned. Apple and Plum trees are pruned alike. Cut all branches back to one-half of their length, and where branches happen to stand too dense cut some of them out to make a balanced crown. There should be branches in each direction, and a center or "leader." Pear trees are shaped up in the same way, the branches that remain are not cut back. Sour Cherries require but very little pruning, only if a branch happens to be broken. On peach trees cut off all branches to within one inch from the stem. They make a fine new top. Prune Apricots same as apples and plums.

Champion, Everbearing The most freely and continuously bearing variety I know of. In normal season Champion bears all summer, and increases even more towards fall when the weather turns cooler. Berries are well flavored, but not as large as those of Gem and Mastouon. I recommend Champion for home use.

Gem, Everbearing One of the new varieties, and rapidly becoming popular due to its superior size, and bearing ability. I am sorry to say that in my own test fields I have not been able to put Gem to a thorough test, since Gem is on the to a thorough test, since Gem is on the market we have had such extremely dry and hot weather, that the plants could do little more than stay alive in the proving grounds where plants are not "babied along." Therefore, I can only describe Gem according to what the originator states: "Gem is a good producer herries. states: "Gem is a good producer, berries are pretty even in size throughout the bearing season, and they seem to color up better than Mastodon. My advice is that you include Gem in your planting."

Mastodon, Everbearing Nice berries, even size. For market Mastodon and Gem are best, Champion would be a little too small. Mastodon and Gem both will produce well in the fall. In normal seasons they will bear through the summer also, especially if they are kept watered. Wherever you have water for summer use in dry seasons it will pay you to grow Everbearing Strawberries.

Prices of all Everbearing Strawberries 25 plants for 50c; 50 for 90c; 100 for \$1.50; 300 for \$4.00;

= PLANTING INSTRUCTIONS ===

Note the picture and plant your strawberries accordingly. The roots well spread out, and in the right depth. Right after planting, water each plant, never depend just on the soil being moist enough, watering settles the soil. Plant in rows, the rows in large plantings $2\frac{1}{2}$ feet apart, in small planting 12 to 16 inches apart, and space the plants in the rows 12 inches apart. This leaves enough room for runners between the rows, and from the runners you get large crops year after year once your bed is started.

50 Senator Dunlap

25 Blakemore

25 Gem Everbearing

100 Nice Plants

\$1.00 POST-

planted everywhere. Bunches and berries of good size, black, covered with a rich blue bloom. Skin tender but firm, juicy sweet when fully ripe; very hardy and productive. There are varieties of better quality for table use, but for jelly, grape juice or wine none will equal Concord for heavy production, and regular bearing. Can be grown most anywhere, for the Middle West it is the most dependable bearer. 2-year No. 1 selected, extra strong plants, 18c each; 3 for 45c; 10 for \$1.20; 25 for \$2.50; 100 for \$8.50. I also have the standard 2-year old plants, 12c each; 3 for 30c; 10 for 90c; 25 for \$2.00; 100 for \$6.50; all prepaid.

Worden, Black grapes, Worden is second only to Concord as a popular grape for home use and market. Worden is a strain of the Concord, almost of the same high productiveness. The berries of Worden are a little larger than those of Concord, and have a better flavor. For fresh fruit I would prefer Worden to Concord. Worden is fully hardy in the Middle West, needs no winter protection. Ripens about one week ahead of Concord. 2-year No. 1 nice plants, 20c each; 3 for 50c; 10 for \$1.50; 25 for \$3.00; prepaid.

Moore's Early, Black Bunches of medium IVIOORE'S Early, Black Bunches size, rarely shouldered. Berries large, round, of very good quality. Desirable for market on account of its earliness. Berries in flavor are much like Concord, but larger. Moore's Early ripens so far ahead of Concord as to be off the market by the time Concord ripens. There are very profitable plantings of Moore's Early in the South as well as in the Northern states. For your home vineyard you should at least plant a few of them for early use. 2-year No. 1 fancy vines, 22c each; 3 for 55c; 10 for \$1.60; 25 for \$3.25; prepaid.

Pocklington, Yellow Bunches compact. Berries very large, juicy, compact. Berries very large, very compact. Berries very large, juicy, sweet, with very little pulp. The vine is in every respect as hardy as Concord. You can grow Pocklington anywhere with the exception of the extreme North, where it should have a light protective cover over winter. Pocklington should be planted more freely, when fully ripe it is probably the sweetest grape there is. A splendid grape for your table. Extra fine 2-year No. 1 plants, 25c each; 3 for 65c; 10 for \$1.90; 25 for \$4.25; prepaid.

= PLANTING INSTRUCTIONS ==

WILLIAM HECK, Oakley, Cincinnati, Ohio.

My two-year-old Grape Vines are exceptionally well rooted. For this reason dig large holes, even larger than required for trees. Spread the roots, and plant at the depth shown in diagram at the left. Fill In with good top soil, use no kind of fertilizer. Water heavily to settle the soil. Right after planting cut each vine back to four eyes per vine.

The Grape Vines I bought from you this spring were fine, every vine lived, and are doing wonderful.

Niagara, White Home and market growers seem to agree that Niagara is perhaps the most valuable of all white grapes. Its clusters are large, and handsome, compactly filled with large berries having thin but tough skin. When fully ripe they are pale yellow with white bloom. Slightly pulpy, tender, sweet with a delightfully aromatic flavor peculiarly its own, and agreeable to most tastes. Vine is remarkably vigorous and productive. Ripens with Concord, and hardy as far north as Concord, also in the South. I have had reports of splendid results in commercial plantings in Florida, and at the same time it is perfectly hardy anywhere in the Eastern states and the Middle West. Fine, strong plants, 2 years old, No. 1, 20c each; 3 for 50c; 10 for \$1.50; 25 for \$3.00; prepaid. 25 for \$3.00; prepaid.

SOUTHERN AND A HOTHOUSE GRAPES

Wherever the ground freezes these grapes are not hardy unless covered with dirt and manure over winter. In the Middle West and North these grapes are called "Hothouse Grapes," and are planted in barrels or large tubs to be moved indoors over winter.

Vine an enormous bearer and very rapid grower; bunches very large, berries greenish yellow, firm, oval and seedless. Skin thin. Most of the seedless raisins are made from this variety, and are in strong demand. Thompson's Seedless is an early shipping grape, ripening in August. Largely grown in the Pacific states and in the South. In the North it can be grown in tubs, and will bear well. Can be kept in a cool cellar over winter. Nice 2-year-old No. 1 plants, 25c each; 3 for 60c; 10 for \$1.80; 25 for \$3.85; prepald. Thompson's Seedless Sultania Blanche.

Flame Tokay

This is the grape you find in fruit markets everywhere all through the winter. Berry large, pale red, covered with a bluish bloom. Flesh firm and sweet. In great demand, and one of the best known market grapes. Ripens in September. Grown in tubs, and moved indoors for winter protection this grape can be grown in the Middle West and in the North, but not hardy without this care. 2-year-old No. 1 plants, 25c each; 3 for 60c; 10 for \$1.80; 25 for \$3.85: prepaid.

All Grapes Prepaid

Fredonia, Black Fancy
Grape. This is the finest early
black grape of the hardy class.
Fredonia is as hardy as Concord.
The berries are of large size, black
with blue bloom (see colored photo
on rear inside cover page) and they
ripen evenly. Fredonia has a most
delicious flavor, rarely found in
grapes. I recommend Fredonia,
and I suggest that you include a few of
them in your planting. My Fredonias are
of the true original stock. Extra fine
2-year No. 1 plants, 30c each; 3 for 75c;
10 for \$2.20; 25 for \$4.70; prepaid.

The grand table grape. A fancy grape of finest quality. Berries extra large, sweet, juicy, with a most pleasing flavor. Coming in well-shaped clusters of light red or amber color it is a most attractive looking fruit. Caco is perfectly hardy everywhere except the extreme North where it needs a little winter protection. The berries become sweet two weeks before they color up. Caco should be in every garden, it produces well, and there is nothing to take its place for good eating grapes. 2-year-old No. 1 fine plants, 25c each; 3 for 70c; 10 for \$2.10; 25 for \$4.50; postpaid.

Portland, White Splendid Table Grape. This is my earliest white grape. A fancy variety with its sweet and julcy berries. It is a hardy grape, as hardy as Concord, and is a healthy grower. Berries good sized, sweet, juicy and of fine flavor. Portland is also a good producer. Portland and the other fancy varieties I am listing in this column will be the pride of your garden. Nice, strong 2-year-old No. 1 plants, 25c each; 3 for 70c; 10 for \$2.10; 25 for \$4.50; prepaid.

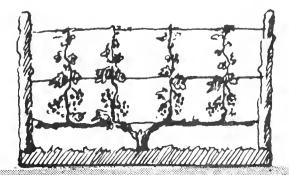

My Grapes of 2 years ago are doing wonderful. AL CLARK, Sheboygan, Wisc.

Fancy Table-Grape Trio 1 Caco 1 Portland l Fredonia

ALL 65c PRE-

For the first summer allow all vines to grow, but tie them up to a pole if you are not building a wire fence or trellis until the second year. The sketch at the right shows the first year's growth tied to the lowest wire as the main vine. Side branches for bearing tied vertically to the upper wires. These branches produce the fruit. Keep them cut off just at the height of the trellis, and early every spring cut out the branch that bore the previous year, making the cut within an inch from the main vine, and allowing a new sprout of previous year's growth to grow in.

Plant in rows 5 feet apart and 3 feet apart in the rows. Rasp-berries will do well in any soil. Keep the bed free from weeds, cultivate occasionally, cut old and dead canes out. Spraying in early spring before the canes get green (Dry Lime Sulphur diluted 1 to 20) will keep Raspberries free from disease, in great bearing condition.

RED RASPBERRIES

Chief The finest early Red Raspberry known, both for home use and market; a heavy producer, in quality and size about the same as Latham but 10 days earlier.

Latham See inside of rear cover page. Latham is the most popular Red Raspberry on the market, the best midseason variety. Berries of excellent quality, bears heavy.

St. Regis Everbearing Bears a period of four months. Is very hardy, berries large and sweet. For home use St. Regis will produce nice berries for you for fresh use throughout summer and fall.

Columbian, Purple The only Raspberry that will not make root suckers. Productive, excellent quality, the berries are large, purple-red, and the plants are very hardy. Price of Columbian: 3 for 30c; 10 for 70c; 25 for \$1.50; 100 for \$4.75;

BLACKBERRIES

Mersereau See picture above. Early, a fine large berry, black and sweet, without core. Due to its hardiness Mersereau is one of the best Blackberries for the Middle It is a good producer, and the quality of the berry is as good as the best.

Blowers Large berries, jet black, good shipper; favorite with market growers. Highly productive.

Brainerd Bears well over a long season, and produces a lot of berries. Berry of the Giant Himalaya type, plant very hardy, and a vigorous grower. Planted especially in the Middle West and Northwest. 3 for 40c; 10 for 95c; 25 for \$2.00; 100 for \$7.00; prepaid.

BLACK RASPBERRIES

Cumberland A very hardy type, a good and dependable bearer. See rear inside cover page for colored Photo of Cumberland. Berries large, black, very firm. The plant does not make root suckers.

New Logan A very large raspherry, jet black, juicy and sweet. Early and of extra heavy bearing ability. This is a new variety. No root-suckers from Black Raspberries. My plants are all nice, healthy well rooted stock.

Quillen Hardy most anywhere in the Middle West, and in the North, a most abundant and sure bearer, and the berries are as good as the best in quality and size.

Blackberry Collection

6 Mersereau Blowers

3 Brainerd

15 plants, all well rooted, nice healthy plants, guaranteed to reach you in good shape, for only

65c PRE-

= PLANTING INSTRUCTIONS =

Raspberries and Blackberries should be planted just slightly deeper than grown in the nursery row. Water well right after planting in order to settle the soil properly. Bank up two to three inches of dirt around each plant for easier starting. Cut all canes back to 4 or 5 inches from the ground. You will get new shoots from that part of the cane which is banked up. These new canes will grow several feet high the first summer. As soon as they are 3 or 31/2 feet high, by midsummer, pinch them off at that height. Do this every year with the new canes. Old canes, those that have produced a crop of berries, are cut out or broken out near the ground in late fall or early spring, making room for new canes. This keeps your plants in good producing shape.

Oregon Champion Gooseberry

This picture shows clearly the enormous bearing ability of this great variety. The shrub is a strong grower, not very thorny, the berries are of medium size, finest quality for canning and for pies. For regular and heavy crops Oregon Champion is of autotading value. It is hardy outstanding value. It is hardy.

Prices of all Gooseberries and Currants (except Chautuaqua): 28c each; 3 for 70c; 10 for \$2.10 prepaid. All 2-year No. 1 shrubs.

Downing Berries medium in size, handsome pale-green, and of splendid quality, for canning and for pies. The bush grows strong and upright, it is a healthy, hardy plant. Downing and Oregon Champion have long been the leading market varieties in Gooseberries, and are still the favorites with market growers.

Carrie

Berries small to medium, and of maroon color when fully ripe. The bush bears enormous numbers of berries and if they were a little larger this would be the best variety to plant. For home use you will like Carrie, include a few of them in your planting. The shrub is very hardy, can be planted anywhere.

Chautauqua Giant Size, Sweet. See colored photo inside rear cover page. By far the largest berry; sweet when fully ripe. Excellent for canning, pies and for fresh eating. The only Sweet Gooseberry on the market. The bush is of spreading habit, hardy anywhere in the Middle West. Bears almost as heavy as Oregon Champion. For Chautauqua as well as all other varieties of Gooseberries, also Currants I recommend a spray application, early in the spring before the leaf buds open, consisting of Dry Lime Sulphur (10 tablespoonfuls per gallon of water). It will keep your shrubs entirely free from mildew. A light spray of arsenate of lead just as soon as the leaf worms appear, in such localities where this insect may attack your plants, will be a perfect protection. In any planting be sure to include Chautauqua. I have a nice supply of true to name shrubs, well rooted and healthy stock: 50c each; 3 for \$1.35; 10 for \$4.00; prepaid.

Dear Sir:

Received the shrubs ordered, and am de-Received the shrubs ordered, and am delighted. I never received a cleaner, nicer lot. I had them in the ground within a few hours after they arrived, and they were showing signs of life in two days.

MRS. H. H. LOUGHRIDGE, Lincoln, Nebr. Perfection Currant Note photo to the right

Wilder Currant Good red early, a little ahead of Perfection. The bush is a vigorous grower, and produces well. Although the berries and the clusters are not quite as large as Perfection, Wilder makes nice crops. It is an old favorite with market growers for early sales.

White Grape Currant

A sweet, white Currant, and a good hearer that can be grown anywhere, except the extreme North. For fresh eating you will find this berry better than the Red Currants. White Currants are quite sweet, having little of the acid of red varieties.

Black Currants lam not growing Black Currants. It is against the law to ship them; in most states they are entirely prohibited. At present Black Currants cannot be furnished.

reriection Currant Note photo to the right showing the well filled clusters, and large berries of this splendid variety. It is the largest of the red currants, bearing remarkably well. Berries not very sour, few seeds, and bright red. Perfection is of excellent quality for canning and jelly, due to the large fruit and clusters, you can pick a basket full of Perfection Currants as quick as picking Cherries. Perfection is hardy anywhere in the Middle West. It should be the main variety in every Currant planting, for home use or market.

GOOSEBERRIES

PERFECTION CURRANT

If you live in any of the following states:

Connecticut Idaho Maine Maryiand

Massachusetts Michigan Minnesota New Hampshire

Pennsylvania Rhode Island Vermont Wisconsin

shipping of Gooseberries and Currants requires a special permit from your department of agriculture. I apply for the permit, you have no papers to sign, but your order should reach me 2 to 3 weeks before shipping time, so that I have time to get the special permit. To all above states Currants and Gooseberries are shipped in separate packages. No extra cost to you for permits.

= PLANTING INSTRUCTIONS =

Gooseberries and Currants should have a little shade. The east or north sides of buildings or under large trees are better than out in the open. Water them well for the first year in case of dry weather. Pruning of Currants Is recommended for old plants only, removing the oldest wood. This is done in early spring. Gooseberries should be pruned every summer. When the berries are ripe, cut out the bearing canes entirely, this makes room for the new wood which bears the following year. Spray with Arsenate of Lead as soon as the leaf-worms appear. Cultivate the soil around these shrubs early in the spring.

Loganberry See picture above. A cross between a Blackberry and a Raspberry. Fruit extra large, dark red, with mild, pleasant and vinous flavor. Seeds small, soft and few; plant grows strong, bears large clusters of berries. In Nebraska and north of here it should have a cover over winter, consisting of straw. More Loganberries should be planted, as it is one of the finest berry fruits that can be had. Nice plants, 30c each; 3 for 75c; 10 for \$2.20; 25 for \$5.00; 100 for \$17.00;

Youngberry This new berry has been introduced in recent years. The plant is a vigorous grower, and a heavy bearer; it is hardy in the Middle West; how-ever, I recommend a light cover of straw over winter for best results and extra good bearing. The berries are as large as Loganberries, purplish-black; in quality they resemble raspberries. Nice plants, 3 for 30c; 10 for 80c; 25 for \$1.80;

Horseradish Just the right size cuttings to make good roots by fall. They do well anywhere; easy to grow. The cuttings are placed in the ground slanting, the lower end 1 foot deep. 10 cuttings, 30c; 50 for \$1.30; 100 for \$2.00; postpaid. a heavy application of well rotted barn manure will produce enormous crops. Easiest culture. Plant Boysenberries; you will like them. Nice plants, 25c each; 3 for 65c; 10 for \$1.80; 25 for \$4.00; 100 for \$14.00; postpaid.

Juneberry or Service Berry

A good substitute for the large Swamp Huckleberry or Whortleberry, which It resembles in appearance and quality. Fruit comes in clusters, reddish-purple in color, changing to bluish-black when fully ripe. Flavor a mild, rich sub-acid; excellent as a dessert fruit or canned. It is extremely hardy, not thorny, grows bushy to a height of 7 or 8 ft. Would make a nice ornamental shrub also, and is often used for that purpose, as it is very showy when in full bloom. Juneberry makes no fiber-roots; it is not a fast grower, but lasts for many years. I would call Juneberry a desirable combination flowering and fruit plant. 30c each; 3 for 75c; 10 for \$2.20; postpaid.

Dwarf Blueberry For this you Dwarf Blueberry For this need a low, wet place, shaded, where the soil usually turns sour and few, if any other plants would grow. Such a spot is just the right place for the Dwarf Blueberry; it increases rapidly, making a pretty dense growth of heavy producing plants about 15 inches high. I do not recommend this plant for dry land or sunny places. The berries are of good size, black with a blue bloom, very sweet; excellent for fresh dessert fruit, drying or for canning. Perfectly hardy, even in the extreme North. Plants are scarce, order early. 3 for 50c; 10 for \$1.50; 25 for \$3.00; postpaid.

order early. 3 for 50c; 10 for \$1.50; 25 for \$3.00; postpaid.

Mint Peppermint. Mentha Piperita, the true hardy variety. The leaves are used for mint sauce and mint julep. 25c each; 3 for 50c; postpaid.

Dewberry The variety I sell is Lucretia Dewberry. It is of the blackberry type, trails on the ground. The new growth is left on the ground for the first winter, where it can be covered conveniently with straw or leaves. The following spring, after cutting off all old canes, the new growth of previous year is tied up to the wire trellis or stake for bearing. The berries are larger than regular blackberries, and the plant bears extra well. Nice plants, 3 for 25c; 10 for 60c; 25 for \$1.25; 100 for \$4.00; postpaid.

Tree Strawberry As the plant develops it forms a dense network of roots, multiplying rapidly, and for this reason it is in great favor for holding the soil on steep banks. It grows to a height of 18 inches, and the tops die back every winter, making a new growth from the ground up every spring. The fruit is bright, shiny red, 1 inch in diameter, and slightly conical, of fair quality. A valuable shrub in its proper place. Nice roots, 3 for 45c; 10 for \$1.20; postpald. place. Nice ro \$1.20; postpaid.

American Elder (Sambucus Canadensis)
A native shrub of tall growth with stout stem, eventually growing into tree form. The small white flowers come in large flat clusters, fragrant, and appearing in spring. At that time the shrub is very showy. Later there are many large clusters of black berries which ripen in August and September. Birds are very fond of the berries, and in many instances they are used for cooking and for coloring of fruit juices. For centuries this Elder furnished its flowers, berries, even its leaves and bark for medicinal purposes, and is still regarded as a drug-yielding plant. 2 ft. shrubs, 25c each; 3 for 65c; 10 for \$1.50; postpaid.

each; 3 for 65c; 10 for \$1.50; postpaid.

Hop-Vine Humulus Lupus. The root is perfectly hardy, makes a new vine every year, which is of extra strong, vigorous growth. The blossoms, golden-yellow in color, come in panicles about 6 inches long, much like large strawflowers, and are often used in dry winter bouquets. This is the variety of Hop grown in large plantations for brewery purposes. Due to its extra strong growth, and the pretty blossoms, I recommend this Hop-Vine for covering unsightly places, fences or old tree trunks. The true Hop-Vines, 30c each; 3 for 70c; 10 for \$2.00.

Holt's Mammoth Sage

Of excellent flavor; the plant is hardy with a light cover of straw or leaves over winter. Should be in every garden. 25c each; 3 for 50c; postpald.

PLANTING INSTRUCTIONS =

Plant as stated on page 14 under Raspberries and Blackberries. I recommend that you space your plants as follows: the rows 5 feet apart, and the plants in the rows 3 feet apart, for all Raspberries, Blackberries, Youngberries, Loganberries, Boysenberries, Dewberries. Plant Tree Strawberries and Dwarf Blueberries 2 by 2 feet apart. Juneberries and American Elder require 5 to 6 feet space each. Gooseberries and Currants 5 feet apart in the row, the rows 5 to 6 feet apart.

Black Walnut Note picture above. A beautiful, large tree of rapid growth, especially on bottom land. The nuts, although hard-shelled, are of very good quality. Besides being a very good shade and ornamental tree, the wood of Black Walnut is most valuable. For this year I can furnish only the following sizes:

12-18	Inch.	good roots\$0 nlce seedlings	.40	2.50	6.60	21.00	
		Prepald:					
6-12	Inch		.35	1.90	5.4 0		
12-18	Inch		.50	2.70	7.10		
	Inch		.60	3 30	9.50		

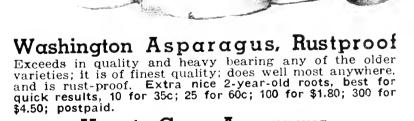

Not Prepaid:

Butternut—White Walnut One of the finest native shade shade tree. Hardy as far north as South Dakota; the nuts are large, long, and of good quality. 12 to 18-inch seedlings, 3 for 40c; 10 for \$1.00; 25 for \$2.00; 100 for \$6.00; postpaid.

Japanese Walnut (Sieboldi) Makes a beautiful tree which bears young and very well. It is hardy along the East Coast states, and from there west through southern Illinois and Indiana, southern half of Missouri and Kansas. There are some Japanese Walnuts growing in Nebraska, but they are not sufficiently hardy to be profitable in this state. In the localities named you will find this tree very valuable for the fruit as well as for its splendid shade tree qualities. 2-3 ft. nlce trees, 75c each; 3 for \$2.00; postpald. postpald.

Stuart Pecan Hardier than the Common Pecan, and can be grown as far north as southern half of Missouri. southern Illinois and Indiana. The nuts are large, thin-shelled, the quality of which is very good. Plant them for home use and market. 18-24 Inch grafted trees, 90c each, postpald.

Hazelnut This is the old fashioned hardy type with nuts of medium size. Bears well, makes an upright growing bush that can be used for screens, and is sometimes included in ornamental plantings for tall growth. 2-3 ft. nice bushy shrubs, 40c each; 3 for \$1.10; 10 for \$2.90; postpald.

How to Grow Asparagus

Manure the ground heavily, using well rotted barn manure. Make a trench 8 to 10 inches deep. Have 4 inches of good rich ground on the bottom, spread the roots out evenly and fill in about 3 to 4 inches of soil. Leave the rest of the trench lay open for the first summer. Let all stalks grow the first year. Fill the trench up in the fall of the first year. Let several stalks grow on each plant the second year. In the third year allow one stalk per plant to grow up, cut all others as soon as they appear above the ground. Cultivate occasionally. Plant 1 ft. apart in the row, the rows 3 ft. apart.

= PLANTING INSTRUCTIONS :

Planting instructions as given under fruit trees also apply to Nut trees. It must be mentioned, however, that Nut trees have very few fiber roots and the tendency of the root is that it grows straight down into the sub-soil. Therefore, it is always a good plan to dig or bore with a post auger from the center of the bottom of planting hole for an additional depth of 18 inches or better, which allows the root of a nut tree to develop into the sub-soil layers.

enclosing garden in circular form. The hedge and shrubbery background not only finish this scenery, they actually make it.

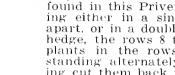

Barberry Thunbergi

LOW ORNAMENTAL **HEDGES**

Barberry, Japanese Will make a pretty hedge up to 18 to 24 inches in height. Keeping its neat shining green foliage throughout the summer in perfect condition, changing to a showy red in fall. Densely branched, can be grown in sheared forms or without shearing in natural shape. For shearing plant 8 inches apart, for natural growth 12 inches apart in the row. 12-18-inch nice plants, 10 for \$1.10; 25 for \$2.50; 100 for \$7.50; postpaid. 18-24inch nice shrubs, 10 for \$1.50; 25 for \$3.30; 100 for \$10.80; postpaid.

Spirea Thunbergi—Flower-

ing Makes a most attractive low hedge, not over 3 ft. in height, and of a beautiful light green color. Can be grown without shearing. The flowers are white, and appear in great profusion in early summer. 12 to 18-inch nice plants, 10 for \$1.50; 25 for \$3.50; 100 for \$11.50; postpaid.

Golden Privet In every respect the same as the Amur River Privet, however, the leaves in a sunny location are of a beautiful golden yellow color, highly attractive. Individual shrubs, sheared round to ball forms can also be furnished at \$1.25 each, 2 to 3 ft. size, for planting as single specimens in groups of Evergreens. For hedges use the 6 to 12 inch size plants, 10 for \$1.20; 25 for \$2.60; 100 for \$9.50; postpaid.

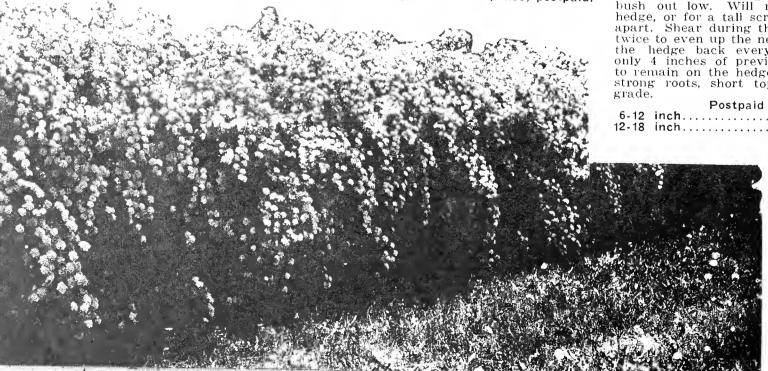

Russian Olive—Silver Leaf

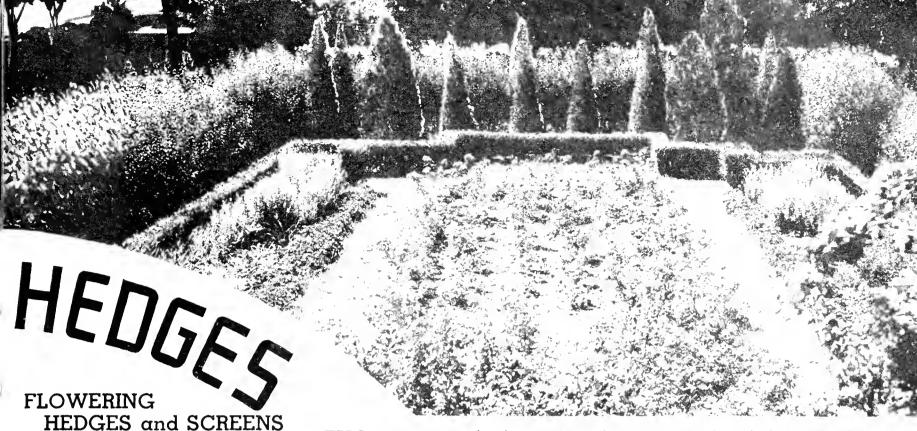

Silvery-gray foliage and twigs, which makes a hedge of these plants very attractive. Plant 8 inches apart in the row, and shear the plants right after planting to 3 inches from the ground to make them bush out low. Will make a nice 4 ft. hedge, or for a tall screen plant 12 inches apart. Shear during the summer once or twice to even up the new growth, and cut the hedge back every spring, allowing only 4 inches of previous year's growth to remain on the hedge. My plants have strong roots, short tops, special hedge-grade.

Postpaid 10 25 100 6-12 inch.......\$0.40 \$0.80 \$2.00 12-18 inch............50 1.00 3.20

AT RIGHT Persian Lilac hedge. Plant 18 inches apart in row, or 2 feet for very tall screen.

Persian Lilac Makes a most elegant tall hedge, will not make sprouts from the roots, keeps a healthy foliage throughout summer and fall, and blooms beautifully at "Lilac-Time." For a fine, dense screen-enclosure, plant Lilacs. Nice hedging size, 12-18 inch plants, 10 for \$2.50; 25 for \$5.40; 100 for \$17.50; postpaid.

Old Fashioned Lilac The same above except for its leaves, which are larger, and is preferred where there is no shortage of ground space, as this Lilac sometimes makes a few sprouts from the roots. Blooms beautifully. Special price on hedging size, 12-18 inch plants, 10 for \$1.20; 25 for \$2.80; 100 for \$10.00; postpaid.

Spirea Van Houtti There is no other flowering hedge of this height (4 to 5 ft.) that would be so hardy, and require so little care as the Spirea Van Houtti. Blooms beautifully in June. 12 to 18-inch nice plants, 10 for \$1.20; 25 for \$2.75; 100 for \$9.00; postpaid.

Bush Honeysuckles

eysuckle makes a pretty, very dense screen 8 to 10 ft. tall. Plant them 18 to 24 inches apart in the row. Blooms pink in May, later followed by Extremely hardy, always a fine, clean shrub, healthy foliage, and an upright grower. Can be sheared to even height. 12-18 inch nice plants, 10 for \$2.20; 25 for \$5.00; 100 for \$17.00; postpaid.

THORNY **HEDGES**

Another pretty garden, a rose planting which owes much of its charm to an inner hedge of Amur River Privet, and a tall outer hedge of Persian Lilac, sheared Juniperus Virginiana (see page 25) in the background.

Caragana, Siberian Pea

Tree Extremely hardy, makes a pretty screen, very upright in growth, blooming yellow in May. Has a pretty toliage. For enclosure of your garden, as well as for stopping the wind, this plant is very satisfactory. Prices, see page 20.

Buckthorn Rhamnus Carthartica. A pretty shrub making a tall screen of 10 ft. and up. With pretty white blossoms in the spring and red berries in the fall. The thorns appear on the old wood, the young plants hardly ever have thorns. 12 to 18-inch nice plants, 10 for \$1.10; 25 for \$2.50; 100 for \$7.50; postpaid.

Honey Locust Gleditsia Triacanthose Honey Locust those Makes a stout, extra hardy, theft-proof hedge for field and stock enclosures. The strong thorns of Honey Locust will stop animals of any size. 18 inches apart is the right distance in the row. This Locust will never make suckers from the roots. For prices of the seedlings, see pages 20 and 21.

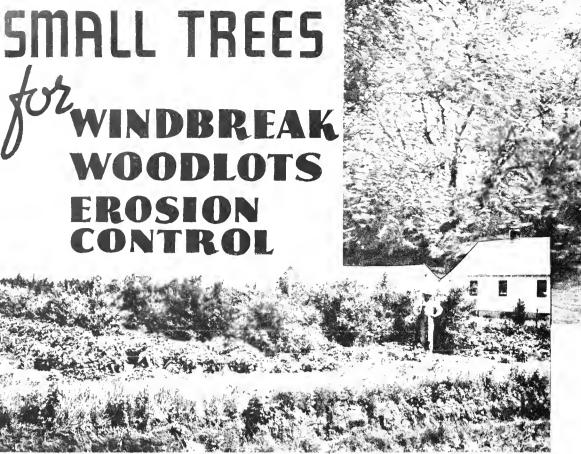

Osage Orange The most popular hedge for field and stock enclosures. Best for post growing. Osage Orange is coming back; in recent years it has been proven that these hedges protect fields from hot and dry wind, and catch the snow in the winter. It improves farm ground. Use 6 to 12-inch seedlings for hedges; prices, see page 21.

Russian Mulberry Sheared from the beginning, just like Privets, the Russian Mulberry makes a very nice hedge. For this purpose plant 6 or 8 inches apart in the row, or plant in double rows like Privet. Prices of the seedlings, healthy, well rooted of the seedlings, healthy, well rooted stock, and well up to grades, see page 21.

BELOW: A hedge of Persian Lilac, with a sheared hedge of Amur River Privet as a border; a most attractive hedge com-

· Si box

A windbreak and snowtrap of Russian Olives and Chinese Elms, protecting the entire farm.

Ash, White Fraxinus Americana. Wood very valuable for lumber and fire-wood. The Ash is a hardwood tree and probably one of the fastest growers of the hardwood type. Does well anywhere, perfectly hardy even in Canada; also resists the heat and drought of the Middle West. White Ash should be in every wood-lot planting.

Catalpa Speciosa The Hardy Catalpa. This is a tree of tall, upright growth, large light green leaves. To make up the tall growth in a windbreak, one row of these Catalpas in the center will be very effective. The wood of this catalpa is of great value for posts, and due to the rapid growth of the tree, and its straight, tall stem, the posts are easy to grow, and are very straight. Having hard wood, the posts last for many years.

FOR WOOD: Black Walnut, Bur Oak, Ash.

FOR POSTS: Osage Orange, Russian Mulberry, Catalpa Speciosa.

FOR PASTURE GROUNDS (Shade): Honey Locust, Russian Olive, Golden Willow.

FOR EROSION CONTROL: Black Locust. FOR STREAMS AND PONDS: Williows, Black Walnut, Cottonwood.

Cottonwood Populus Sargentii. The native timber tree. Very common along streams where it holds the soil well, and reaches mammoth dimensions, in thickness of its stems as well as the spread of its lofty crown. The Cottonwood withstood the drought and the cold remarkably well; it will survive where most other hardy trees would be short lived. The wood is used for making packing crates and boxes.

Elm, American

I know of no other shade and timber tree that would be so popular as the American Elm, especially in the Middle West. It is a fairly rapid grower and is hardy most anywhere. The tree makes a large spreading crown, very suitable for shade and street planting. Include American Elm in your wood-lot or timber planting.

Look over your grounds, convince yourself that there is room for a woodlot, for a shelterbelt, or for a windbreak. Plant now. There is no better snowtrap, no better way of conserving moisture on the farm, than by stocking up with trees. Game cover, control of hot winds, are only a few of the extra benefits you derive from trees. Just a small sum invested now in seedling stock will increase the value of your land by hundreds of dollars within just a few years.

Restock Your Timber and Woodlots. Plant This Spring.

A hardy shelter-belt of Russian Olives planted in a double row 4 by 4 ft. apart.

Chinese Elm Ulmus Pumilla. When you plant Chinese Elms be sure they are the true hardy Ulmus Pumilla strain, because not all Chinese Elms are fully hardy. My seedlings are of the northern hardy type which can be planted safely anywhere and will be perfectly hardy. The Chinese Elm is the most rapid growing tree; it has also come through our last four years of extreme drought in remarkably good condition. Farmers everywhere, as well as townpeople, are replanting much of their lost trees and timber with Chinese Elms, knowing how fast this tree grows. Note the nice row of Chinese Elms, upper right hand corner page 21; a protection to nearby fields from hot winds, a snowtrap in the winter. I recommend the 18 to 24 inch size.

= PLANTING INSTRUCTIONS :

After receiving shipment, put roots of the seedlings in coid water for a few hours. Before taking them out for pianting, dip the roots into a paste of thin mud, plant with plenty of mud sticking to the roots. Piant 1 inch deeper than grown in the nursery. Water right after planting. For choice, straight stems, cut the seedlings off right after planting, make the cut next to the ground. There will be two or three sprouts per seedling within a short time. Cut the sprouts ail off but one, which will make a perfectly straight stem in one growing season.

Black Locust Robina Pseudoacacia. In great favor for Erosion Control. It holds the soil firmly even on extremely steep ground, due to its habit of forming a dense network of roots, which sometimes make sprouts. This tree grows fairly fast, it is a valuable tree for its wood also.

Honey Locust Gleditsia Triacanthos. This Locust will positively not make suckers from the roots. You can grow pasture or lawn grass under this tree, and the grass will do extra well in the shade of this Locust. It is a clean tree, of the hardwood type but growing quite rapidly. Perfectly hardy everywhere, resists drought extra well. For timber, wood-lots, for shade in grazing grounds, and, due to its very stout thorns, for strong, protective cattle fences. For theft and cattle proof fences plant 18 inches to 2 feet apart in the row.

PLANTING INSTRUCTIONS

Cultivate for the first year to keep the weeds down, and the soil loose. This means added growth. The corn cultivator will do the work. Commencing the third or fourth year after planting, cut out every second stem for a post. Make a second cutting for heavy posts after another four years which makes room for the remaining trees to grow up to big timber, at a distance of 12x12 or 16x16 feet.

Russian Olive Eleagnus Angusti-size, clean tree, very hardy. Fine for windbreak, snowtrap, also for ornamental hedges. Foliage silvery-white.

Peach Seedlings 12 to 18 inch size. 10 for 80c; 25 for \$1.50; 100 for \$5.00; postpaid.

Irnamental and Shade

Ash, American White Fraxinus cana. Grows well most anywhere, requires very little attention, and makes a very nice well-shaped crown. Exceptionally hardy, drought resistant; one of t' fastest growing hardwood trees.

Ash, European Mountain

Sorbus aucuparia. A hardy tree of medium size, smooth bark, dense even top, bearing from July till winter, large clusters of bright red berries. A fine lawn

Ash, Oak Leaf Mountain

Sorbus querquifolia. Much like the European Mountain Ash, except in its leaves, which are of oak-leaf shape, light green with downy-white underneath. A very rare tree, perfectly hardy.

Birch, White European Betula alba.

A graceful, tall tree, getting a white bark in later years. Very showy, especially in groups of evergreens. Hardy as far north as the Dakotas and Minnesota.

Box Elder Acer Negundo. Ashtree of spreading habit, rapid growth, and is very hardy; succeeds in many places where other trees do not thrive; it stands a lot of dry weather. Where Elms, Hackberries, Locusts and others of the better class of trees can be grown, I would not recommend Box Elder. But for a shade tree in localities where others fail, use Box Elder tree in loc Box Elder.

Catalpa Speciosa Hardy Catalpa. An effec-Catalpa Speciosa Hardy Catalpa. An effective, tall tree of tropical appearance with its very broad, large, light green leaves, and purplish white blossoms. Grows rapidly, and resists dreught remarks bly

idly, and resists drought remarkably well. Can be grown as far north as the middle of Nebraska and northern Iowa.

Catalpa Bungei Umbrella Tree. Makes a very even globe-shaped head, dense, without pruning, and showy, with its large, light green leaves. The stem never grows taller. It is a fine showy dwarf tree for parks, lawns and cemetery planting. Hardy as far north as northern Nebraska.

Elm, American White Ulmus cana. The most popular of all shade trees for street and park planting. A large, spreading crown, rapid growth, and the fact that it is hardy most anywhere make this Elm just what it is: the popular favorite

Elm, Chinese Ulmus Pumilla. I am growing only the true Chinese Elm, which is the hardy strain. Resists drought better than most trees, and it is the most rapid grower I know of. This is best demonstrated by the oldest tree of this variety in Nebraska, which still stands on our home place. Father Sonderegger planted it there 23 years ago, as a 12-inch seedling that was furnished him by the U. S. Government for special testing purposes. The stem is now 23 inches thick, It is, a tall tree with a lofty, spreading crown. For this year I have very nice Chinese Elms, extra well rooted; they will assure you of quick results.

Elm, Moline

A special type of Elm that is just as hardy as the others, but differs in its habit of growth, being a tall, upright grower, almost like the Poplar. It is a rapid grower, the leaves are larger than those of the common Elm. For an erect, tall grower, you will find this Elm highly satisfactory.

Hackberry

A native tree with slender branches, bright shining green foliage. It grows fairly rapid, resisted our recent period of drought, and also the borers which have damaged trees in some localities. Hackberry will always remain one of the best trees for general planting throughout the Middle West.

Linden, American Tilia Am Ba wood. An excellent tree for shade and ornament, keeping a clean, healthy foliage, and blooming profusely in June. Fairly rapid grower, and makes a well shaped spreading crown. A tree you will bloom to be a shaped spreading crown.

Locust, Honey Gleditsia Triacanable native tree with spreading branches, forming a large crown of very good and even shape. The leaves are small, coming in sprigs of 18 and more, always free from disease or insects. For a hardwood tree this is perhaps the most rapid grower, and is perfectly hardy everywhere. Has very prominent thorns. This Locust never makes sprouts from the roots. The Honey Locust should be planted more frequently. frequently.

Locust, Thornless Gleditsia Triacanthos Inermis. For street and lawn planting it is one of the very choicest long-lived hardwood trees. Without pruning it will grow up to a beautiful shade tree, developing a splendid crown. It is a fast grower, second only to the Elms. Due to an unusually deep root system, grass or flowers can be grown with best success even close to this tree; it never makes sprouts or suckers from the roots. Entirely hardy, healthy and clean.

Maple, Soft or Silver Acer Dasy-Very hardy, easy to grow, and a rapid growing tree. Leaves finely cut, green with whitish color underneath.

Maple, Norway Acer Platanoides.

Maple, Norway Acer Platanoides.

Majestic form, perfect outline of the crown. It is a hardwood tree, leaves very large, deep green, changing to a pretty pale yellow in the fall. I recommend this tree for a hardy, long lived tree of special beauty.

Maple, Sugar or Hard Maple

Moline Elm

Chinese Elm

Nioba Weeping Willow

= PLANTING INSTRUCTIONS ==

Preparation of the holes is the same as described in planting instructions under fruit trees, beginning page 4. Cut the ends of the roots smooth before planting, and plant trees of 4 to 6 ft. size, 2 irches; larger trees 3 to 4 inches deeper than grown before In the nursery row. Water well at planting time, and water occasionally during dry weather the first year.

TREE5

Hackberry—A 15-year-old planting of a double row in the Beatrice Chautauqua park, that came through four years of extreme drought without showing signs of being af-

QUANTITY DISCOUNT. All prices quoted above are for one tree. On orders for three trees I allow a discount of 3%; on five trees 5%; on ten trees or more, deduct 10%.

FREIGHT. If your order for these trees amounts to \$15.00 or more, I pay the freight.

wind protection, it will certainly give perfect satisfaclion. Easy to grow.

Bur Oak Note the large, spreading crown of this tree, growing here in Beatrice (Chautauqua park). This is the typical shape of Bur Oak. A hardy hardwood tree, clean and healthy, its longevity has long become proverbial. For a live memorial to survive several generations, an Oak, particularly this Oak, is the right tree.

Pin Oak The tree that keeps the ter, shedding them in the spring when the new buds open.

Volga Poplar Rapid, upright growth, one of the most suitable trees to create a tall background, or offset the height of a tall building.

WEEPING TREES

Nioba Weeping Willow Near a pool, on the lawn, in parks and cemeteries, the Nioba Weeping in parks and cemeteries, the Nioba Weeping Willow adds great charm to the landscape. Its long, slender branches that touch the ground or water-edge in graceful arches, the light green foliage, and during the winter the golden yellow color of bark and branches, assure you of an attractive tree the year round.

Cutleaf Weeping Birch Grows tall, back, and gracefully drooping branches. Very attractive. The tree is hardy in the Middle West, except in the extreme northern part.

Tea's Weeping Mulberry I have the to 6 ft. size, which will always stay at that height, the crown developing, densely branched, and sending slender vine-like branches drooping down to touch the ground. My trees have good two-year grafted heads, \$2.20 each; 2 for \$4.00.

Scotch Pine Note photo above. An excellent pine for windbreak due to its exceptionally rapid growth, its hardiness, and vigorous development of stout branches.

Austrian Pine Second only to Secotch Pine in being a rapid grower, with stout branches, needles 4 to 5 inches long, and the tree is perfectly hardy. Λ most valuable

Bull Pine, Ponderosa Also o called Western Yellow Pine. Has very long needles: the tree is well and stoutly branched, very hardy. A fine tree for wind protection, and of nice appearance.

Juniperus Virginiana—Red Cedar Extra hardy, and the country's worst drought in splendid shape. This is the dark green strain of Red Cedar that holds the color well throughout the year. Wherever you plant this tree you make a great improvement: they make a grand showing the instant they are planted, due to their perfect shapes. My trees have been under expert care for years, with constant shearing they have become perfectly shaped and very dense. Trees of such quality are perfect specimens; there is nothing else that would improve the appearance of a home so promptly and so thoroughly. They are easy to plant, easy to get started, just plant the root-ball two or three inches deeper and water heavily as you fill in the soil around the root-ball.

for SPECIAL BEAUTY

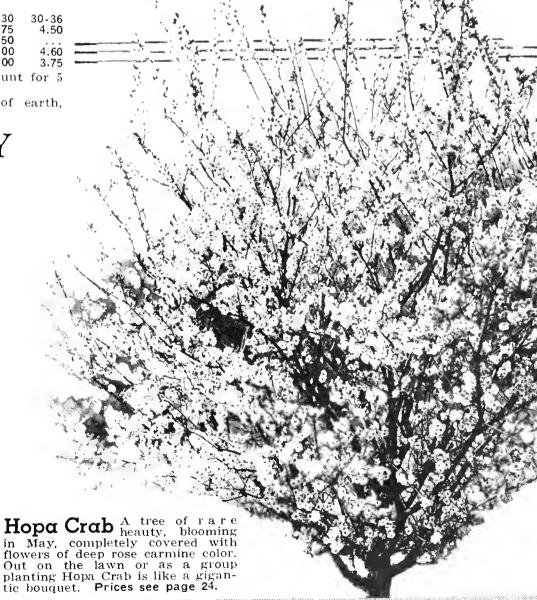

Prunus Triloba A most charming little tree, blooms heautifully in the spring, hlossoms double, light pink, very showy. Perfectly hardy. Makes a beautiful tree on the lawn or between shrubs. 2-3 ft. nice trees, 40c each; 3 for \$1.10; postpaid. 3-4 ft. branched trees, 60c each; 3 for \$1.65; postpaid.

Hansen Purple Leaf Plum All through the growing season a most showy tree, its reddish purple leaves showing up splendidly. As a single specimen on the lawn, or among plantings of tall shrubs with green or yellow foliage this tree shows up extra well. 2-3 ft. trees, 50c each; 3 for \$1.40. 3-4 ft. branched trees, 75c each; 3 for \$2.00; postpaid.

Paul's Double Flowering Thorn (Crataegus Oxycanthus Pauli.) A very handsome dwarf tree with shiny foliage. Blooms in late spring in compact clusters of small, double, crimson flowers. Fine for single planting or for groups. 3-4 ft. nice trees, \$5c each; 3 for \$2.40. 5-6 ft. extra heavy trees, \$1.50 each.

Pussy Willow Produces the large catkins in early spring. Very pretty. The tree is very hardy, a nice upright grower, with good healthy foliage. 2-3 ft., 50c each; 3 for \$1.35. 3 to 4 ft. nice trees, 70c each; 3 for \$2.00; postpaid.

Caragana—Siberian Pea Tree Can be grown in form of a tall shrub, or as a dwarf tree. For hackground and screen planting. It has a nice feathery foliage, and blooms in May, the flowers come in nice clusters of yellow pea shaped blossoms. 2-3 ft., 40c each; 3 for \$1.00. 3-4 ft., 50c each; 3 for \$1.30; postpaid.

26

Some of the roses recently introduced were patented by the originator under the new plant-patent law. This gives the originator the right to set wholesale and retail prices. As a rule prices on these roses vary from \$1.00 to \$3.00 each. After having tried some of these roses, and perhaps the most outstanding sorts, I have reached the opinion that they are not worth much more than some of the popular roses, in fact, some of the older varieties and some of those that are not patented are as good, in some instances better and hardier. At 50c each I would be willing to sell patented roses, but at the prices that would be dictated to me by the originator, and which would allow me a very large profit per plant, I cannot see my way clear to keeping my customers satisfied. But if you wish to have patented roses, I can get them for you, any variety you find nationally advertised, and I can furnish them at nationally advertised prices.

= PLANTING INSTRUCTIONS =

After preparing a large hole to allow plenty of room for all roots, plant the rose so deep that the bud just above the root will stand about 1-inch below the surface of the soil. Fill in with a mixture of good top soil to which may be added a small quantity of sand, and if at all available mix the soil with about one-fourth Peat Moss which assures better results from watering. When the hole is about full apply plenty of water to settle the soil, then finish filling up with medium moist soil. Cut the canes of the roses back to within 8 or 10 inches from the ground. Bank up moist soil or sand (or Peat Moss) to a helght of 8 inches, which is to be left over the rose until the roots are started and new sprouts appear along the canes. At that time remove the soil or other material that was used for banking up the rose. For winter protection cut back the roses in the very same manner, and cover them just as suggested above for starting.

PINK RADIANCE

Sonderegger Dwart and Rugosa RD5E5

Hugonis, Chinese Yellow Rose Grows up to a large bush, 7 feet tall, and spreading 5 to 6 feet. Perfectly hardy, retains a good, showy foliage throughout the summer. The sparkling buds begin to swell in April, a beautiful picture for several weeks, and finally when the blossoms open in June the bush looks like a shimmering mound of gold. Nice 2-year No. 1 shrubs, 45c each; 3 for \$1.10; postpaid.

Eskimo Beauty Roses Beautiful shrubs of the Rugosa Rose type, having the pretty Rugosa foliage, and perfect hardiness; needs no protection over winter anywhere. Very fine in the shrub planting or for a tall rose screen (4 to 5 ft.). Also in great demand for planting in cemeteries. The flowers appear in very pretty, showy clusters, double, and continue to appear through the greater part of the summer. I have the following varieties:

HANSA-RED

Very good, showy red. A beautiful flowering shrub. Perfectly hardy.

BELLE POITEVIN-PINK

Blooms very freely, in bright, magenta pink; flowers of pretty shape.

SIR THOMAS LIPTON WHITE

Nice large snowy white blossoms. A wonderful shrub for cemetery planting.

These three varieties, 2-year No. 1 nice shrubs, 45c each; 3 for \$1.10; 10 for \$3.00; postpaid.

F. J. Grootendorst
See photo at the right.
Note the be utiful cluster
of blossoms which come in a beautiful shade of warm
pink. This shrub produces a wealth of flowers, each
cluster practically a tailor-made bouquet. The foliage
is healthy, of the pretty Rugosa type, and the shrub
is entirely hardy in the Middle West without cover.
It will reach a height of about 4 ft. developing into
nice bush form. Therefore, very valuable in landscape
work, for background in the rose bed, as groups by
themselves, or in between regular flowering shrubs.
Being practically everblooming it will be highly attractive throughout the growing season. Nice 2-year No. 1
field grown shrubs, 50c each; 3 for \$1.25; postpaid.

To get your roses to deliver the greatest number of flowers during the blooming season water heavily in dry weather. An application of well rotted barn manure in early spring worked lightly in the soil, or a top application of Vigoro (according to directions) will be most effective. It will produce a stronger growth, and with proper pruning more flowers. Pruning takes place after every blooming period, removing all faded blossoms and their stems back to the nearest branch bud. Always prune in late fall or early spring (except Rugosa and Hugonis) cutting the plants way back for more new blooming canes from the ground up. Roses that need coverlng over winter are cut back before coverlng; cover after leaves have fallen.

leaves have fallen.

ABOVE: GRUSS AN AACHEN (Page 28.) BELOW: F. S.

GROOTENDORST

Climbing American Beauty

For years this rose has been the favorite for trellis work. It is a hardy rose, and its double flowers, red to crimson in color are very showy. They closely resemble the bush rose of the same name in shape, and are slightly fragrant.

Dr. W. Van Fleet The buds and flowers are of a pale pink color, and come on long stems, making them particularly suitable for cut flowers. Its foliage is a shiny bronze-green, and the plant is perfectly hardy except in the extreme North where all Climbing Roses should be laid down over winter and covered with soil. By far the finest of the flesh-pink climbers.

Hardy Field-Grown 2-Year No. 1 Roses 48c each; 3 for \$1.15; 6 for \$2.10; 10 for \$3.20; all postpaid.

Paul's Scarlet Climber For a very

showy scarlet rose you will find none better among climbing roses even at a much higher price. It is a most dependable bloomer, and having several blooming periods in normal growing seasons. The flowers are of perfect form, coming in attractive sets of several blossoms to each twig. Healthy and a good grower.

Silver Moon Different from other Climbing Roses are the large buds of Silver Moon, creamy white blossoms, semi-double with golden anthers; buds and blosoms appearing in attractive sprays.

TWO EXTRA HARDY CLIMBING ROSES

Seven Sisters For a good many years this rose has been the popular favorite, due to its special hardiness. Seven Sisters comes through the winter in good shape. The color of the blossoms varies from a rosy red to flesh pink, sometimes almost white; a pretty combination.

Crimson Rambler

A vigorous grower, often making vines 10 to 12 feet high in one growing season. Flowers of glowing crimson color produced in immense panicles, almost covering the entire vine. Does best on a trellis. Except in the extreme North the vines will come through the winter by just bending them over in late fall, and laying them on the ground.

Primrose One of the finest yellow climbers you can get. It is a beautiful rose of canary yellow color. Same as most climbing roses, except the extra hardy type, this rose should have a cover over winter for best results. Just lay the vines down on the ground in late fall, and cover with leaves. straw or soil lay the vines down on the ground in late fall, and cover with leaves, straw or soil. I also recommend that Climbing Roses are grown on wood or wire trellis support, not directly up against a solid wall that would not permit a free circulation of air.

Blaze U. S. Plant Patent No. 10. A nationally advertised rose, and as such the price is set by the patent holder. Blaze has the vigor, beauty and hardiness of Paul's Scarlet of which it seems to be a sport, and is also scarlet red. It is claimed to bloom a little more freely than Paul's Scarlet Climber, and the blossoms are perhaps slightly larger. 2-year No. 1 plants of Blaze, \$1.00 each; postpaid.

CLIMBING AMERICAN BEAUTY

Collection Hardy Climbing Roses

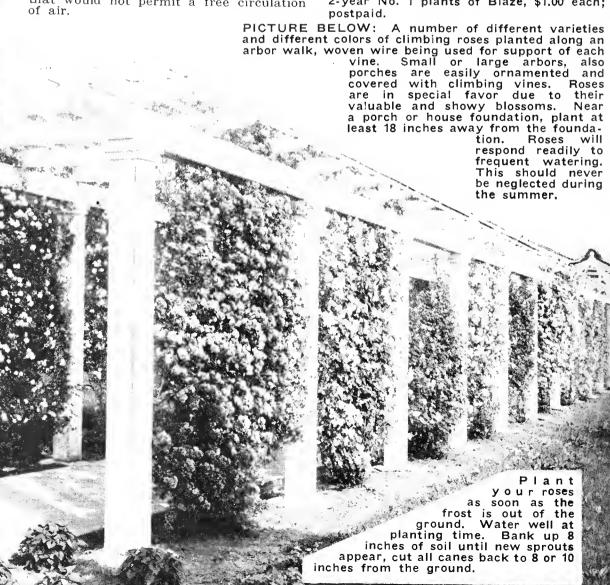

1 Paul's Scarlet

l Dr. W. Van Fleet

l Silver Moon

1 Seven Sisters

4 nice 2-year No. 1 Roses

Silver Lace Vine (Polygonum Auberti.) I know of no other vine that would grow as rapidly as the Silver Lace Vine, resist drought, cold and insects as well, and be so certain of blooming the first year. Wherever you need a good, hardy vine that covers trellis work good and fast you will greatly appreciate this vine. It blooms in late summer until heavy frost in the fall. Per plant, 50c; 2 for 90c; 4 for \$1.70; postpaid.

Ampelopsis Engelmani Clings firmly to stone or brick walls, old tree trunks, as for instance in the photo shown at right. Retains an excellent foliage throughout summer and fall, and is very dense. A very hardy climber, even for the North.

Ampelopsis Engelmani Clings firmly to stone or brick walls, old tree trunks, as for instance in the photo shown at right. Retains an excellent foliage throughout summer and fall, and is very dense. A very hardy climber, even for the North. 2-year-old plants, 35c each; 3 for 90c; postpaid.

Boston Ivy (Ampelopsis Veitchi.) A very fine wall cover, will cling to stone or brick walls. The foliage is small to medium in size, very dense, changing to a beautiful brilliant scarlet in the fall. It is a hardy vine but should not be planted on the sunny side of a building where it would green out too early. NIce 2-year-old strong vines, 45c each; 3 for \$1.20; postpaid.

Bittersweet (Celastrus Scandens.) A vine with nice foliage and bearing red berries in late summer which cling to the vine until late winter. Often used in winter bouquets. It is of fairly rapid growth, and is perfectly hardy. 2-year nice plants, 50c each; 3 for \$1.30; pospaid.

HONEYSUCKLE VINES

Japanese Honeysuckle Hall's Evergreen Honeysuckle. A very pretty vine with beautiful foliage, densely covering the vine, and with a wealth of creamy-white blossoms in midsummer, which are fragrant. In the South this vine is evergreen, with us here and north of here it will stay green until Christmas. Grows about 12 to 15 feet tall. Nice No. 1 plants, 25c each; 3 for 60c; 10 for \$1.80; postpaid.

Scarlet Trumpet Honeysuckle

Foliage odd shaped but attractive and blossoms of trumpet form, scarlet red and fragrant. Very good for trellis and ground cover. It is very hardy, and does well most anywhere. Nice 2-year plants, 30c each; 3 for 75c; 10 for \$2.20; postpaid.

Kudzu Vine (Pueraria Thunbergiana.) The Japanese variety, known as the most rapid grower of all vines. Will cover a large space in one season, freezes back in the winter but makes a complete new growth within one summer. This is the large leaved type for dense shade. Blossoms are rosy purple. 2-year-old plants, 30c each; 3 for 75c; postpaid.

Madeira Vine
toes—in the cellar. Make rapid growing vines with shining green leaves and white blossoms which are fragrant. A very clean grower, and can also be used for ground cover. 3 tubers, 35c; 12 for \$1.10; 25 for \$2.00; postpaid.

Trumpet Vine (Bignonia Radicans.) An old fashioned vine, with large, orange-scarlet trumpet shaped flowers nearly all summer. It is a woody vine, hardy, can also be used for covering walls or stumps. Nice 2-year-old vines, 40c each; 3 for \$1.00;

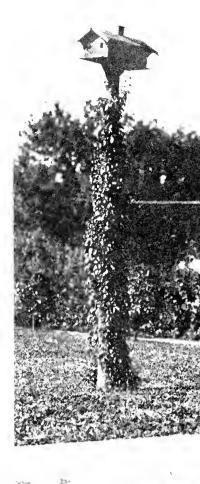

postpaid. Virginia Creeper Woodbine. This is a American vine, strong and hardy, a rapid grower with dark green foliage that changes to a showy scarlet in the fall. 2-year-old No. 1 plants, 30c each; 3 for

75c; postpaid.

Chinese Wistaria This vine produces beauty. They come in large grape-shaped clusters of purplish-blue, and are highly fragrant. The vine is stout and woody, branches out well over the top of an arbor. Normally these plants begin to bloom after three years. To assure blooming plants I graft my Wistarias with wood from blooming vines, and these will bloom after reaching the proper age. 2-year-old grafted plants, 50c each; 3 for \$1.30; postpaid.

Perennial Sweet Pea Lathyrus. For a ground cover, or for trellis of fence height you will find this plant one of the most freely blooming. Throughout the entire summer and fall this plant bears large numbers of pretty flowers, just like Sweet Peas, showy on the plant as well as in bouquets. Grows dense. They bloom in all shades of red and pink. Let this pretty vine cover your wire and lattice fences. 3 for 50c; 10 for \$1.50; post-paid.

Trailing Periwinkle Vinca Minor or Creeping Myrtle. A hardy evergreen plant that makes a pretty ground cover about 6 inches high, by making a dense network of rooting runners. It does well most anywhere, even where other ground cover plants and grasses fail. 3 plants for 40c; 12 for \$1.20; 25 for \$2.20; postpaid.

Ampelopsis . Engelman covering an old tree trun that is being used for bird house stand.

CLEMATIS

Clematis Paniculata Small flowering. A very hardy clematis of rapid growth, very suitable for trellis and arbor cover. Note arbor pictured at the right which is covered with this Clematis. Pure white blossoms, and a good clean foliage. 40c each; 3 for \$1.00; postpaid.

Clematis Coccinea Small flowering. This is the well known bell flowered Clematis, blooming in small red blossoms from June throughout the summer. It is a good, healthy climber, and blooms freely, quite hardy. Nice plants, 40c each; 3 for \$1.00; postpaid.

LARGE FLOWERING CLEMATIS

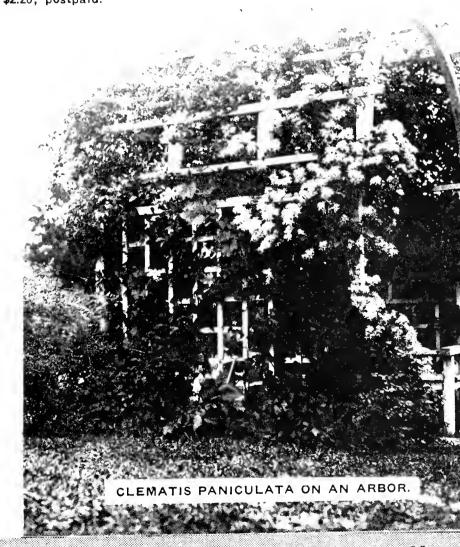

After planting them give them a mulch of Peat Moss or wood shavings in order to keep the soil cool.

Clematis Jackmani The Blue Clematis that is so well dark purplish blue, and the blossoms in large star shape appear plange numbers, very showy. Nice plants, 75c each; 3 for \$1.90; postpaid.

Clematis Mad. Ed. Andree The best red of the large flowering type; grows and blooms just as well as the Jackmani, in a combination planting with Jackmani and the white flowering Henryi, crossing the branches of all three you get a wonderful picture of the "Red, White and Blue" on your trellis. Nice plants, 75c each; 3 for \$1.90; postpaid.

Clematis Henryi A most beautiful Clematis of the large flowering type with pure white blossoms. Very good. 75c each; 3 for \$1.90; postpaid.

Depending on the distance I ship the large flowering Clematis either as potted plants (with root-balls) or regular two-year field grown plants. The latter are planted by spreading the roots out evenly, and deep enough to cover the crown buds $\frac{1}{2}$ to 1 inch

DOUBLE FLOWERING ALMOND

Almond, Double Pink

(Prunus Amygdalus.) Will grow to a height of 4 to 5 feet, making a very nice bush, with its main canes erect and bushy in its branches. It blooms beautifully in early spring. The slender branches are entirely hidden by stemless, double flowers that resemble small roses. Blooms in April before the shrub gets its leaves. Hardy as far north as the southern half of Nebraka. For the North I recommend Prunus Triloba instead. The latter is much hardier. 2-3 ft. nice shrubs, 50c each; 3 for \$1.40; postpaid.

Almond, Double White

In habit of growth, in In habit of growth, in its wealth of flowers, and in blooming time, also in hardiness the same as the Pink variety above. The blossoms are also perfectly double, and are pure white. 2 to 3 ft. nice shrubs, 50c each; 3 for \$1.40; postpaid.

Rose Acacia

Moss Acacia (Robina Hispida.) Grows to a height of 6 to 8 ft. with light green pinate leaves. Blooms beautifully in June. The flowers come in long, graceful clusters of graceful clusters of the state pea shaped blossoms of showy rose color.
Moss Acacia is hardy as far north as the southern half of Nebraska and Iowa, also in the Eastern states. Nice 2 to 3 ft. shrubs, 65c each; 3 for \$1.75; postpaid.

SHRUB PLANTING

Holes required for shrubs should be as large as those for fruit

Cut ends of root's smooth before planting. Use good top soil to fill in around the roots. Water heavily to settle the soil.

Japanese Barberry

Berberis Thunbergi. (See photo of shrub and berries below.) This is the true Japanese Barberry which positively carries no wheatrust or any other disease for which the common Barberry is known. Grows to a height of 2 to 3 feet, densely branched, and with a clean, healthy foliage, shining dark green throughout the summer, changing to a high tone of scarlet-bronze in the fall. The berries are of a showy crimson color, and remain on the bush the greater part of the winter. Without shearing this shrub grows into a dense natural globe form; however, it stands shearing well, and can be sheared to forms, especially in hedges. (See hedges page 18.) For foundation planting, for groups, for neat lawn border hedges this hardy shrub is one of the very best you can get. Has small thorns along the branches. My plants are exthe very best you can get. Has small thorns along the branches. My plants are exceptionally well rooted, easy to start.

healthy FIELD-GROWN

Photo at right: Althea Banner. Altheas come in a wide range of color, blooming beautifully in the

ALTHEA ROSE OF SHARON

They are all of upright growth, reaching a height of 6 to 7 feet, with a rich foliage, and coming into full blooming by late summer and through fall. My varieties listed below include the finest colors available in Altheas. They are hardy in the Eastern states, here in the Middle West I give them a cover of leaves or straw over winter, and cut them down to 2 feet from the round in the spring. With this care they come through the winter in fine shape, and make a good new bush form every summer, blooming well the same year. well the same year.

Althea Anemoneflora Very blossoms, semi-double, red with very deep red base. A pretty flower.

Althea Ardens Large double flowers of violet color, very fine.

Althea Jeanne d'Arc Flowers double, pure white. The only perfect White Althea there is.

Althea Banner A new Althea, white with a pretty crimson eye.

Althea Lucy This is the finest double red Althea, very showy.

Price of All Altheas

12 to 18 inch nice plants, 22c each; 3 for 60c; 10 for \$1.60. 2-3 ft. nice shrubs, 40c each; 3 for \$1.10; 10 for \$3.50; postpaid.

Artemesia Silver King This is a hardy Perennial, growing to a dense bush form about 2 feet high, and can be sheared to square or round form. The silvery white foliage and twigs, and compact growth of the bush are of outstanding beauty in beds of flowers, or between shrubs of o the r colors. Can also be planted 12 inches apart in the row for a pretty silver hedge. Reaches full growth in one season, and is cut back to the ground every spring. Very hardy. 25c each; 3 for 9c; 10 for \$1.50; postpaid.

Photo at the right: A bush of Artemesia Silver King. Try this showy

Caragana SIBERIAN PE A TREE. A shrub of upright growth, growing to a height of 8 to 10 feet, and generally used for background and screens along the lot or alley line. For this purpose plant them 12 to 18 inches apart in the row. It has a pretty feathery foliage, and blooms nicely in May, having yellow pea-shaped bossoms. For hedging size plants see page 19. Nice shrubs for quick results, 2-3 ft. size, 40c each; 3 for \$1.00; 10 for \$3.00. 3-4 ft. extra strong shrubs, 50c each; 3 for \$1.30; 10 for \$4.00; prepaid.

Choke Cherry Prunus Denissa.

bush, or can be grown in form of a
Dwarf Tree; will eventually reach a height of 25 feet unless Dwarf Tree; will eventually reach a height of 25 feet times pruned to lower size. Blooms in early spring in dense racemes of white flowers, which are very showy. Fruit dark red or purple black; of good size, and sometimes used for canning. Perfectly hardy everywhere. 2-3 ft. nice shrubs, 35c each; 3 for 90c; postpaid.

Desmodium

SWEET PEA SHRUB. A most magnificent shrub, covered with purplish pink flowers. Blooms abundantly from middle of September until frost. The height of the shrub is 3 to 4 feet, freezes down in the winter to the ground, and makes an entirely new bush every year. Strong roots, 50c each; 3 for \$1.35; post-

For Izaak Walton Club Members

Ornamental shrubs bearing berries for b i r d preservation: All Cornus Honeysuckles Elderberry (page 16) Waxberry Snowberry Barberry Sumac Choke Cherry Russian Olive Russian Mulberry

Forsythia Fortuni Golden Bell. See picture above. Grows up to 7 ft. One of the finest flowering shrubs in early spring, the brilliant golden yellow flowers appearing hefore the leaves develop, and coming in greatest freedom. Very showy. The shrub is of upright growth, foliage rich dark green. Forsythias are hardy everywhere. 12 to 18 inch nice plants. 25c each; 3 for 65c; 10 for \$2.00; postpaid. 2-3 ft. good shrubs, 45c each; 3 for \$1.20; postpaid.

Weeping Forsythia (Forsythia Suspensa.) 5 ft. tall. The flowers are much like those of Forsythia Fortuni as pictured above, and also appear in great abundance; however, the branches are gracefully arched, having a weeping effect. The brilliant yellow color of the flowers, coming at a time in early spring when few flowers are found outdoors creates much attention. Forsythias are easy to grow, and are hardy. 12 to 18 inch plants, 30c each; 3 for 80c; 10 for \$2.40. 2-3 ft. nice shrubs, 45c each; 3 for \$1.20; postpaid.

shrubs, 45c each; 3 for \$1.20; postpaid.

Golden Elder (Sambucus C a n adensis A u r e a .)

Makes a large shrub 8 to 10 ft. tall, and branching out well to make a pyramidal shape. Fits in well with groups of large shrubs, or for background planting, where its pretty foliage of golden yellow color contrasts well with the green of other shrubs. Blooms in July in large flat white clusters of blossoms, followed later by clusters of black berries. The latter are an attraction for birds. A highly desirable shrub for its foliage, perfectly hardy everywhere. 12 to 18 inch nice plants, 30c each; 3 for 80c; 2-3 ft. well shaped shrubs, 50c each; 3 for 45c; postpaid.

American Elder Also called Elgreen leaf native shrub. See page 16 for description and prices.

IFR 5HRUBS

Beauty Bush (Kolkwizca Amabilis) At the request of many of my customers who have bought this shrub from me years ago I am listing it again. It is a mass of pink flowers in May and June when this shrub blooms. The branches are nicely arched, the flowers are 34-inch across, and the shrub is reasonably hardy, from here north it should have a mulch of straw or leaves over winter. Will grow to a height of 3 to 4 feet. 18-24 inch nice shrubs, 65c each: 3 for \$1.75; postpaid.

Butterfly Bush (Budleia Magnifica) Makes an entirely new bush every year, and grows to a height of 4 to 5 ft. The flowers appearing through the greater part of the summer are of soft lilac color in long tapering spikes. Note photo on lower left which shows the graceful arching of the branches. My plants consist of nice strong roots, ready to grow and bloom. 40c each; 3 for \$1.00; postpaid.

Bush An improved strain of the above bush An improved strain of the above creation. Its extreme freedom of blooming, and the darker and perhaps showier lilac color of its blossoms is a shade rarely found in flowers. In bloom from August until frost in the fall. The root is entirely hardy, makes a new bush every spring. Nice strong roots, 45c each; 3 for \$1.20; postpaid.

CORNUS—DOGWOOD

The following four varieties are the best of the ornamental varieties of this large family of shrubs.

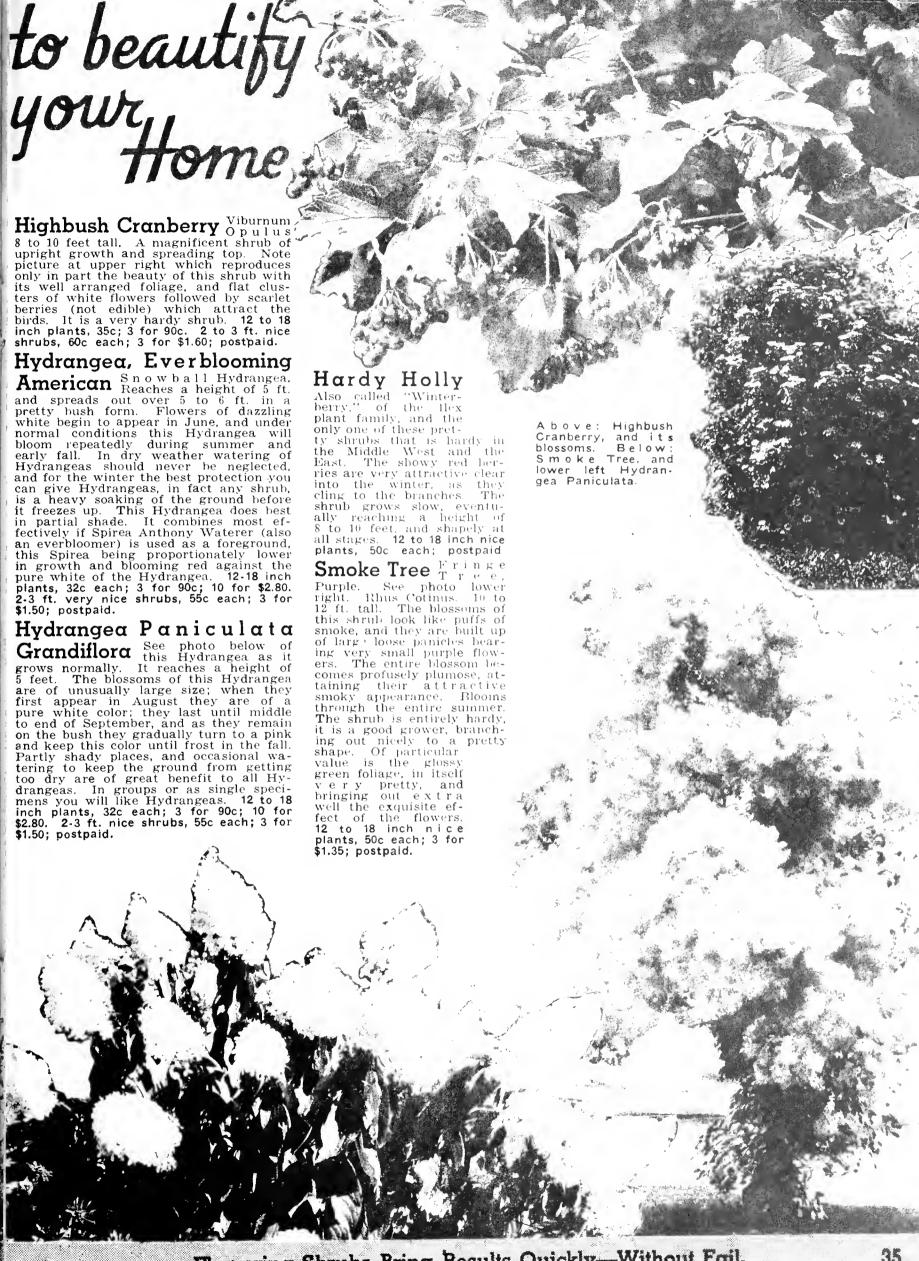

Cornus Aurea 8 to 10 ft. tall, margined yellow, branches out well, and the wood and twigs have a showy golden bark. Very showy in the winter, and perfectly hardy. 2 to 3 ft. nice shrubs, 60c each; 3 for \$1.60; postpaid.

Cornus Florida Grows to a height of 15 feet. This is the large, white flowering Dogwood which is hardy as far north as the southern part of Nehraska, and anywhere in the Eastern and Southern states. Excellent for its flowers, and for its red bark. 12 to 18 inch plants, 15c each; 3 for 40c. 2 to 3 ft. nice shrubs, 50c each; 3 for \$1.35; postpaid.

Cornus Siberica 8 to 10 ft. tall; ters of small white flowers in early summer. The bark and twigs are a shining red throughout the winter, and shows up wel!, especially in groups with other Cornus. 12-18 inch plants, 22c each; 3 for 60c. 2-3 ft. nice shrubs, 50c each; 3 for \$1.35; postpaid.

Cornus Stolnifera 8 to 10 ft. tall. This is the true Red Osier, with the smooth slender branches which are red. Flowers and berries of this variety are white. 12-18 inch plants, 25c each; 3 for 65c. 2-3 ft. nice shrubs, 45c each; 3 for \$1.20; post-paid.

WATERING FOR THE FIRST SUMMER In case of very dry weather the first year I recommend occasional watering of shrubs. Take away some soil around each bush, forming a shallow basin, fill this up two or three times with water, and the following day replace the dry top soil. This will keep your shrubs in good moisture for two or three weeks.

HARAM FLOWERING SHRUBS

BUSH HONEYSUCKLES (Lonicera)

Grandiflora Rosea Honeysuckle 10 to 12 feet tall. One of the finest and most popular of the tall growers. It is of upright growth, branches somewhat spreading, with bright green foliage. Blossoms bright pink, appearing in great profusion—May and June, later followed by showy red berries. Extremely hardy and of easiest culture. 12 to 18 inch plants, 28c each; 3 for 75c; 10 for \$2.20. 2-3 ft. nice shrubs, 45c each; 3 for \$1.20; postpaid.

Pink Tartarian Honeysuckle

8 to 10 ft. tall. Grows upright to a dense bush form that can be sheared to form if desired. A good bloomer, and hardy everywhere. The blossoms are of a showy clear pink color in May and June. 12 to 18 inch plants, 25c each; 3 for 65c; 10 for \$1.80; postpaid. 2-3 ft. nice shrubs, 45c each; 3 for \$1.20; postpaid.

Red Tartarian Honeysuckle

8 to 10 ft. tall, develops to the same perfect bush form that is characteristic with Bush Honeysuckles, but Red Tartarian produces the darkest red in its blossoms of all Honeysuckles. 2-3 ft. nice shrubs, 50c each; 3 for \$1.35; postpaid.

Morrowi Honeysuckle 4 to 6 ft. the Japanese variety of lower and more spreading bush form. Pure white flowers in May and June, rich crimson berries later in the summer, a pretty, healthy foliage are the reasons why landscapers use the Morrowi Honeysuckle freely. It is very hardy, and same as all Honeysuckles—easy to grow. 12 to 18 inch plants, 25c each; 10 for \$2.10. 2-3 ft. nice shrubs, 50c each; 3 for \$1.35; postpaid.

CLIMBING HONEYSUCKLES

SEE PAGE 31

MOCK ORANGE Philadelphus

Dianthaflora Mock Orange

Of medium size, pretty spreading bush form, and blooming profusely in May. Blossoms medium to large in size, of milk-white color and highly fragrant. For informal hedges to be grown without shearing, this shrub is very good, also for a good hardy flowering shrub anywhere, as it is perfectly hardy, and drought resistant. 12-18 lnch plants, 25c each; 3 for 60c; 10 for \$1.80. 18-24 inch shrubs, 35c each; 3 for 90c. 2-3 ft. nice shrubs, 45c each; 3 for \$1.20; postpaid.

Mock Orange Lemoine

4 to 5 ft. tall, flowers of medium size and often semi-double, white and very fragrant. Perfectly hardy and always sure to bloom (May and June). 18-24 inch shrubs, 35c each; 3 for 90c. 2-3 ft. nice shrubs, 45c each; 3 for \$1.20; postpaid.

Mock Orange Virginalis

Note picture at the right. Grows 4 to 5 ft. tall, and blooms double and semi-double. In most years this Mock Orange blooms at least twice, and often three times. First in May, and again along in August to late September. Fragrant, a very valuable shrub. 18-24 inch nlce shrubs, 50c each; 3 for \$1.35; postpald. postpald.

Japanese Quince RIREBUSH. Grows 4 to 5 ft. tall. Very early in the spring before the leaves are fully developed the large fiery red blossoms all along the stems and branches are a sight of rare beauty. Note photo of a blooming branch at upper right. This shrub stands shearing, and can be used to good advantage for most kinds of hedging and border work. Very hardy, and easy to grow. Bears small fruits of the guince type in work. Very hardy, and easy to grow. Bears small fruits of the quince type in

.50

Fern-Leaf Sumac—Staghorn R hus Typhina. An elegant shrub with a most beautiful foliage, growing to a height of 8 feet. The fern-like leaves are attractively arranged on long branches, light green in color turning to a most showy pinkish red in the fall. This sumac is perfectly hardy in the Middle West, most anywhere in the North and Bast. It is indeed one of the very finest foliage shrubs that grows. Of easiest culture, and requires very little care. 12 to 18 inch plants, 28c each; 3 for 75c; 10 for \$2.20. 2-3 ft. nice shrubs, well rooted, usually a single stem that develops a fine branch-work in one season. 50c each; 3 for \$1.35; postpaid.

When old bushes are to be cut down to make a new, young growth, this kind of pruning is done in very early spring before the shrubs get green. All other pruning, to keep shrubs in certain shapes, and which is applied to the branches only, should always

should always take place during the growing season and very shortly a f t e r s u c h shrubs have bloomed. After pruning (during dry per-iods) give the pruned shrubs a the good soaking of

JAPANESE QUINCE

Sonderegger Nurseries and Seed House, Beatrice, Nebraska

38

Sonderegger

Spirea Thunbergi SPIREA.

3-4 ft. tall, stands shearing well, and can be grown to a beautiful flowering hedge. (See page 18.) Its dense growth, the pretty shade of light green of its foliage, and at blooming time in early summer its profusion of neat white blossoms will be appreciated in your garden. Hardy as far north as the middle of Nebraska. anywhere in the Great Lakes region, and from there east. 12 to 18 inch plants, 20c each; 3 for 50c; 10 for \$1.50. 2-3 ft. nice shrubs, 38c each; 3 for \$1.00; 10 for \$3.00; postpaid.

Spirea Van Houtti "BRIDAL"

Grows up to a height of 6 ft. No other shrub is so popular as the Spirea Van Houtti, and justly so. It is a most dependable shrub in its hardiness, drought resistance, and splendid blooming. It has no insect enemies, always keeps a healthy dark green foliage which alone would make it a valuable shrub for hedging and foundation planting. May and June is the blooming time for this Spirea. Like huge snowdrifts, the branches of the entire shrub, arching as if under the weight of the blossoms with which they are completely covered—Spirea Van Houtti at blooming time. Of easiest culture, can be sheared to hedges; this should be done right after blooming.

Pink Fragrant Snowball

Viburnum Carlesi. Makes a well shaped hush, not quite as tall as the Common Snowballs; however, it branches out nicely. Foliage is gray-green in color. When the buds first appear they are a showy rosy pink color, standing in small clusters. As they open they reveal a color of cream with a pink shading, turning to a creamy white towards the end of the blooming season. It is pleasantly scented, resembling the fragrance of the Gardenia. Should have a partly shaded place, and plenty of water in dry weather. 15-18 inch nice plants, 75c each; postpaid.

Old Fashioned Snowball

(Note photo at the left, page 38.) (Viburnum Opulus Sterile.) One of the large type shrubs, growing to a height of 10 to 12 feet. This is the old time garden favorite. In order to appreciate the beauty of this Snowball one must see it somewhere in the corner of an old garden, where it can give testimony of its hardiness, its long life, pretty shape, and its wealth of flowers. Blooms in May. I recommend a partly shaded place, the east or north side of a house or wall, and plenty of moisture during the summer. It is an upright grower, spreading to a large square form, a clean; healthy shrub. 12 to 18 inch nice plants, 35c each; 3 for 95c; 10 for \$2.90. 2-3 ft. good shrubs, 55c each; 3 for \$1.50; postpaid.

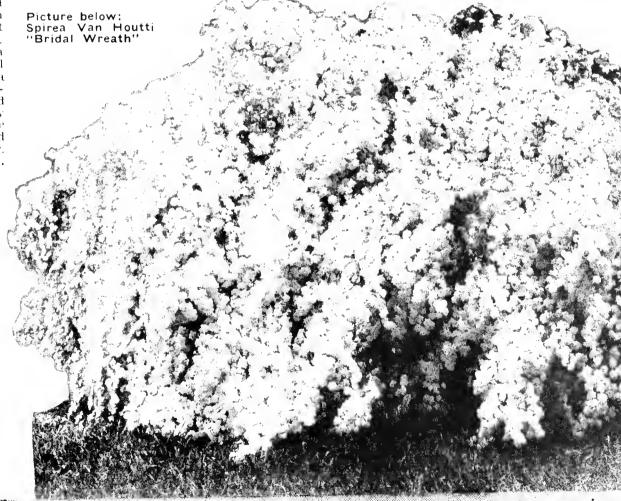

Weigela Eva Rathke 3 to 4 ft. tall, blooms during the greater part of the summer, and just like the Weigela Rosea it produces its blossoms in beautiful sprays. The individual flowers are of a brilliant crimson color, a beautiful shade. Does well in the shade. 12 to 18 inch nice plants, 35c each; 3 for 90c. 2-3 ft. fine shrubs, 50c each; 3 for \$1.35; post-paid.

Red Waxberry (Symphoricarpus tt. tall. This shrub is a native of Nebraska, and often called "Indian Berry." It brings forth large numbers of showy red berries which cling to the branches practically all through the winter. An attraction for birds. I recommend this shrub especially on account of its healthy growth, extreme hardiness and drought resisting qualities. 12-18 inch plants, 15c each; 10 for \$1.30, 18-24 inch shrubs, 28c each; 3 for 75c; 10 for \$2.30, 2 to 3 ft. nice shrubs, 35c each; 3 for 95c; 10 for \$2.80; postpaid.

White Snowberry (Symphoricar3 to 5 ft. tall. Perfectly hardy anywhere,
and does well in most any location. It
grows to a pretty bush form, with white,
show berries adorning the branches in
the fall, which cling to the bush through
the greater part of the winter. 12 to 18
inch plants, 20c each; 3 for 50c; 10 for
\$1.50. 18-24 inch shrubs, 32c each; 3 for
\$5c; 10 for \$2.50. 2-3 ft. extra nice shrubs,
38c each; 3 for \$1.00; 10 for \$3.00; postpaid.

Most beautiful dull gold.

WHITE

POLAR STAR
Pure white, a pretty flower
for bedding and bouquets.

LILAC-PINK

MADAME VAN BYSTEIN Lilac-pink. Known for years as the only Dahlia of this type and color.

PURPLE

Planting and full instructions on growing Dahlias with every shipment.

Honorabilis Of neat, compact growth, blooms very freely, medium size, well shaped blossoms. Standards showy yellow, with falls almost brown.

LAVENDER and VIOLET IRIS

Amos Hybrid About 30 inches tall, very large flowers with standards of violet,

and falls of rich purple color.

Dalmatica Pallida Tall, very large, an old sort. Standards lavender, falls deep lavender, blooms late.

Monsignore Standards rich satiny violet, purple crimson falls, and lighter shades at

the edges. Blooms late.

Lavender Very large flower of pure lavender shading.

PINK and RED IRIS

Large Pink Tall grower, well shaped flowers, delicate light pink standards, wine-red falls, blooms very freely.

Red Intermediate
There is no true red Iris. Red Intermediate with warm pink to wine color shading comes as near to being a red Iris as can be had. Of low growth, fine for border, blooms early.

BLUE and PURPLE IRIS

Sonderegger's Blue Iris Medium height, very large blossoms of orchid shades, standards delicate lavender, and rich violet falls.

Blue Bird Standards of delicate blue, falls of dark violet, medium height, blooms freely.

Blue Intermediate Dark blue. Of the intermediate type which is a short stem, and early bloomer, forming compact bushes.

Perfection Standards light blue, falls dark velvety violet-black with orange beard, blooms extra freely.

Plicata Dark purple with lilac falls, short to medium in height, blooms early.

Satch Large blossoms on tall strong stems, standards a fine lavender shade with very dark blue falls. A fine Iris.

Siberian Blue Pretty small flow-comes very early, excellent for the border.

California Of medium height, with very dark reddish purple

TWO-TONE IRIS

Frederick Very pretty pale lavender with light blue falls, very

Madame Chereau A white Iris fringe on standards and falls. A tall grower, aways a fine bloomer.

Nibelungen Standards old gold, falls dark wine-red.

Rhein Nixe Ivory-white standards, falls lovely mauve with white edge. Blooms late, very showy.

Madame Louise Victoria

A wonderful new Iris of medium height, that blooms very freely. Light lemon standards with pretty purple veins. Falls a dark purple with gold edge. Midseason. One of the prettiest of all Iris.

MIXED IRIS

Many varieties, all fine plants, all colors and shades, not labeled. 12 for 60c; 25 for \$1.10; postpaid.

Mexican Tuberose (Note photo on e of the finest and most of the finest and most fragrant flowers we can grow. Stands heat and drought well, requires little care, except that the bulbs are taken up in the fall. Plant 4 inches deep. Always sure to bloom. Grows 16 inches tall, blooms in September. 3 for 25c; 6 for 40c; 12 for 75c; postpaid. postpaid.

Elephant Ear Caladium Esculantum. Grows from a bulb in one season to full size. Leaves large, of tropical appearance, on stiff stems. It is one of the prettiest foliage plants and is of easiest culture. For borders to Canna beds, near a pool Caladiums are always much admired for their luxuriance. Leaves bright showy green. The bulbs are taken up in the fall, and stored like Gladiolas in a frost proof dry cellar. You will like this plant, and I urge you to give it a trial. Nice strong bulbs. 25c each: 3 for 60c: 10 for Nice strong bulbs, 25c each; 3 for 60c; 10 for \$1.60; postpaid.

Photo at right: A Caladium Border.

Hardy GARDEN FLOWERS

Achillea the Pearl See the picture to the right. white flowers from July until frost. Excellent for horder planting and for the cemetery as it is perfectly hardy summer and winter.

Achillea Tomentosa 8 inches tall, a rock plant of creeping habit. Use them in borders and rock gardens. Its pretty yellow flowers appear in great profusion from June until August.

Baby's Breath Gypsophila. 2½ ft. tall. Blooms white in early summer and again in the fall, coming in charming sprays of miniature flowers. Excellent for bouquets.

Bleeding Heart Dicentra. 18 inches tall. The beautiful old fashioned type that blooms red in the spring. Very good. Nice roots. 45c each; 3 for \$1.20; postpaid.

Columbine Chrysantha The golden Columbine. A flower of outstanding beauty, one of the finest bedding and cut flowers of the spring.

Canterbury Bell ² ft. tall. Comes in blue, pink and white, mixed. Always showy and attractive in the flower garden. Blooms in June.

Campanula Glomerata

Produces
large heads of light blue flowers. This
is the hardy Canterbury Bell, a native
plant. 35c each; 3 for 80c; postpaid.

Coreopsis ² ft. tall. Blooms from June until fall. Showy golden yellow, very nice in the garden and as cut flowers. Blossoms are of the daisy shape.

DELPHINIUM

Belladonna Hybrids Note picture. Of medium height, blooming most continually from June until late fall. Flowers range in color from a delicate blue to a quite dark blue.

Chinese Blue One of the best blue Delphiniums, blooms very freely over a long period, and is perfectly hardy.

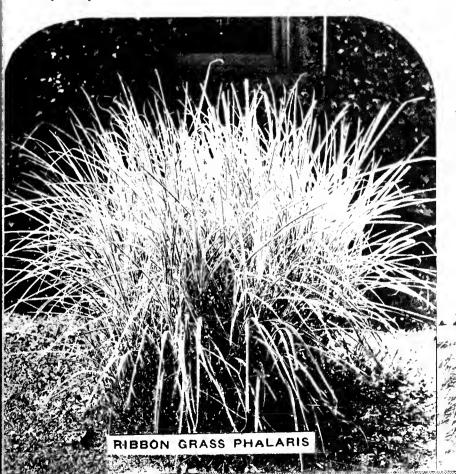

Improved Bellamosa A beautideep blue, blooming freely. For bedding or background, and for cut flowers include Delphiniums in your planting.

ORNAMENTAL GRASSES

ORNAMENTAL GRASSES
Hardy Pampas Grass 1 0 ft.
tallest variety there is, with pretty
plumes.

Eulalia Gracillima 5 ft. tall, pretty plumes, narrow dark green leaves.

Ribbon Grass, Phalaris ² feet tall. Easy to grow; leaves neatly striped yellow and green; very showy in the flower bed, rock garden. See picture lower left.

Blue Flax Linum Narbonense. 16 to 18 inches tall, branches in beautiful arches from the ground up with a delicate foliage of bluish green color, very ornamental. The pretty, neat skyblue blossoms appear in June and July. A very fine plant.

HARDY FERNS

Price of all 3 Hardy Ferns: 30c each; 3 for 70c; 10 for \$2.00; postpaid.

Wood Fern ² ft. tall, with beautitropical luxuriance. A plant of rare beauty, and perfectly hardy outdoors.

Maidenhair Fern ¹² inches tall.

Fronds forked

at the summit of a slender, polished black hair-like stem from which the plant derives its name. Very good for a nice shade plant and ground cover.

Ostrich Fern 2½ ft. tall, develops a vase-shaped mass of fronds which are highly decorative. This plant luxuriates on shady, moist soil where it spreads rapidly, forming a splendid fern bed. Perfectly hardy.

Forget-Me-Not Myosotis Palustris. 8 inches tall. The hardy true blue type, and one of the loveliest small flowers that grows. Blooms all summer, and makes a dense mat of foliage and flowers. Does best in the shade. 28c each; 3 for 65c; 10 for \$1.80: postpaid. \$1.80; postpaid.

Gaillardia—Blanket Flower

18 inches tall. I know of no hardy flower that would bloom so freely, and continually, as the Gaillardia. Its flowers of large daisy-shape come in beautiful orange and red colors with centers of brown-red, cushion shaped. Should be in everv garden.

Golden Glow-Rudebeckia 5 to 6 ft. tall with large ball shaped golden yellow blossoms in July and August. Very good for background planting.

Lythrum Roseum

2-2½ ft. tall, of upright

growth, in bloom from July to September if the faded blossom spikes are cut off. This is one of the showiest hardy plants for groups and border plantings, the entire growth and rose-lilac blossoms staying within a neat hedge-like symmetrical form. For an excellent personnial border form. For an excellent perennial border, hardy and drought resistant plant Lythrum Roseum

Platycodon—Chinese Bell-

flower 12 inches tall, the Mariesi strain, which is of erect growth, and showier than the tall variety which needs a support. Blooms most freely throughout the summer. Blossoms of pretty bell shape, in white and blue, your choice. Makes a wonderful border plant, also suitable for rock gardens.

Salvia Pitcheri—Blue

Sage 3 ft. tall, freely branching, with large flowers of rich gentian blue color. One of the finest flowers of early autumn.

Red Sage Monarda Didima.

18 inches tall, perfectly hardy with pretty flower spikes of bright red color. Extra

Shasta Daisy 18 inches tall, golden center. The large flowering type. One of the loveliest flowers for the garden and bouquets; perfectly hardy fectly hardy.

- PLANTING INSTRUCTIONS

Plant your Gladiolas about 4 inches deep, 6 inches apart. By planting them at a much greater distance apart they may grow a little too tall and would have to be staked. Plant in good rich garden soil, water freely. Most varieties bloom 75 days after planting, the late varieties about 85 days. For cut flowers make several plantings weekly, beginning first of May. Take the bulbs up in late fall, store them in a frost-proof cellar.

This is a photo of Picardi, a flower I recommend for every Gladiola planting. My Gladiolas are all of the large flowering type. I have discontinued entirely all old fashioned small flowering sorts which were formerly known as "Primulinus Gladiolac" In my assortment for 1938 I have carefully included all those varieties which have been of outstanding value, leaving out all those that must have some special soil or care to do well, and including enough varieties to give you the widest possible range of color.

ERNEST SONDEREGGER

With 1938 my 26th year of actual work be-gins, under the gins, under the trade-mark of the House of Sonder-egger. For the greater part of that period 1 have been the manager of our manager of our seed department. To build up our name for good seeds I have always concentrated my efforts on the selection of better varieties, puting them to my own tests before recommending them—testing every grain of seed before it is packed, and paying prompt and careful attention to

SONDEREGGER prompt and careful attention to any requests from my customers. Just 26 years of serving you—and it has been a pleasure; now that I am beginning my second "Quarter Century" in the business house that my father built, I have but one wish, and am glad to make it known here: To have the opportunity of remaining in contact with you, helping you in any of your garden problems, and furnishing you whatever you may like to sow. Good, fresh seeds, true to name and prompt service on your orders.

WHEN SEEDS MUST BE THE BEST

in purity and germination in order to make a perfect stand on the space you have, and must be absolutely true to name, to produce for you what you have selected in varieties from your own experience or from a reliable seedbook-

SONDEREGGER SEEDS ARE THE ANSWER.

—And if you are one of those alert people who are fascinated by Mother Nature's way of producing crops from soil and seeds-

-And if you like to get of the old favorites those that are still worth planting, of the new creations the most significant—

-Then you will like this book, because it tells you facts established by actual tests, so you can select intelligently-

-Then you will like Sonderegger Seeds that are inspected most rigidly as to their germination, purity, and are always packed and shipped with utmost care, to be true to name, and to reach you in good condition.

- 1/2 lb. Alaska.
- $\frac{1}{2}$ lb. Everbearing.
- 1/2 lb. American Wonder.

ALL FOR 49c POST-

C494 Extra Early May Pea

(50 days) A variety of great merit. The vines are dwarfish, ahout 18 inches high, completely covered with an ahundance of the finest, well filled pods. Large peas, quality extra good. Will grow without support, unless in extra favorable growing weather. Packet, 5c; ½ lb., 20c; lb., 35c; 3 lbs., \$1.00; postpald.

Nitragin

INOCULATE ALL LEGUMES Treat all your Beans and Peas with Nitragin before you sow. You will get a better stand, a better stand, a better stand, a better orop, and it improves the soil. Cannot be used except with the seed before sowing. Not good for any other kind of seeds. Garden size tin, enough to treat 4 lbs. of seed, 10c; postbaid.

SUGAR PEAS (Edible Pods)

C516 Sonderegger's Giant Sugar (70 days). They are used just like string beans. The large, broad, flattened pods are of waxen yellow color, stringless, very sweet and tender. Should have a support; grows 4 to 5 ft. high; a fence is best. Packet, 8c; ½ lb., 25c; lb., 40c; 3 lbs., \$1.10; postpaid.

C518 Dwarf Gray Sugar One of the sweetest of all Sugar Peas. Pods of good size, and well filled. You can grow them without brush or trellis. Packet, 8c; 1/2 lb., 23c; lb., 38c; postpaid.

Packet, 8c; ½ 1b., 25c, 1c., 5c., C520 Tall Gray Sugar Will get 4 to 5 ft. tall. Grow them along the fence. Produces extra well, large, brittle pods of finest flavor, sweet and tender, very good for canning, and main crop. Packet, 8c; ½ lb., 25c; lb., 40c; 3 lbs., \$1.10; postpaid.

Plant Sugar Peas in May, when you plant Beans, they cannot be sown as early as

C498 American Wonder

(52 days) An old standard variety, known as a very early wrinkled pea. The vines grow 10 to 14 inches high and do not need brush or sticks for a support. Fods medium size, well filled. For the city garden I consider this the hest. Packet, 5c; ½ lb., 20c; lb., 35c; 3 lbs., \$1.00; postpaid.

C512 Everbearing (60 days) For midseason and main crop I recommend this variety. Pods are large, well filled with very large peas of superior flavor. Vines of robust growth and branching habit, blooming repeatedly after picking. 20 to 24 inches high. Packet, 5c; 1/2 lb., 20c; lb., 35c; 3 lbs., \$1.00; postpaid.

postpaid.

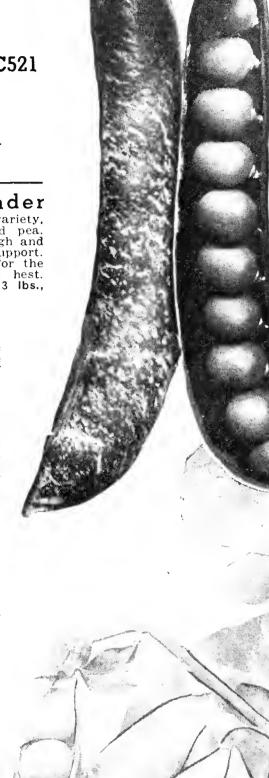

C506 **Peter Pan** For th Middl West this is a very good wrinkled 18, inches high, of sturdy growth, dark green, and wonderfully productive. The pods measure 4 to 5 inches in length, and contain 8 to 10 deep bluish-green sweet, wrinkled peas of finest qualities. ity. They should be in every planting. Packet. 80 1/2 14 27 Packet, 8c; 1/2 lb., 20c; lb.,

35c; 3 lbs., \$1.00; postpaid.

C488 **Alaska** (45 days) The earliest of all peas. Grown very extensively for canning, especially by market growers. It is a splendid bearer. Pods 2½ inches long, well filled with usually 6 light green peas. Height 2 ft. Pkt., 5c; ½ lb., 18c; lb., 30c; 3 lbs., 85c; postpaid.

C490 Little Marvel

(60 days) Can be planted very early. It is a dwarf grower (15 inches high) and produces an ahundance of well filled pods 5 to 7 inches long. Peas are medium size, excellent in quality. Packet, 5c; 1/2 lb., 18c; lb., 30c; 3 lbs., 85c; postpaid.

SALSIFY **PARSNIPS**

C586 Salsify or Oyster Plant Perfectly hardy, and may remain outdoors over winter. Culture same as Carrots. For winter use store roots in sand in the cellar. Sow 1 oz. of seed for 50 ft. row, and thin out to 4 inches apart in the row. Makes a most delicious vegetable dish. Try them once, you will never be with out Salsify in your garden. Packet, 5c; oz., 15c; 1/4 lb., 50c; lb., \$1.65; postpaid.

CARROTS

C256 Sonderegger's Improved Half Long (65 days)
For the
Middle West one of the best, both for
home use and for market. The roots Middle West one of the best, both for home use and for market. The roots and flesh are of a bright orange red color, of medium size, and fine grained. You will be pleased with this carrot, its good production, and its fine quality. Packet, 10c; oz., 15c; 1/4 lb., 40c; lb., \$1.00; postpaid.

(60 days) A short, stumpy variety, very good for early use. Short, almost as large around as long, and of very good quality. Packet, 5c; oz., 15c; 1/4 lb., 30c; lb., 90c; postpaid.

7 to 8 inches long with an even rich red color clear through. Exceptionally smooth, tops short and strong. Practically no small roots. Always sweet and tender; the finest for fall and winter crop. Packet, 7c; oz., 25c; 1/4 lb., 50c; postpaid.

C262 Early Chantenay

An old standard sort, early, smooth and of fine quality. Very productive under normal conditions; one of the best early table sorts. Packet, 5c; oz., 12c; 1/4 lb., 30c; lb., 90c; postpaid.

C258 Danver's Hali Long

(75 days) About 10 days later than Sonderegger's Improved Half Long, and not quite so fine grained; it is an excellent Carrot, however, for home use and market. Packet, 5c; oz., 10c; 1/4 lb., 25c; lb., 90c; postpaid.

C254 Sonderegger's New Scarlet (70 days) Of good size, in fact the finest large Carrot with excellent table qualities. For second early, and for main crop in-clude this fine variety in your planting. You will be well pleased with it. Packet, 10c; oz., 15c; 1/4 lb., 40c; lb., \$1.00; postpaid.

STOCK CARROT

For Rabbits, Horses and Cows.

C266 Long Orange Grows to a large size. It is the largest of all Carrots I have. Quality fair for table use, but coarse grained. I recommend it mostly for feed; it is a heavy yielder. Packet, 5c; oz., 10c; 1/4 lb., 20c; lb., 75c; postpaid.

C261 "BIG 3" CARROT COLLECTION

SONDEREGGER'S NEW SCARLET, OXHEART SONDEREGGER'S IMPROVED HALF LONG 1 PACKET OF EACH, 3 EXCELLENT SORTS

PARSNIPS

1 oz. will sow 200 ft. row, 5 pounds per acre. Sow early in the spring, rows 15 inches apart, when well up thin out to 5 inches apart in the row. They are at their best in late fall after frost. Can be stored for winter use.

C480 Improved Guernsey (85 days) Roots thick, of medium length, quality of this Parsnip is excellent, roots smooth, and fine grained. Very satisfactory for home use or market. Packet, 5c; oz., 10c; 1/4 lb., 25c; lb., 85c; postpaid.

Photos: Below, Sonderegger's Improved Half Long (2 specimens). At the right, top: Salsify; middle: Sonderegger's New Scarlet Carrot; bottom: Early Chantenay.

C482 Hollow Crown or

Cabbage. MOST COMPLETE Brussels Sprouts.... C238 Premium Late Flat

Cll8 Brussels Sprouts Note photo at left. This is the Improved Dwarf Variety. The miniature heads, which are very solid, and most delicious, grow along the stem of the plant. Culture

same as cabbage. They like a cool, damp place. Packet, 10c; oz., 25c; 1/4 lb., 80c; postpaid.

SAVOY CABBAGE

C240 King of the Earliest The best of all sorts of Savoy cabbage that I have ever tried. Medium size, solid, excellent for cooking. Packet, 8c; oz., 25c; postpaid.

C225 Just Right Heads medium and flat, 4 to 5 pounds each. Very fine quality, very early, making nice heads in 65 days. I recommend this variety knowing that you will be well pleased with it. Packet, 10c; ½ oz., 25c; oz., 40c; ¼ lb., \$1.25; postpaid.

C224 Early Jersey Wakefield (65 days) Pointed, an old variety, but still in great favor with market growers as well as home gardeners. Heads conical, very solid, weighing 3 to 4 pounds. Outer leaves small, can be planted close together. If transplanted early the heads are usually ready to use by July 4. Packet, 5c; oz., 20c; 1/4 lb., 70c; postpaid.

C234 Sure Head (100 days) Uniheads, fine texture, extra large, round, slightly flat, and always sure to produce well. Packet, 5c; oz., 20c; 1/4 lb., 70c. C236 Sonderegger's Im-

proved Danish Ballhead

(100 days) Excellent market size, not too large. Very hard, almost round, fine grained and juicy, will weigh one-fourth more than heads of the same size in other varieties. For main and late crop. Packet, 10c; oz., 30c; 1/4 lb., 98c; postpaid.

C223 Golden Acre (65 days) Early, heads very solid, 6 to 8 inches in diameter, 3 to 4 pounds. Very fine grained, and of excellent quality. I recommend it for summer use. Packet, 10c; 1/2 oz., 20c; oz., 35c; 1/4 lb.. \$1.00; postpaid.

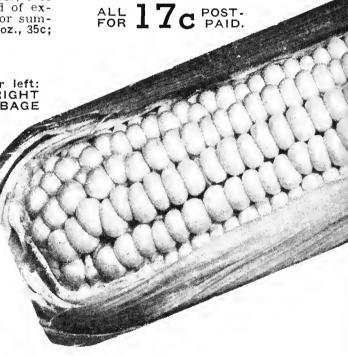

Dutch (100 days) One of the best for market; immense, solid, uniform heads from 10 to 12 pounds each, very late, and good for storing. A leader for sauerkraut. Packet, 5c; oz., 20c; 1/4 lb., 60c; postpaid.

C226 Early Copenhagen Market (70 days) Short stem, few outer leaves, heads round and very solid, from 3 to 4 pounds in weight, and of fine quality. An early, dependable cabbage, and for the market grower a good shipper. Packet, 7c; ½ oz., 20c; oz., 30c; ¼ lb., 85c; postpaid.

C228 Sonderegger's Summer Ballhead Perfectly round, solid, very good midseason cabbage; good for sauerkraut. Should be in every planting. Packet, 10c; oz., 30c; 1/4 lb., 98c; postpaid.

"BIG 3" CABBAGE COLLECTION C227

1 PACKET OF EACH: GOLDEN ACRE SONDEREGGER'S SUMMER BALL HEAD. BALL HEAD. LATE FLAT DUTCH.

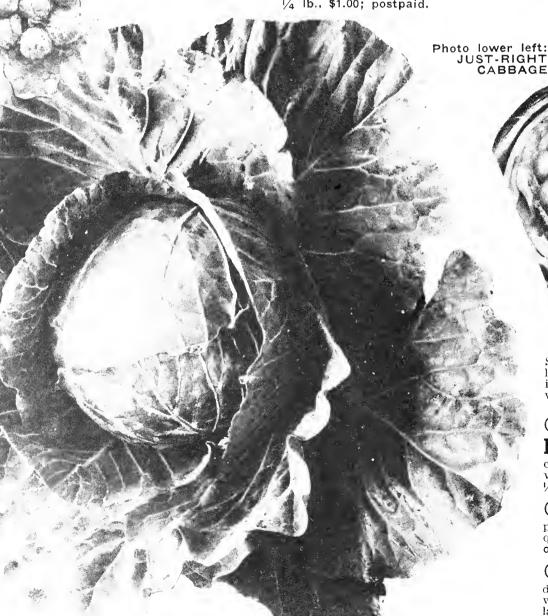

CAULIFLOWER

Sow early in hotbeds or flats. When plants are large enough transplant 3 inches apart. Plant in the open 2½ feet apart when the ground is

C246 Sonderegger's Improved Earliest Dwarf (95 days) Heads 6 to 8 inches in diameter, compact, uniform in size, fine grained and pure white. For fall crop sow in May. Packet, 20c; 1/4 oz., 65c; oz., \$2.10; postpaid.

C248 Early Snowball (90 days) pact, fine grained. This is imported seed, finest quality, true to name. Packet, 20c; $\frac{1}{4}$ lb., 65c; oz., \$2.25; postpaid.

C250 New Danish Giant (130 days) dry weather fairly well, and with occasional watering in dry times it will do well. Extra large, the finest for late crop. Packet, 15c; 1/4 oz., 60c; oz., \$2.10; postpaid.

Kohlrabi CAULIFLOWER

CHINESE CABBAGE

C222 Celery

Cabbage Easy to grow; sow in July for fall use. Light frost in use. Light frost in fall does not hurt these plants. It is a most delicious vegetable for cooking, for salads or cold slaw. Makes oblong solid heads. Packet, 10c; heads. Packet, 10c; oz., 35c; 1/4 lb., \$1.00; postpaid.

KOHLRABI

C342 Early White Vienna

(60 days) For your home garden or market a fine Kohlrabi, 3 to 4 inches in diameter, pure white inside, excellent quality, and easy to grow. Packet, 7c; oz., 25c; 1/4 lb., 50c; postpaid.

C344 Early Purple Vienna

(60 days) Much like the white variety listed above; however, of bluish purple color outside, with white flesh. Cook Kohlrabi the same as cabbage or turnips. Packet, 5c; oz., 20c; 1/4 lb., 50c; postpaid.

C244 Mammoth Red Rock Cabbage The finest, surest heading sort of Red Cabbage, of extra fine quality. Packet, 10c; oz., 30c; postpaid.

SWEET CORN

Plant Sonderegger's Better Strains

> C304 Sonderegger's Improved Early Evergreen

> (70 days) 7 to 8 inch ears, well filled with sweet kernels, tender, very fine for table use or canning. Packet, 8c; 1/2 lb., 20c; lb., 35c; 3 lbs., \$1.00; post-

C306 Country Gentleman

(70 days) Very productive, kernels irregular, very deep, pure white and very sweet. Ears 9 inches long. A very good variety. Packet, 5c; ½ lb., 20c; lb., 35c; 3 lbs.. \$1.00; postpaid.

C308 Stowell's Evergreen (80 days) Much used by the canning factories, also fine for drying. Large ears, tender, and sweet. Packet, 5c; ½ lb., 18c; lb., 30c; 3 lbs., 85c; postpaid.

C296 Sonderegger's

Earliest (60 days) Very large ears with pearly white kernels of finest quality. Where seasons are short or where extra early crops are desired plant this corn. Packet, 8c; 1/2 lb., 18c; lb., 30c; 3 lbs., 85c; postpaid.

Early Golden (65 days) many years of careful selection, I have developed this Sweet Corn. It has proven to be one of the finest sorts of Sweet Corn for the Middle West. Stalks of medium height, ears 7 to 9 inches long, well filled with large golden yellow kernels which are unusally sweet. Extra early, fine for table use and canning. Packet, 10c; ½ lb., 20c; lb., 35c; 3 lbs., \$1.00; postpaid. C292 **Sonderegger's**

C305 Golden Cross

Hybrid Stalks about 6 ft. tall, with one or two nice ears per stalk, 7 to 8 inches long, with 10 to 14 rows of medium sized kernels, of yellow color, and finest quality. For heavy production I recommend this Sweet Corn. Packet, 10c; 1/4 lb., 15c; lb., 50c; postpaid.

"BIG 3" SWEET CORN COLLECTION C307

1/4 POUND OF EACH: SONDEREGGER'S EARLIEST, SONDEREGGER'S IMPROVED EARLY EVERGREEN and SONDEREG-GER'S EARLY GOLDEN. ALL THREE FOR

POP CORN

C310 South American

Dynamite The genuine strain, nels, yellow, and light creamy yellow when popped. Extra fine quality. Be sure to include this corn in your planting. Packet, 5c; 1/4 lb., 10c; lb., 30c; 3 lbs., 75c; postpaid.

C312 Baby Rice Japanese Hulsmallest and finest of the white varieties. Stools out freely, each stalk making a number of good ears 4 to 5 inches long. Excellent quality. Packet, 5c; 1/4 lb., 10c; lb., 25c; 3 lbs., 70c; postpaid.

C311 **Hybrid Japanese** Hulless Pop Corn An extra yielder, nice ears. Even in times of

yielder, nice ears. Even in times of drought it produced heavy crops. When popped it is about one-fourth larger than Baby Rice, approaching nearly in size the South American Dynamite. White and truly the best white popcorn for large size that can be had. Packet, 10c; 1/4 lb., 25c; lb. 65c; postpaid.

NELONS-50UA5H-PUNPKINS Improved War Hubbard Squash (110 days) Sweet, well flavored with dry meat. Very dark green shell, hard and warty, a good winter keep-

best results in every locality

PUMPKINS

C538 Large Sweet Cheese

(110 days) Large, flattened fruit that keeps well; cream color,; flesh yellow, thick and very tender; highly productive. Packet, 5c; oz., 10c; 1/4 lb., 20c; lb., 70c; postpaid.

C542 King of Mammoth (120 days) Flesh and skin of bright golden-yellow color, fine grained, of very good quality. One of the largest in size, often up to 100 pounds. Packet, 7c; oz., 15c; 1/4 lb., 30c; lb., \$1.00; postpaid.

C544 Small Sugar (115 days) The "Sweet Pumpkin." About 10 inches in diameter, averaging 4 pounds in weight. Deep orange yellow skin, flesh fine grained of excellent quality. A very good keeper. Packet, 5c; oz., 12c; 1/4 lb., 25c; lb., 80c; postpald.

C546 Field Pumpkin (120 days) This is the old Connecticut variety, medium size, up to 15 pounds, orange yellow; good flavor. One of the best for kitchen use. Packet, 5c; oz., 10c; 1/4 lb., 20c; lb., 65c; postpaid.

C610 Cushaw For description and price, see opposite page under Squash. There has always been some disagreement as to whether Cushaw is a squash or a pumpkin, but all experts agree Cushaw is of first class in which ever class you put it in whichever class you put it.

WATERMELONS

C404 Tom Watson (90 days) Extough but thin rind, good shipper. Deep red flesh to within an inch of the rind. Good producer. Packet, 5c; oz., 10c; 1/4 lb., 25c; lb., 75c; postpaid.

C414 Pride of Nebraska (85 days) Medium size, dark green, and faintly striped. Flesh bright red, rich in flavor. Keeps well. Vine vigorous and very productive. Packet, 5c; oz., 15c; 1/4 lb., 20c; lb., 70c; postpaid.

C412 Stone Mountain

(85 days) Almost round, large, rich, sweet, scarlet flesh; very fine. Packet, 5c; oz., 10c; 1/4 lb., 25c; lb., 75c; postpaid.

C407 New Irish Gray

(90 days) Yellowish gray, large melons. Good shipper, quality excellent. Packet, 8c; oz., 20c; 1/4 lb., 35c; lb., \$1.00; postpaid.

C406 Cole's Early (80 days) For the North where seasons are short. Flesh bright red, crisp and sweet, fine flavor, medium size. Packet, 5c; oz., 10c; 1/4 lb., 18c; lb., 60c; postpaid.

C408 Kleckley's

Sweet (85 days) Oblong, dark green, very productive. For Nebraska, one of the best. Flesh dark red, very sweet, solid and stringless. Packet, 5c; oz., 10c; 1/4 lb., 25c; lb., 80c; postad.

C410 **New Striped**

Klondike (90 days) An outstanding new variety averaging 25 pounds; light green, striped dark green; stands shipping well. Flesh deep red, sweet and stringless. Packet, 10c; oz., 15c; 1/4 lb., 25c; lb., 85c; postpald.

SOUASH

C604 Pink Banana Squash (120 days) feet long, bears well, a good keeper, very good quality. Packet, 8c; oz., 15c; 1/4 lb., 35c; lb., \$1.30; postpaid.

C603 **So**nderegger's Table Queen (58 days) Finest baking squash; also fine for pies; 6 to 8 inches long, thick; dark green, hard and smooth; a good keeper and produces heavily. Packet, 8c; oz., 15c; 1/4 lb., 35c; lb., \$1.30; postpaid.

C610 Cushaw Squash (112 days) Always large, mottled green and white, solid and heavy. Fine grained, sweet. Exceptionally good quality. Some people class Cushaw with pumpkins. Packet, 5c; oz., 15c; 1/4 lb., 30c; lb., \$1.00; postpaid.

C606 Giant Summer

Straightneck (55 days) Heavily warted, meat lemon yellow, fine quality.' 16 inches long, running 3 pounds in weight; used when young. Packet, 5c; oz., 15c; 1/4 lb., 30c; lb., \$1.00; postpaid.

C616 Golden Hubbard (105 days) Orange red, flesh deep color, and the quality is very good. Medium size. Packet, 5c; oz., 10c; 1/4 lb., 25c; lb., 75c; postpaid.

C605 Mammoth White

Bush (55 days) Flattened and scalloped, 8 inches across, utiful white heautiful white color. Bears well quality very good. Packet, 5c; oz., 15c; 14 lb., 30c; lb., \$1.00; postpaid.

Improved Warty

er. Packet, 5c; oz., 10c; 1/4 lb., 25c; 1b., 85c;

postpald.

"Big 4" Watermelon Collection Melons in the picture: Lower left—Stone dike; upper left—Tom Watson; upper right—Kleckley's Sweet. One packet of each variety, all for only 22c, postpaid.

The Finest Head Lettuce

C352 Improved Hanson (47 days) on e of the most reliable, sure-heading sorts. Heads globular, but later than my Sonderegger's Extra Early Head. The two together make Extra Early Head. The two together make you an extra long season of fresh lettuce. I recommend them for the Middle West. Leaves large, broad, fairly blistered and crimpled. Color light green, fine quality. Withstands warm weather pretty well. Also an excellent lettuce for August planting. Packet, 7c; oz., 20c; 1/4 lb., 35c; lb \$1.25; postpaid. postpaid.

C354 Sonderegger's Butter-

head (45 days) Best all around lettuce, extra good for forcing and summer use, as it resists the heat fairly well. Can be grown most anywhere. Quality as good as the hest. Packet, 10c; oz., 25c; 1/4 lb., 40c; lb., \$1.35; postpaid.

C356 May King One of the earliest medium size, very solid. Outer leaves medium size, very solid. Outer leaves smooth, light green; inner leaves light yellow and very crisp. Fine quality. Packet, 5c; oz., 15c; 1/4 lb., 35c; lb., \$1.35; postpaid.

C366 Early Curled Simpson (35 days) One of the most widely used varieties of lettuce, especially for home use. It is early, hardy, dependable. Makes large crimpled leaves forming a compact bunch at the center of the plant. Makes no heads. Leaves tender, sweet, of light green color, and excellent quality. Plant this variety to give you lettuce for use before head lettuce could be ready to use. Packet, 7c; oz., 20c; 1/4 lb., 35c; lb., \$1.25; postpaid.

C367 Black Seeded Simpson

Grown extensively where a non-heading (bunching) lettuce is required. The plants grow quickly to a large size. Outer leaves light yellowish green, crisp, of fine texture, and exceptionally fine flavor. Early and good quality. Packet, 5c; oz., 15c; 1/4 lb., 35c; lb., \$1.25; postpaid.

A splendid new lettuce for home use as well as the market. Heads are of medium size, solid, round; the leaves are light green, outer leaves slightly tinged brown, and inner leaves bright yellow. A lettuce that is rich in flavor, buttery, crisp and tender. Hardy as well as extra early, and can be sown early as it resists frost. Where head lettuce must be early maturing in order not to come into hot weather, this lettuce is as good as the best. Packet, 10c; oz., 25c; 1/4 lb., 40c; lb., \$1.40; postpaid.

C358 **Prizehead** This is an early loose heading lettuce, most desirable for home use. Heads of medium size, crisp and tender. Color light brown on a medium green base. Leaves crimpled with highly fringed edges. The best brown-leaved lettuce for the Middle West. Packet, 5c; oz., 18c; 1/4 lb., 35c; postpaid.

"BIG 3" LETTUCE COLLECTION

1 packet of each: Early Curled Simpson Sonderegger's Extra Early Head Improved Hanson

for 17c Postpaid.

Lettuce is a cool weather plant. Sow seed early, or in hotbeds or cold-frames. (See page 67.) Transplant as early as frost is out of ground, or thin out as soon as the seedlings are 2 to 3 inches high. Should stand 8 to 10 inches apart. For fall make a sowing in August, I can furnish fresh seed in the summer. Sonderegger's

Everything in 0 1 5

C440 Yellow Globe Danvers

(120 days) Yellow, large onions of globe shape. They are very solid, white meated. A very good onion for market and home. Packet, 5c; oz., 20c; 1/4 lb., 50c; lb., \$1.70; postpaid.

C450 Yellow Bermuda Of straw-color, and very mild. My seed is the truc Teneriffe-grown strain, very early, even in the North; highly productive. Packet, 7c; oz., 25c; 1/4 lb., 70c; lb., \$2.40; postpaid.

C436 Large Red Globe (110 days) Probably the first of all Red Onions. Bulbs perfectly round, of good size, and with small neck. Color deep purplish red. Flesh white, tinged pink, with good strong onion flavor. Very productive, and a good keeper. Packet, 7c; oz., 30c; 1/4 lb., 75c; lb., \$2.65; postpaid.

C446 Large White Globe (120) Immense yielder, keeping until late fall, and is of finest quality, very large. Packet, 10c; oz., 30c; 1/4 lb., 85c; lb., \$3.25; postpaid.

C435 White Pearl The best onion to use with pickling cucumbers, or or pickling alone. Very early, bulbs small, sivery white, from 1½ to 1¾ inches in diameter. For pickles they are used when half grown. They are mild. Packet, 10c; oz., 25c; ¼ lb., 65c; lb., \$2.50; postpaid.

	ONION	SET	rs	Not
		Pre	Prepaid	
		1 lb.	10 lbs.	Per lb.
458	White, nice sets	.30c ·	\$2.65	22c
460	Red Onion Sets	.25c	2.40	18c
462	Best Yellow Sets	.25c	2.25	18c
464	White Multiplier	.30c	2.65	22 c

C472 Winter Onion Sets Plant them in the fall. I can furnish them at that time or in the spring. The fall planted sets produce very fine green onions for early spring use. The spring planting makes good top sets by fall. Everybody who cares for onions should have this variety in the garden. Per pound, 25c; 5 lbs., 80c; postpaid.

C432 Sonderegger's Prizetaker

Be sure to include this variety in your planting. The onions grow quite large from seed, of globe shape (note photo lower right), and light straw color. Flesh pure white, of finest quality, rather mild. Wonderfully productive, and keeps well for winter use or late market. Take your onions up as soon as the tops are dry. Packet, 10c; oz., 25c; 1/4 lb., 60c; lb., \$2.00; postpaid.

C448 Silver Skin or White Portu-

gal (95 days) Large flat onion (note photo lower left) of pleasant flavor, mild, and keeping well. For winter use, for pickles, and for bunching you will like them. Packet, 10c; oz., 25c; 1/4 lb., 65c; lb., \$2.25; postpaid.

C456 White Welsh For green onions, but puts out many shoots, making it one of the best for green onions, which are mild, and better than green onions from sets. Packet, 10c; oz., 20c; 1/4 lb., 60c; lb., \$2.50; postpald.

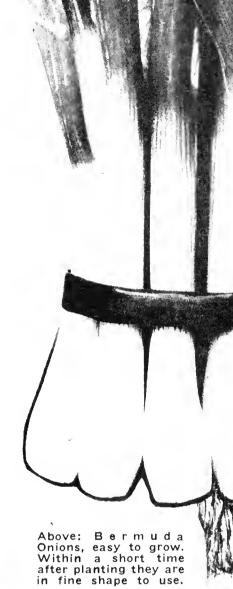

C434 Large Red Wethersfield (100 days) Flat in shape, growing to a large size. Outer skin is red, while the center is purplish white. An onion of excellent quality, and a good keeper. Packet, 5c; oz., 15c; 1/4 lb., 60c; lb., \$1.85; postpaid.

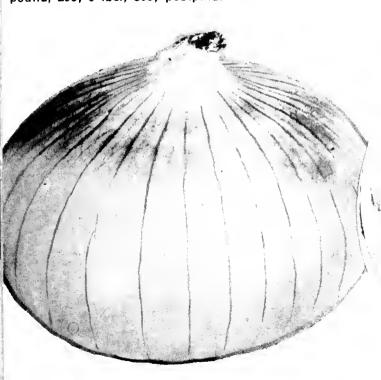

C473 Bermuda Onion Plants

Plant as soon as the ground is warm. My special new strain is far superior to the common Bermudas, being milder, and making fine onions at all times, from green onions to large finished bulbs. Bundles containing from 75 to 100 plants. Per bundle, 20c; 5 bundles, 80c; 10 bundles, \$1.60; postpaid. On plants per crate please write for price.

C748 Garlic Very pungent. Grown for seasoning. Large bulbs (break them up to sets). 5c each; 1/4 lb., 12c; lb., 40c; postpald.

C346 Leek The large London variety. cooked like creamed onions. Packet, 10c; oz., 30c; postpaid.

Silver Skin (C448). One of the finest onlons of the white type for all around use that you can grow.

Sonderegger's Prizetaker (C432). Easy to grow from seed to a nice medium size; best in quality and long keeping.

KALE or BORECOLE

Cll0 Dwarf Green Curled

One of the best for market. Stands the hot weather well, and is at its best after frost in the fall. Packet, 10c; oz., 25c; 1/4 lb., 80c; postpaid.

Cll2 Dwarf Purple Curled

The leaves turn a deep purple, in best shape after frost in late fall; a very good variety for home use. Packet, 7c; oz., 20c; 1/4 lb., 60c; postpaid.

Cll4 Tall Green Curled

Scotch The quality is much improved by fall frost; can also be dried for winter use. This is the tall growing sort with green leaves. Packet, 10c; oz., 20c; 1/4 lb., 60c; postpaid.

SPINACH

An entire drug store could not contain more for the best of your health as fresh vegetables. Amongst them, and on first place, stands Spinach. Grow more of it, eat more of it; let vegetables preserve eat more of your health.

C592 Victoria (50 days) Heavy, leaves. Fine quality. This spinach remains in prime condition for several weeks. Packet, 5c; oz., 10c; 1/4 lb., 20c; lb., 50c; postpaid.

C594 Long Standing (50 days) good bearing variety and of very fine quality. The chief advantage, however, is the fact that it does not go to seed until quite late in the producing season. Packet, 5c; oz., 12c; 1/4 lb., 20c; lb., 45c; postpaid.

Mangold. Produces immense quantities of light green leaves from spring until late fall. Even early frost does not affect Swiss Chard, and where the winters are not very severe a cover of straw over winter will get Swiss Chard through in good shape. This plant belongs to the beet family, but is used only for its leaves which are prepared same as spinach, and differ only in the lighter color. Packet, 5c; oz., 10c; 1/4 lb., 25c; postpald.

C596 **New Zealand or Ever-**

bearing Boys and girls, this is "Popeye's" favorite dish. You make no mistake whenever you fill up on this spinach. New Zealand is slow to germinate, requiring from two to three weeks to come up, but after that it makes a rapid growth. Furnishes enormous quantities of fresh, clean leaves all through the summer until frost in the fall. Cut off the fresh branches and strip the leaves from those for kitchen use. A bed of this variety should be in every garden. Plant when danger of freezing is over. Hot weather does not bother this spinach. There is no other plant that would resist heat and drought so well. It is not attacked by insects. Packet, 8c; oz., 12c; 1/4 lb., 25c; lb., 75c; postpaid.

C591 King of Denmark The elading market variety. The large leaves are very thick, rounded, dark green, and blistered. The plants form quite large tufts, compact and low. Quite early but still remains in fine condition for some time and assures a long bearing season. Packet, 5c; oz., 15c; 1/4 lb., 20c; lb., 50c; nostpald. postpaid.

Sonderegger RADISHES

C553 Sonderegger's Giant Butter See lower right hand corner. The finest dark red, round radish, with white root-tips, pure white flesh, crisp, always in prime shape for the table. Does not get pithy. Should be in every garden. Packet, 10c; oz., 20c; 1/4 lb., 40c; lb., \$1.40; postpald.

C568 French Breakfast (25 days) Bright scarlet, with white tip, oval shaped. It is of fine quality but must be used as soon as full grown, as it does not stay crisp very long. Packet, 5c; oz., 10c; 1/4 lb., 25c; postpaid.

White Pearl (21 days) New; the only pure white radish that matures so early, combining uniform size, extra fine flavor, and unsurpassed crispness. Tops small, radish good medium size, round. Try this fine radish; you will be well pleased. Packet, 10c; oz., 20c; 1/4 lb., 40c; lb., \$1.40; postpaid.

C555 Early Bird (20 days) Rich scarlet color, flesh snow white and crisp, the outstanding early radish on the market. Packet, 7c; oz., 15c; 1/4 lb., 30c; postpaid.

C554 **Sparkler** (20 days) let with a pure white tip, nearly round. This radish has long been the favorite for market and home use. It is early, solid, crisp; a radish you will like. Packet, 5c; oz., 12c; 1/4 lb., 25c; postpald.

WINTER RADISH

C580 Rose Chinα (60 days)
Bright rose, flesh white, mild; a very fine late radish. Packet, 10c; oz., 15c; 1/4 lb., 30c; postpaid.

C582 California Mammoth (65 days) Pure white, good, crisp and rather mild. Very good. Packet, 5c; oz., 15c; 1/4 lb., 30c; postpaid.

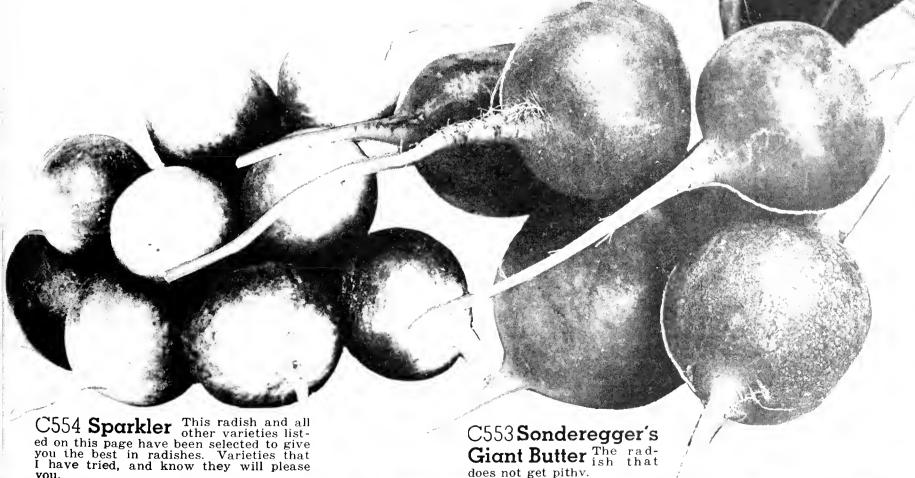

C584 Long Black Spanish (72 days) Of strong radish flavor, very solid, keeps well through the winter. Packet, 5c; oz., 12c; 1/4 lb., 25c; postpaid.

C558 Crimson
Globe (35 days) Note
picture above.
This radish will grow almost as large in size as Sonderegger's Giant Butter. It remains
very solid, attractively colored,
and is mild and tender. Packet,
5c; oz., 10c; 1/4 lb., 25c; postpaid.

C556 Sonderegger's Icicle (24 days) The extra fine white, long Icicle radish that is so well liked for its mildness and fine quality. It is of easiest culture, and should be in every garden. Packet, 8c; oz., 15c; 1/4 lb., 30c; lb., \$1.10; postpaid.

C557 Non-Plus-Ultrα (24 days) I have imported this new radish; my trials proved highly satisfactory. Note colored photo on rear outside page. This is a splendid early red radish, outstanding in earliness and flavor. Packet, 10c; oz., 20c; 1/4 lb., 45c; postpaid.

Radish Cutter A small device consisting of a high-grade knife-blade and spacer-screw that cuts large radishes, potatoes, turnips, etc., in one continuous thin slice. A very handy little tool for your kitchen. Made to last a long time. 35c each; postpaid.

PEPPER5

EGG PLANT

C284 Spineless See photo page 64. This is the improved Spineless variety, the best for home use or market. The plant is spreading, bearing well. The broad, oval, dark purple, glossy fruits are of superior quality. For the table peel and slice the fruit, boil until tender, drain off water, add 1 egg well beaten and 4 cup dry bread crumbs, salt and pepper to taste. Mold in small cakes and fry brown on both sides. Serve hot. Packet, 10c; ½ oz., 25c; oz., 45c; postpald.

PEPPER

C525 Harris Early The earliest for use, and a heavy bearer, fruit medium to large size, dark red when fully ripe, and very sweet. Fine for stuffed peppers and salads. Packet, 10c; $\frac{1}{2}$ oz., 25c; oz., 40c; $\frac{1}{4}$ lb., \$1.35; postpaid.

Sonderegger's New

Royal Note photo at lower left corner. Exceptionally thick meated, very mild, perfectly sweet and free from pungency. Can be eaten like apples. Plant bears well, an excellent pepper for home use or for market. Packet, 15c; ½ oz., 25c; oz., 40c; ¼ lb., \$1.35; postpaid.

C524 Chinese Giant Extra large thick flesh which is mild and sweet, of scarlet color. Plant a strong grower and heavy bearer. Packet, 8c; ½ oz., 25c; oz., 40c; ¼ lb., \$1.35; postpaid.

C532 Sonderegger's Perfection

Pimiento Thick meated, extra mild and delicious. Smooth, uniform in shape, skins slip off easily after being burned lightly over a flame or boiling a few minutes. Beautiful scarlet when fully ripe, and bears well until frost in the fall. This pepper should be in every garden. Packet, 15c; ½ oz., 25c; oz., 35c; postpaid.

C528 **Red Cayenne—''Hot'**

A long, slim pod, bright red when ripe. Very strong and pungent; used for flavoring in pickles, chili sauce, etc. Packet, 8c; ½ oz., 25c; oz., 40c; postpaid.

TURNIP5

feet of drill; 2 pounds of seed per acre, or 3 pounds if sown broadcast. Sow in July or August.

C656 Extra Early Purple Top

Milan (40 days) Medium size, smooth, leaves short and few. Fine grained, very good quality. Packet, 5c; oz., 12c; 1/4 lb., 25c; lb., 75c; postpaid.

C658 Extra Early White Milan (40 days) A duplicate of the above variety, except that the skin is white. Packet, 5c; oz., 12c; 1/4 lb., 20c; lb., 75c; postpaid.

C660 Early White Flat Dutch (45 days) Medium size, sweet and tender, very fine quality. Packet, 5c; oz., 10c; 1/4 lb., 20c; lb., 75c. C662 Purple Top Strap Leaf (58 days) Few leaves, the turnip keeps

(58 days) Few leaves, the turnip keeps well. It is round, flat, good size and quality. Packet, 5c; oz., 10c; 1/4 lb., 20c; lb., 65c; postpaid.

C664 Early Snowball (65 days) G10 be shaped, white skinned, very fine grained, and of good flavor. Extra good for main crop. Packet, 5c; oz., 10c; 1/4 lb., 20c; lb., 65c; postpaid.

C668 Golden Ball (70 days) Small but very good in flavor and firmness. It is very good in flavor and firmness. It is yellow. Packet, 5c; oz., 15c; 1/4 lb., 25c; lb., 75c; postpaid.

Globe (70 days) Firm, fine grained, white and of fine flavor. Keeps well, and produces heavily. One of the best for market. Packet, 5c; oz., 10c; 1/4 lb., 20c; lb., 65c; postpaid.

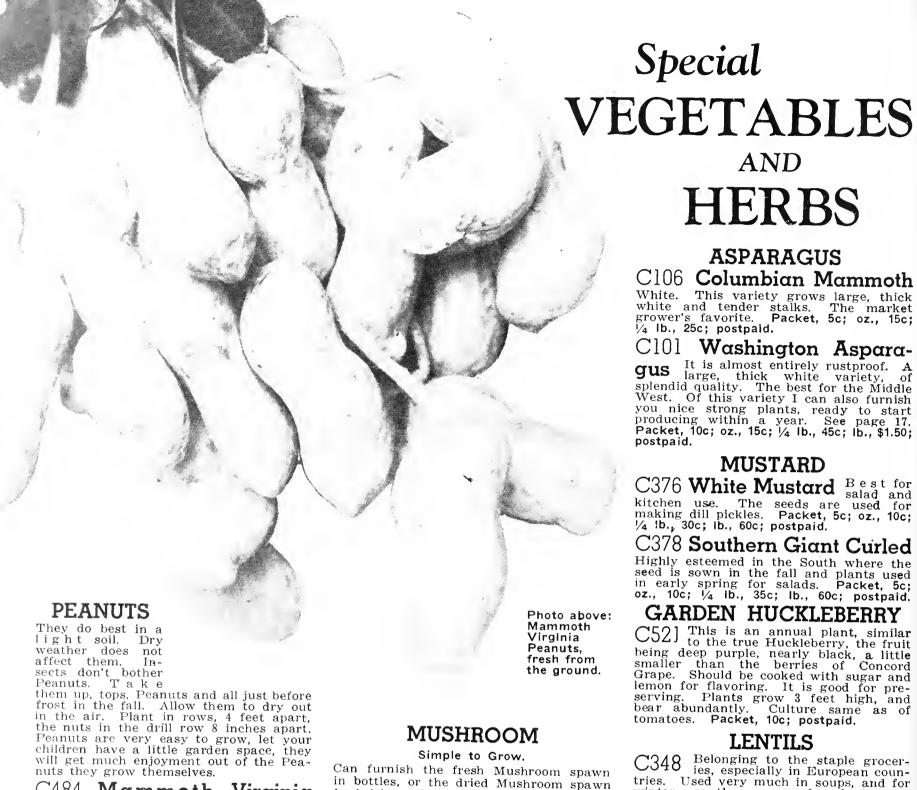

RUTABAGA or SWEDES

Recommended for Northwest and East. C672 Sweet German (90 days) Pure white, very good, and mild. Packet, 5c; oz., 10c; 1/4 lb., 20c; lb., 70c; postpaid. C676 Purple Top Yellow

Best yellow meated, good keeper. Packet, 5c; oz., 10c; 1/4 lb., 20c; lb., 65c; postpaid.

Can furnish the fresh Mushroom spawn in bottles, or the dried Mushroom spawn in bottles, or the dried Mushroom spawn in bricks. For fresh spawn in bottles, which are available only from time to time I wish to have an allowance of 10 days to fill your order. The bricks can be furnished any time. In old barns, caves, sheds you can grow Mushrooms for home use or for market where they usually bring good prices. Fresh spawns usually bring good prices. Fresh spawns in bottles, \$1.10 per bottle. Brick Spawn, 50c per brick; postpaid.

C372 "How to Grow Mushrooms" A small booklet which gives you all information for a successful planting. 50c each, postpaid.

OKRA or GUMBO

C380 White Velvet Okra

Produces extra large pods. The young seed pods of this Southern plant are used for the well known and delicious "Gumbo" soups, or with chicken soups. Its smooth, glutinous taste is much liked, a desirable vegetable. Okra is easy to grow, the plant is a vigorous grower, and resists the dry and hot weather well. Plant in the spring as soon as danger of frost is over, and transplant the seedlings later to stand 18 to 24 inches apart; cultivate like corn. Begins to furnish nice pods by midsummer. Packet, 5c; oz., 10c; 1/4 lb., 25c; postpaid.

ASPARAGUS

HERBS

Special

Cl06 Columbian Mammoth

White. This variety grows large, thick white and tender stalks. The market grower's favorite. Packet, 5c; oz., 15c; 1/4 lb., 25c; postpaid.

Clol Washington Aspara-

gus It is almost entirely rustproof. A large, thick white variety, of splendid quality. The best for the Middle West. Of this variety I can also furnish you nice strong plants, ready to start producing within a year. See page 17. Packet, 10c; oz., 15c; 1/4 lb., 45c; lb., \$1.50; postpaid.

MUSTARD

C376 White Mustard Best for salad and kitchen use. The seeds are used for making dill pickles. Packet, 5c; oz., 10c; 1/4 lb., 30c; lb., 60c; postpaid.

C378 Southern Giant Curled Highly esteemed in the South where the seed is sown in the fall and plants used in early spring for salads. Packet, 5c; oz., 10c; 1/4 lb., 35c; lb., 60c; postpaid.

GARDEN HUCKLEBERRY

C52] This is an annual plant, similar to the true Huckleberry, the fruit being deep purple, nearly black, a little smaller than the berries of Concord Grape. Should be cooked with sugar and lemon for flavoring. It is good for preserving. Plants grow 3 feet high, and bear abundantly. Culture same as of tomatoes. Packet, 10c; postpaid.

LENTILS

C348 Belonging to the staple groceries, especially in European countries. Used very much in soups, and for winter use they are preferred to peas. Cultivation is the same as of peas. Packet, 5c; oz., 10c; 1/4 lb., 25c; lb., 75c; postpaid.

TOBACCO

One ounce of seed will make enough plants to set out an acre. Mix the soil of the seed bed with wood ashes, sow seed shallow. When plants are about 6 inches high, transplant in rows 4 ft. apart.

C598 Connecticut Seed Leaf Best for the Middle West and Northern states. Packet, 5c; oz., 25c; postpaid.

C600 White Burley Largely for own for fine cut plug tobac. It is a very good variety. Packet, 5c; oz., 25c; postpaid.

C602 Havana Well known, large leaved tobacco, especially adapted to the manufacture of cigars. Packet, 5c; oz., 30c; postpaid.

GARLIC

C748 Bulbs which are composed of a number of "toes" which are either used for planting, or for seasoning. It is a most pungent variety of onions, and grown for seasoning, also for medicinal purposes. Large bulb, 5c; 1/4 lb., 12c; lb., 40c; postpaid.

I can furnish you seeds most any time during the summer and fall, depending on their respective planting seasons. A stock of fresh seed is always carried on hand to fill your orders promptly.

MUSHROOM

Simple to Grow.

C484 Mammoth Virginia The most profitable variety to grow for home use or market, as the nuts are quite large. The plant grows erect, with upright foliage. Packet, 7c; ½ lb., 18c; lb., 30c; postpaid. Not prepaid, 5 pounds, 85c

C486 Early Spanish Peanuts

The earliest variety grown, pods small, remarkably solid, and well filled. Of this variety the rows can be planted 3 feet apart. Packet, 7c; ½ lb., 18c; lb., 30c; postpald. Not prepaid, 5 pounds, 85c.

ARTICHOKES

ARTICHOKES
The Genuine Jerusalem Artichoke Planted just like potatoes, cut the tubers up to weigh about an ounce each, plant in rows 18 inches apart, the rows 3 feet apart, and cultivate like corn. Plant any time in the spring as soon as the soil can be worked. This Artichoke is hardy, you can dig them in late summer or fall, or any time during the winter or next year, just as you need them. They keep best in the ground. They are used just like potatoes, for French fried or boiled with the jacket on. All your surplus makes a splendid feed for hogs. Just turn them in the field, the hogs will do their own harvesting. This plant is grown also on a large scale for commercial purposes (commercial alcohol production). Per pound, 35c, postpaid. Not prepaid, 10 lbs., \$1.00; 50 lbs., \$2.25; 100 lbs., \$4.00; 500 lbs., \$19.50; bags included.

FOR FLAVORING, SEASONING, MEDICINAL PURPOSES.

- (A) Annual Varieties.
- (P) Hardy Varieties (Perennial)

C678 Anise (A) For seasoning. Seed aromatic taste. Pkt., oz., 35c; 1/4 lb., \$1.00; postpaid. Seeds of

C679 Artemesia Or Wormwood. (P) Fragrant, spicy odor, bitter taste. Leaves used as tonic, and poultry medicine. Pkt., 10c; oz., 40c; 1/4 lb., \$1.25; post-

C682 Basil, Sweet (A) Leaves used for flavoring soups and stews. Pkt., 10c; oz., 50c; postpaid.

C684 Borage (A) Leaves used in salads. Flowers excellent for bees. Pkt., 10c; oz., 50c.

C688 Caraway (A) Seeds used for flavoring, and in bread. Pkt., 10c; oz., 25c; 1/4 lb., 60c; postpaid.

C689 Chamomile

of antiseptic and emetic. Caution should be taken to avoid reseeding; pick the blossoms, then destroy the plants; they are apt to become a pest. Pkt., 15c.

C696 Dill (A) Leaves and seeds used in flavoring. Also with dill pickles. Pkt., 7c; oz., 25c; 1/4 lb., 60c.

C698 Fennel (A) Leaves for garnishing, seeds for flavoring. Pkt., 10c; oz., 45c; postpaid.

C700 Lavender (A) Flowers used for making perfumes. Dried leaves in bags used to perfume linen, also against moths. Pkt., 10c; oz., 45c; postpaid.

C701 Rosemary Aromatic leaves for flavoring meat. Plants reach full size the second year. Pkt., 15c; 1/2 oz., 45c; postpaid.

C702 Marjoram (A) Leaves and shoots may be dried for winter use. Good for flavoring. Pkt., 10c; oz., 60c; postpald.

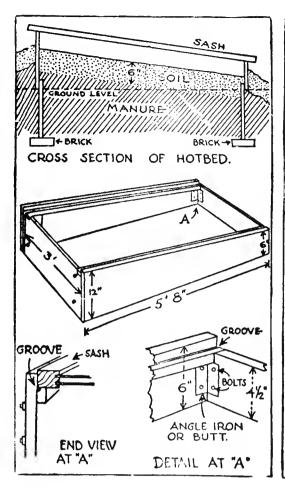

C703 Saffron (A) Pick flowers while in full bloom; used for coloring. Pkt., 15c; oz., 50c; postpaid.

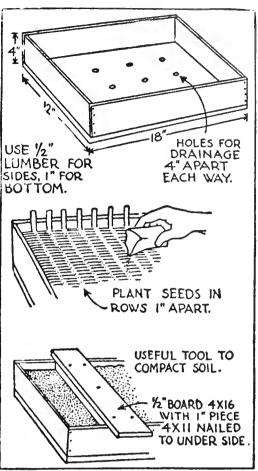

C705 Peppermint

15c; ½ oz., 60c; postpaid.

Leaves and stems very aromatic. Pkt.,
We have plants also,

C706 Sage (P) Leaves for seasoning and dressing. Pkt., 10c; ½ oz., 50c; postpaid. We can also furnish plants at 30c each; 3 for 75c; postpaid.

First make a frame to fit the size of your windows or hotbed sash. The back side of your frame being twelve to fourteen inches high, while the front side should be six to eight inches high. Then dig a hole to the size of your frame, same should be two feet deep, this filled with about two feet of stable manure which has not gone through the heat, and tromped and well packed. Cover this with about eight inches of good rich soil, and this should fill your hotbed to within five inches of the lower end of your frame. The ground should be smoothed off level and left for two or three days until it has had time to get warm. The seed planted, covering about one-half inch. The hotbed sash should be put on top of the hotbed. The hotbed should be made on the south side of a building or in any protected place where it gets plenty of sunlight. After your plants are started, on warm days when it is above freezing, the lower end of the hotbed sash could be raised a little to give the plants more air.

C708 Sorrel Large Leaved. (A) For boiling greens. Cooked like spinach. Pkt., 10c; oz., 40c; postpaid.

C710 Summer Savory (A) Fine flavoring for beans. Pkt., 10c; $\frac{1}{2}$ oz., 40c; oz., 65c.

10c; ½ oz., 40c; oz., 65c.

C711 Woodruff Or Waldmeister. (Asperula Odorata) Used in wine and also perfuming clothes. Pkt., 15c.

C712 Thyme (A) Young leaves for soups and dressings. Tea as a cure for nervous headache. Pkt., 10c; oz., 40c; postpaid.

C278 Celery Seed for Flavoring Seed of Celery that is used for seasoning only. Oz., 10c; 1/4 lb., 30c; lb., \$1.00; postpaid.

HERBS—Dried Leaves

A good many of our customers find it more convenient to use the dried leaves of herbs instead of growing and curing them in the home garden. The dried leaves are not put up in less than 1 oz. packets. Prices all post-

C722 Basil, Sweet. Oz., 20c; ½ lb., 90c. C726 Lavender. Oz., 15c; ½ lb., 60c. C728 Marjoram. Oz., 15c; ¼ lb., 50c. C730 Peppermint. Oz., 15c; ¼ lb., 50c. C732 Rosemary. Oz., 15c; ¼ lb., 50c. SPRAYERS---Spraying Materials

SPRAYER

This new sprayer is made so that This new sprayer is made so that the whole top can be removed, which makes it very easy to clean. The tanks are made of heavy galvanized steel; also copper. Contents four gallons. They are equipped with hose extension rod and a new brass nozzle which can be set to spray in any direction. This sprayer is made throughout from the very best materials and cannot be compared in quality with many of the cheap sprayers. Galvanized Sprayer, \$5.85. Brass Tank, \$8.69.

HUDSON JUNIOR

This sprayer is made of the same material as the Hudson Perfection. It has a large funnel top which makes it easy to fill. Capacity 2½ makes it easy to fill. Capacity 2½ gallons. It is equipped with extenmakes it eas, gallons. It is equipped with extension rod hose and a new adjustable nozzle. Prize: Galvanized Tank, \$4.35; Brass Tank, \$6.50; not pre-

NOZZLE

Aphis adjustable nozzle is regular equipment on Perfection and Junior Sprayer. Extra Nozzle, \$1.00.

LEVER SPRAY NOZZLE

This is an ideal nozzle for spraying around the garden or lawn; also good for cleaning porches, cars, where water is turned on and off quite often. The nozzle is made of heavy brass and will last a long time. It is easily attached to any garden hose. Price, \$1.00, postpaid.

This is not a fertilizer, it must be applied to the seed before sowing. Can

applied to the seed before sowing. Can be used on all legume plants such as BEANS, PEAS, SWEET PEAS, COW PEAS, SOY BEANS, ALFALFA AND CLOVER. Do not use Nitragin on other kinds of seeds. Nitragin improves the root system to such an extent as to give the plants a much better growth and greater productiveness.

When ordering please state the kind of seed you wish to treat. Nitragin is sold in tins, each containing the necessary quantity for a certain quantity of seed.

For beans, peas or sweet peas, enough to treat 4 pounds of seed, 10c, postpaid. For peanuts, soy beans and cowpeas, 1 bushel size, 30c; 2 bushel size, 50c; 5 bushel size, \$1.00. For alfalfa and all clovers, also Lespedeza, ½ bu., 30c; bu., 50c; 2½ bu., \$1.00; postpaid.

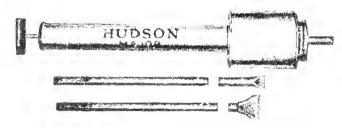

HUDSON PERFECTION CONTINUOUS HAND SPRAYER

HUDSON CRITIC CONTINUOUS SPRAYER

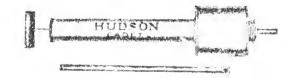

This Sprayer is made the same as our Continuous except that it has a glass container which holds about one quart. It also has the new mist nozzle. Price, \$1.25, postpaid.

HUDSON MAJOR DUSTER

This new design duster has been tried out and is a big improvement over the old type. It dusts all kinds of fine powders very evenly. It does the job with less material, less energy, and does it better. Size of dust container 4 inches in diameter and 4½ inches long. Pump 14 inches long. Price, \$1.10; postpaid.

CADET DUSTER

Same as Major Duster only smaller size, but does the work just as good. Price, 60c, post-paid.

TRI-OGEN

The All-Purpose Spray

A POSITIVE PLANT PROTECTION A POSITIVE PLANT PROTECTION
This complete Rose Garden Spray Treatment—Tri-ogen—offers the first definite mildew and black spot control combined with an insecticide. It kills all insects, including the sucking and leaf-eating types. It remains on foliage, repelling subsequent attacks. Tri-ogen also stimulates plant growth, resulting in fine foliage and luxuriant blooms.

A Small Kla (makes 16 guarte)

- Small Klt (makes 16 quarts), postpaid ...\$1.50
- Medlum Kit (makes 64 quarts), postpald

SONDEREGGER'S IMPROVED TREE WAX

Same as we use in our nursery for budding and grafting. $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 35c; 1 lb., 65c; postpaid.

SONDEREGGER'S ELASTIC PRUNING PAINT

Should be used wherever a limb is cut off or where the bark has been peeled off by rabbits. Prevents decay until the wound is healed. 1 plnt, 55c; quart, 95c; postpaid. Not prepaid, gallon, \$2.25.

NOTICE—All Dusts should be applied with a dust gun. It does the work much better and is a big saving on dusting powder.

APHICIDE

This insecticide has been thoroughly tried out and I find it to be the best nicotine dust on the market. It contains a large per cent of nicotine, which makes it most effective against the striped cucumber bugs and the green aphis, which causes large losses all through the Middle West. This dust should be applied with a dust gun so as to get underneath the leaves where the bugs are usually found. Aphicide is made so that it will cling to the plants which makes it very effective against chewing or succulent insects. It is a poison, so cannot be sent by parcel post. Price: 1-lb. cans, 35c; 5-lb., \$1.40; 10-lb., \$2.50. Kindly ask for prices on larger lots.

HAMMOND'S SLUG SHOT

A non-poisonous insecticide. It is the safest, most effective, easiest to use and most economical general purpose insecticide made. Has given unusual satisfaction the world over for a half of a century. Can be used on cabbage, cauliflower, beans, etc., without fear of harm, as it does not contain poisonous ingredients. Lb., 32c; 5 lbs., \$1.30; postpaid. Not prepaid, lb., 25c; 5 lbs., \$1.00.

LIQUID SLUG SHOT

This is a non-poisonous spray and is very effective on both chewing and sucking insects. There is no danger when using it on tomatoes, beans or other vegetables. I find it to be one of the best spray insecticides on the market. 1 oz. of Liquid Slug Shot makes 6 gallons of spray. 1 oz. bottle, 35c; 6 oz. bottles, \$1.10; postpaid.

BLACK LEAF 40

(Sulphate of Nicotine)

Especially effective against green aphis and lice on Sweet Peas, Cucumbers and other vines. Also used against poultry, cattle and sheep lice. Follow directions on the bottle closely. Cannot be sent through the mail. 1 oz. bottle, 35c; 5 oz. tin, \$1.00; 2 lb. can, \$3.75; by express not prepaid. prepaid.

NICOTINE SOAP

THRIP-JUICE

For garden use I prefer this material to "Black Leaf 40," can be diluted in the same proportion, 1 oz. to 6 gallons of water, and is a little safer to use on plants by the amateur, and sticks better to the foliage. Plnt can, 65c.

PESTROY, or BORDEAUX MIXTURE

In the control of plant diseases and insects no spray has ever been manufactured to equal Pestroy. In case of fungus diseases also against chewing insects use Pestroy. This remedy is better known under the name Bordeaux Mixture. Pound, 45c, postpaid. Not prepald, 4 lbs., \$1.10.

GRAPE and ROSE DUST

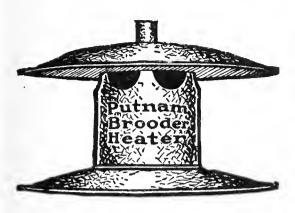

Black spot on roses, powdery mildew on grapes and roses are easily controlled by this remedy, also the leaf eating insects. It is especially good to prevent mildew and black spot on roses. Plants should be dusted about once a week after they are well leafed out. 1-lb. can, 45c, postpaid; 5-lb. can, \$1.50, not prepaid.

TOBACCO DUST

Destroys rose bugs, lice, vine bugs, to-mato worms, currant worms, cabbage lice and worms and parasites of all descrip-tions. Should be applied when foliage is wet. Will not burn or injure the plants. Price: Lb., 22c; 5 lbs., 88c; 10 lbs., \$1.45; postpaid. Not prepald, lb., 15c; 5 lbs., 65c; 10 lbs., \$1.00.

BROODERS, TOOLS, TRAPS, Etc.

PUTNAM BROODER

Each brooder will take care of 25 to 60 chicks. Needs filling once a week; will run a month on a gallon of coal oil. This brooder stove has given splendid results wherever it has been used. Write for special instructions for making box for brooder. Putnam Brooder, \$4.75, postpaid. Extra wicks with holders, 10c.

PUTNAM STOVE

Absolutely fireproof and non-explosive. Absolutely fireproof and non-explosive. Cheap to operate, about 25c worth of coal oil will keep the water for the chickens at the right temperature for several weeks. No trimming necessary. The best water warmer on the market. I use them for warming water for the outdoor birds, which I feed and water all winter. \$1.95, postpaid. Write for further information. Extra wicks with holders, 10c each.

PRUNING KNIVES

No. 4. A very good combination knife, used extensively in nurseries, parks and by fruit growers; $3\frac{1}{2}$ -inch handle. Contains pruning blade, jack-knife blade and budding blade, so that it combines all the cutting tools needed in orchard or garden. The blades are made of the very best steel. It is the best all-around pruning knife I have ever used. Price of No. 4, \$1.50 each, by paid parcel post.

No. 3—Pruning and Budding
Blade\$1.25
No. 2—Pruning Blade only... 1.00

ACME POTATO PLANTER

This planter enables one man going over the field but once, to plant two or more acres in a day, and this almost as easy as he could walk the same distance in the same time. It makes the holes, drops and covers at the same time. It is important in planting that same time. It is important in planting that they be dropped in moist soil and covered before the soil dries out. This the Acme Planter does perfectly. Weight, 2½ lbs. Price: \$1.25, not prepaid.

KEES CALF WEANER

All you have to do is to open it up and close it on the calf's nostrils. One arm is riveted solid to the plate. The other can be turned back to open. A small brass spring holds this arm in place. It's light—it won't catch on things—the balls are perfectly smooth—there is nothing about it to injure the calf's nose. Won't break, made entirely of stamped steel, replyanized. galvanized.

MADE IN TWO SIZES

Price: Small, size of plate, 3 inches by $43\frac{7}{4}$ inches, 30c each, by paid parcel post. Large, size of plate, $3\frac{3}{4}$ by 5 inches, 35c each, by paid parcel post.

GARDEN TROWELS

These trowels are stamped out of one piece of heavy steel, which makes them stronger than the old style, two-piece trowels, with the handles riveted on. Price: Per trowel, 30c each; set of three, 75c; postpaid.

Germāco Hotkaps

Hotkaps are made from an especially prepared paper which is waterproof, and when set over a small plant it acts as a small greenhouse by furnishing an extra amount of heat in the early spring when the weather is still cool. Hotkaps not only make the young plants grow faster, but they protect them from frosts and insects. Hotkaps have been tried out for several years and we have many testimonials showing where Hotkaps produced ripe melons two weeks earlier than where they were not used. More information given on request. Hotkaps are made from an especially pre given on request.

Home Garden Package, 25 Hotkaps and Cardboard Setter, 65c postpaid, 50c not prepaid.

100 Hotkaps with Metal Setter and Tamper, \$2.85, postpaid.

250 Hotkaps with Metal Setter and Tamper, \$3.85, not prepaid.

1,000 Hotkaps only, \$10.25, not prepaid. Steel Setter 'and Tamper, \$1.50, postpaid. Garden Setter alone, 50c, postpaid.

Steel Tamper alone, 25c, postpaid.

Garden Hotcap Setter, 50c.

RENKEN SURE-CATCH GOPHER TRAP

Renken Sure-Catch Gopher Trap

Gophers are easily caught with this trap. Dig in the gopher mound, clean out the Gophers are easily caught with this trap. Dig in the gopher mound, clean out the lateral runway from mound to main runway. Always set trap in lateral runway, do not cover trap. Let light shine into the runway. First gopher that comes along will proceed to shut out the light and is caught. Never set trap in main runway. I have used these traps for years and have never found any better. Price, 80c; 2 for \$1.50; postpaid.

CYCLONE HAND SEEDER

This Seeder is nationally known; it is well built and will last for years. It is equipped with shaker bottom and a good adjustable feed so that it sows most all seeds very evenly. It also has a shut-off that can be closed and opened again without changing gauge lever which regulates the amount of seed per acre. Price, \$2.50, postpaid.

ALFALFA

One of the secrets of getting a good stand of Alfalfa lays in the preparation of the seed bed. It should be plowed or double disked, and then harrowed several times to get a firm seed bed. If the seed is sown broadcast best results are obtained by rolling, and if no roller is available I recommend a light harrowing. Can also be drilled about ½-inch deep. Sow early in the spring; 15 pounds per acre with drill, up to 20 pounds broadcast. The quality of the seed will always be of primary importance; on any cheap or second grade seed you are apt to get noxious weeds started. My seed comes from upland, it is hardy, and pure. I handle no second grade in any kind of seed. 3 lbs., \$1.15, postpaid.

SWEET CLOVER

Can be sown earlier than Alfalfa, sowing and preparation of the seed bed same as for Alfalfa. Use only scarified seed to assure you of a 100% stand. White or Yellow Blossom Sweet Clover, your choice, scarified seed, 3 lbs., 60c, postpaid.

RED CLOVER

I recommend it for Eastern Nebraska, Iowa and from there east. Makes an excellent hay crop under normal conditions. Also good for seeding in the bare spots in Alfalfa where it keeps weeds down, and makes good hay. Sow 7 to 10 lbs. per acre. Price: 3 lbs., \$1.25, postpaid.

BROMUS INERMIS

This grass came through the extreme drought of recent years in better shape than any other grass, and just as good as our old original Prairie Grass. It will make more pasture or hay than any other grass except Crested Wheat Grass. A native of the Dakotas and Canada where it never winter-kills. In dry summers pasturing too close has killed out more pastures than the drought itself. Prepare the ground in the spring just as carly as pastures than the drought itself. Prepare the ground in the spring just as early as it can be worked (February or March), prepare it the same as for Alfalfa, sow 15 lbs. per acre, with 3 to 4 lbs. of Alfalfa seed. After seeding the ground should be rolled. My Northern Bromus can also be seeded with a wheat drill. Any further information on request, kindly write. 3 lbs., \$1.10, postpaid.

CRESTED WHEAT GRASS

Without a doubt the hardiest all around grass we have. It has by far the strongest rooting system of all grasses. A Canadian Agricultural College states: "One plant of Crested Wheat Grass in two years time made over 200 miles of roots." That is a lot of roots for one plant. If there is any moisture in the ground anywhere that many roots should find it. Makes excellent pasture, and a big yielder of fine quality hay. Seed can be drilled in rows 2 ft. apart, so that cultivation is possible, and in a few years you will have a spotless, perfect sod. 3-4 lbs. per acre. Price: 75c per pound, postpaid.

WESTERN or SLENDER WHEAT GRASS

Very much the same as Crested Wheat Very much the same as Crested Wheat Grass. It does not make quite as heavy a root system; however, it withstands cold winter as well as the hot and dry weather of the summer if not pastured too close. About equal to Bromus Inermis for pasture and for hay. The seed is much heavier than that of Bromus, and is therefore easier to sow. Use 12 to 15 pounds per acre with 3 pounds of Alfalfa. Price: 3 lbs., \$1.10, postpaid.

NATIVE RYE GRASS

Makes a very good early pasture, but most of it goes to seed in August. With us here and in the North it is considered an annual grass, as it does not stand our winters very well. 3 lbs., 60c, postpaid.

ENGLISH BLUE GRASS

Sow 25 to 35 lbs. per acre. Especially for low ground where it makes an excellent pasture, and good hay. Of course, where the water will stand longer than a day at a time it would not succeed. 3 lbs., 50c,

FARM AND

Upland Grown Seeds of Perfect Germination

As this book goes to press in November prices on Field Seeds are uncertain. They cannot be quoted for several months ahead of time. I want to sell you first class seed at the lowest possible price, and for that reason I invite you to drop me a card, stating variety and quantity you will need, and I shall make you my best offer, with samples, freight quotation, and any information you may wish.

TIMOTHY

An old variety of grass that is used quite extensively for pasture and for hay, and is often sown with Red Clover. For a pure sowing use from 11 to 15 lbs. per acre. 3 lbs., 50c, postpaid.

SUDAN GRASS

This is a hot weather plant, and does best if planted right after corn planting time. It makes good pasture and good time. It makes good pasture and good hay, due to its rapid growth it produces enormous quantities of feed. Caution: Use only pure Sudan seed, if you want to use it for pasture. There have been losses of cattle due to poisoning, and in practically every instance it was possible to prove that the Sudan was not pure, having contained cane seed. If you want it for hay sow June 1 and cut just before or right after a frost in the fall, same as Cane. It is almost impossible to get two good hay crops in one season. Sow 15 to 25 lbs. per acre. Price: 3 lbs., 35c, postpaid.

MILLET

C1570 German This Millet matures about two weeks later than the small Common Millet. It grows 3 to 4 ft. tall, and makes an abundance of hay for milch cows. Sow 50 lbs. per acre for hay, or 35 lbs. for seed. Price: 3 lbs., 35c, postpaid.

S1575 White Wonder Very much like German Millet, except that the stalks are a little taller with large broad leaves and very large heads. Much earlier than German Millet which makes it very desirabe for late sowing. Price: 3 lbs., 35c, postpaid.

BARLEY

Comfort or Smoothbearded

Has become very popular the past few years. It is early, and yields more here in the Middle West than any of the old varieties. The beards are perfectly smooth, making harvesting easy, and the straw is of much better quality for the stock. Price: 3 lbs., 30c, postpaid.

OATS

Nebraska No. 21 Introduced by the Nebraska Agricultural College, and is still one of the very best varieties for Nebraska, and any other locality where early Oats must be grown. Price: 3 lbs., 30c, postpaid.

Texas Red Oats of medium height, very leafy, and under normal conditions produces big yields. Having a good stiff straw it does not lodge easily. Texas Red has done well during the dry years. Price: 3 lbs., 30c, postnaid. postpaid.

SORGHUM or SUGAR CANE

Black Amber or Early Amber. One of the oldest and best known cane sorts.

Early Orange Larger and heavier stalks, and larger and more abundant leaves, also 3 to 4 weeks later than Black Amber and most other sorts of cane.

Sonderegger's Improved Sorghum For Sorghum or Molasses production this variety is much superior to the others. Stalks 8 to 10 feet high, averaging 1½ to 2 inches in diameter which produce more and sweeter juice than any other kind I have ever tested. If you are growing Cane for Sorghum you should give this variety a trial. Plant in rows like corn, and thin out to 10 or 12 inches apart in the row. For feed or hay sow broadcast 2 bushels of seed per acre. Price: 3 lbs., 40c, postpaid.

RUSSIAN SUNFLOWER

The largest of all sunflowers, grown for the seeds which are of great value for poultry feed. Highly productive. Sow 3 to 4 lbs. per acre. Price: 3 lbs., 65c,

To give you the benefit of the most favorable prices I shall quote you my best price on the quantities and varieties you need. Kindly write for quotations.

Seed Corn HYBRID CORN

Nebraska No. 252 Introduced by the Nebraska Agricultural College and by tests found Matures in 105 days. Price: 3 lbs., 90c; postpaid. Not prepaid, Peck, \$2.35; 1/2 bushel, \$4.25; bushel, \$8.00.

Nebraska No. 110 Growers consider this Hybrid the best for all purposes, and it is the most widely adopted strain, highly disease-resistant. Produces medium size ears, stalks of medium height. All Hybrid Corn has been treated with Semesan. Ibs., 90c; postpaid. Peck, \$2.35; 1/2 bushel, \$4.25; bushel, \$8.00; not prepaid. Nebraska Yellow Dent Matures days, ears well filled with broad deep kernels. A corn well suitable for general planting in the Middle West.

Reid's Yellow Dent A corn of color. Large ears with closely set kernels. Ripens in 100 days.

St. Charles White Matures in 100 to 105 days. Red cob, smooth white kernels. Withstands dry weather fairly well, and is a good yielder.

Iowα Silver Mine 90 to 100 days. Pure white kernels on a small white cob. Shells out good, 70 lbs. of corn will make 62 lbs.

Price of all four varietles listed above: 3 lbs., 45c. postpaid; peck, \$1.00.

FIELD SEEDS

Practically all Types Perfect in Purity

All Field Seeds I carry in stock are first tested, then recleaned, and tested again, for Purity and Germination. Only seeds that come up to highest germination and perfect purity are added to my retail stock. This procedure in some instances is responsible for a slightly higher price, but it is also the reason why my customers continue to buy their Field and Garden Seeds from me, once they have found for themselves that seed of first class is cheap even if it would cost a few per cent more.

DWARF ESSEX RAPE

For sheep and hog pasture, a most profitable plant. Can be sown in early spring along with oats or rye, and can be pastured within a week or so after harvest. Can also be sown on wheat, rye or oats stubble or any vacant land as late as end of July, and will yield immense crops within 6 to 8 weeks. Sow with drill, 3 lbs. per acre, or broadcast, 5 to 6 lbs. per acre. Price: 3 lbs., 45c; postpaid.

SOIA or SOY BEANS

An erect growing plant of greatest value. For hay or for ensilage as good or better than clover, and yielding much heavier. The beans mature anywhere in the corn belt. Thy are of high feed value when ground. As a crop Soy Beans greatly improve the soil. Every farmer should make a trial at least with a small piece of ground, it will pay you well. Price: 45c per 3 lbs., postpaid.

KAFFIR CORN

White Kaffir Matures in 115 to 130 days large heads of oval shaped seeds, white with a splash of red or black. For the seed sow 4 to 5 lbs. per acre in rows 3 feet apart, and for fodder sow 25 to 50 lbs. per acre with drill or breaders. Makes a good quality have or broadcast. Makes a good quality hay, and produces well, two good cuttings per season. Price: 35c per 3 lbs.; postpaid.

Red Kaffir Seeds light red, and slightly smaller than Blackhull; grows more slender and ripens a little earlier. For hay it is practically the same as Blackhull. Price: 35c per 3 lbs., postpaid.

WHEATLAND MILO

Wheatland A cross of Milo and Kaffir first produced in Oklahoma. Grows 2 to 3 ft. tall with stalks strong enough to resist lodging. Matures in 100 days, producing high test seeds, and can be harvested with the combine. For hay it is also very good, makes a finer hay than some of the tall growing sorts of forage plants. Price: 35c per 3 lbs., postpaid.

DWARF HEGARI

Grows 4 to 5 ft. tall, and contains a considerable amount of sugar. The seed matures in 100 days, and is the size of Kaffir Corn, produced in large heads. It seems to do best on bottom land, and resists kernel smut. A good plant for grain or forage. Price: 35c per 3 lbs., postnaid postpaid.

ATLAS SORGO

Grows 7 to 8 ft. tall with a sturdy leafy stalk abundantly juicy and sweet. It seems to resist dry weather well, and has few insect enemies. Stands up well. Atlas Sorgo in the Middle West should be grown as a fodder plant, and less for seed, as the seed matures quite late (130 days). My stock is all state certified. Price: 65c per 3 lbs., postpaid.

GROHOMA

A midseason to late fodder plant 4 to 6 feet tall with stout stems. It is a cross between Feterita and Sorgo, does well on bottom land, and most anywhere, except very dry locations. Production of good hay from Grohoma is very satisfactory. Price: 35c per 3 lbs., postpaid.

GERMAN PEAT MOSS

Lawn and Poultry

Makes an excellent covering for a new lawn. After sowing seed it should be applied about ¼ inch deep. A bale covers about 1,000 sq. ft. of lawn. Peat Moss helps to hold the moisture in the soil until the grass gets started. During the summer it protects the roots from the hot sun. It is excellent for mixing in the soil for shrubs and plants, especially roses. Mix about one-fourth Peat Moss with the soil for roses and shrubs and a little less for perennials and other plants. The horticulture grade should be used for lawns and plants. We also have the high quality poultry litter which is far superior in quality, than the Swedish moss. The lawn moss is especially good for covering flowers and perennials in fall, also rock garden plants. Either kind, bale, \$3.10, not prepaid.

Seed Potatoes

RED RIVER-MINNESOTA GROWN, SPECIAL SELECT.

Double your yield by planting my Northern grown seed potatoes. Actual tests year after year show a much greater and better quality crop from my Northern

Irish Cobbler One of the best for uniform medium size, have a fine white skin, and are of excellent cooking quality. They are very early, and in a dry season, while there are not so many potatoes to the hill, they are still of good marketable size. In normal seasons Irish Cobbler makes wonderful crops, both in quality and quantity. and quantity.

Early Red Ohio This has been a very popular variety for many years: it is a very good yielder. The skin is red, very smooth, and the cooking quality is good.

Warba This new potato has been making excellent crops. In the dry summer of 1937 it was one of the best yielders in the test plots of the Nebraska College of Agriculture. White skinned with pink eyes. In shape about the same as Irish Cobbler. The earliest white potato, being earlier than the old Bliss Triumph.

Price of all Seed Potatoes, 3 lbs. 35c, post-paid. Please write for prices on larger quantities.

VELVETY LAWNS

from

Sonderegger's Clean Seeds

FANCY KENTUCKY BLUE GRASS

One pound of this seed will make a perfect stand on 200 square feet. Figure your seed on that basis. Spade the ground about 6 inches deep. Rake the ground. Now apply 3 to 4 pounds of Vigoro per 100 square feet. Rake again lightly. Wait from two days to a week before sowing. If there is no rain during that time sprinkle the soil. Sow, rake lightly, then roll to pack the ground. Apply a cover of fine cut straw, or better, of Peat Moss, soak the lawn down heavily. A week or ten days later roll once more. During the first summer do not allow the new lawn to get dry, have your sprinkler going two or three times a week during dry weather. This is the absolutely safe and sure way of getting not only a lawn, but a most perfect lawn. One that feels like the nap of a deep-cushioned rug. You can leave out the Vigoro application, leave off the cover with fair results if weather conditions are favorable. But if you follow my instructions completely you can gamble on having a spotless, beautiful lawn, no matter what the weather might be. Fertilize with Vigoro, water, use good seed, roll and water. There is no substitute for this tested process. Per lb., 35c; 3 lbs., \$1.00; 5 lbs., \$1.40; postpaid. \$1.40; postpaid. Six pounds or more for 23c per lb., not

WHITE DUTCH DWARF **CLOVER**

Figure one pound to 300 square feet. Sow and care just like for blue grass. I would not suggest 'that you sow this clover alone. However, mixed in with the blue grass the clover will show up better the first year. Later on the blue grass will eat up the clover. The latter is therefore a nurse crop to the blue grass. Per lb., 59c; 3 lbs., \$1.45; postpaid.

SONDEREGGER'S SPECIAL LAWN GRASS MIXTURE

Contains in the proper proportion the Fancy Kentucky Blue Grass and White Dutch Dwarf Clover, and a little Red Top, properly mixed so as to make a good even stand. Sow just like described under Fancy Kentucky Blue Grass, no difference in the care. I have always found that this special mixture is superior to a straight blue grass sowing. I have also found that Rye grass and many other grasses recommended by some are of little value for a lawn here in the Middle West. Extra fine, choice seed, per lb., 48c; 3 lbs., \$1.32; 5 lbs., \$1.92; postpaid.

VIGORO THE BEST FERTILIZER EVER PRODUCED.

PRODUCED.

Use it freely not only in lawns, any place in your garden, on your trees, shrubs, even on your pot flowers. When you use Vigoro you are taking no chances. The leading gardeners are using it, land-scapers find it the key to success. Vigoro builds up the soil, gives it what plant life requires, a halanced ration of plant food. It is economical to use, its price is in no comparison to the wonderful results it gives. This is why I say: Use more Vigoro. 12 oz. pkt., 20c; 5 lbs., 65c; postpaid. Not prepaid: 5 lbs., 50c; 10 lbs., 85c; 25 lbs., \$1.50; 50 lbs., \$2.50; 100 lbs., \$4.00.

GOOD FARM AND GARDEN BOOKS

Tomato Production The most complete account of tomato culture, in all its phases that has ever been gotten together. No gardener or farmer can afford to be without the book. Whether growing for home use or commercial purposes, the reader has here suggestions and information nowhere else available. Illustrated, 128 pages, 5x7 inches. Cloth \$1.50.

Popular Fruit Growing

Popular Fruit Growing
By S. B. Green, professor of Horticulture
and Forestry in the University of Minnesota. This book gives full information in
regard to planting and taking care of all
kinds of fruit trees, also a complete spraying calendar, with necessary recipes, 328 ing calendar, with necessary recipes, 328 pages. Price, well bound, cloth cover, \$1.50.

Sweet Clover White Flowering. By weed, but a valuable crop. Practical experiences of farmers, who are growing and feeding Sweet Clover. A book which every farmer should have. 32 pages of practical information on the agricultural value of Sweet Clover. Illustrated, 6x9 inches, paper cover. Price, 25c.

A Little Book on Perennials

By Alfred C. Hottes. This is a 170-page book, which gives full information for the growing of perennials from seed; also bulbs and cuttings. Everyone who owns a home should have one of these books. It will help you arrange your flower garden so that it will be permanent. Price, \$2.00: postnaid \$2.00; postpaid.

Page

Roysenherry

Cultivation of the Mushroom

Everyone growing mushrooms should have one of these books, in order to get the best results. This is a 24-page book with paper cover and it gives full instructions about growing mushrooms. Price, 50c; postpaid.

Make Your Garden Pay

This little book gives full information about the planting and growing of all kinds of vegetables. It also has many illustrations as well as other information that is valuable to anyone growing vegetables. Price, per copy, with paper cover, 30c; postpaid.

Grow Your Own Fruit Every one who is interested in growing fruit should have one of these 81-page fruit books. They give full information about planting and taking care of your fruit trees. They also give many helpful illustrations. This book has a paper cover, but is a wonderful buy for the money. If this book is not satisfactory, money will be returned. Price, 30c; postpaid.

A Little Book of Annuals

By Alfred C. Hottes. This little 116-page book gives more information in regard to the growing and care of annual flowers than any other book I have ever seen. It gives full information about starting plants from seed, as to their care and time of blooming, etc. It also has many illustrations showing how seeds should be started, as well as illustrations of flowers, etc. Every lover of flowers should have one of these little books. Cloth bound. Price, \$1.90; postpaid.

BOOKS IN FOREIGN LANGUAGES

Praktisches Handbuch fuer

Gartenfreunde By Hesdoerffer-Daenhardt. A good book in German, with 205 illustrations, and 327 pages, covering practically all phases of gardening. Special price, \$1.65 each; postpaid.

Hampel's Gardenbook This book is printed in the German language. Many of my customers ask for a good gardenbook printed in that language. The "Hampel's Gartenbuch fur Jedermann" has just been completed and I can highly recommend it as the best garden book in German print for everyday use. It will be found satisfactory. The book is well illustrated, well bound. These books are imported from Germany. Price, \$3.25; postpaid. postpaid.

The Flower Grower This is a monthly magazine, published by a man who knows flowers. I have been reading it for a number of years and find it to be the best magazine on flowers of any I have ever read. Every lover of flowers should read it. It gives much valuable information about what to plant, where to plant and how to plant it. Single copy, 25c; six months, \$1.25; year, \$2.00. Send me your subscription and I will see that you get this magazine. this magazine.

The Season's Sensational Novelties

6 Varieties of Outstanding Merit

FOR BORDER EDGING ROCK GARDEN

DWARF CUP-FLOWER

C826. A beautiful plant that grows 5 to 6 inches high, much like the Viola sorts in habit of growth. It is very dense and bushy, in bloom from early summer until frost in the fall. The flowers of pretty cup shape and of a showy violet-blue color are covering the little plant completely. Very pretty and easy to grow. Stands full sun. This is one of the finest of recent introductions. You will be proud of these plants. Fresh, pure seed, per packet, 30c, postpaid.

FOR BACKGROUND IN YOUR FLOWER BEDS

SCARLET BEAUTY DOUBLE HOLLYHOCK

C1029. Blooms the first year from an early spring sowing. Grows 5 to 6 ft. tall, with long spikes of double flowers, which are of a pure, intense scartet color, gorgeously highlighting garden scenes. Never before has such a showy brilliant color been known among the double Hollyhocks. With a cover over winter the roots will be hardy except in the North, where Hollyhocks are annual plants. Guaranteed true seed. Packet, 25c, postpaid.

Golden Table Queen Squash

C609. This new production will reproduce true to description. It is superior to any other strain of Table Queen Squash. Uniform in size, shape, color and thickness of flesh, and the golden color of the ripe fruit is highly attractive, being of particular value for market growers. In this pure strain of Golden Table Queen there are no more of the variations experienced with the older sorts under similar name. Packet, 10c; oz., 20c; 1/4 lb., 45c; postpaid.

A Wonderful New Cucumber "Colorado"

C329. Imagine a dark green cucumber with white spines, 12 inches long and 3 to 3½ inches thick, tapering on both ends, and averaging in weight 2 pounds each, ready to use in 60 days. This is the new Colorado Cucumber, a cucumber of excellent quality with thick flesh. For home use or market this variety should be in your planting, you will be proud of it. I furnish you the true seed from the originator. Packet, 10c; oz., 25c; postpaid.

New Red Core Chantenay Carrot

C260. The old fashioned Early Chantenay has long been known, and is still well liked for its fine quality, earliness, and smooth carrots. In this new Red Core Chantenay the good features of the old standard variety remain unchanged. However, the special advantage is that this new strain has no yellow or orange color in the center. It is of a fine dark red color clear through. This is a great improvement, and makes this a most desirable vegetable. Packet, 10c; oz., 20c; 1/4 lb., 50c; postpaid.

Hale's Best Cantaloupe RESISTS MILDEW

C388. The true name of this splendid variety is "Hale's Best No. 45," a mid-season variety that can be picked fully vine-ripe for long distance shipping. In fact the melons are of better edible quality after they have been picked for a few days. Medium to large size, with admirable qualities. This Cantaloupe is claimed to be free from mildew which in some localities reduces production and quality. I suggest that you include Hale's Best in your planting this year; you will like it. The seeds I furnish you are guaranteed true to name. Packet, 10c; oz., 20c; 1/4 lb., 45c; postpaid.

service we have given our customers over 52 years, is the sole foundation of those we have served. The goods we have delivered in the past, the gardenbook.
